Responsible Management Richard Ennals,2014-06-03 This book takes a critical view on corporate practice governmental action and the general approach to Corporate Social Responsibility It draws on experience from the Workplace Innovation movement and argues that as with motherhood and apple pie it is hard to oppose CSR with a community of well meaning people It is however necessary to challenge the foundations on which it is based Many accounts of CSR assume a consistent model of capitalism around the world It is suggested that capitalism can be given a human face as companies adopt programmes which go beyond the minimum legal requirements This builds on traditions of optional corporate philanthropy However without changing the underlying working of the company only cosmetic changes are made In the author s words lipstick is applied to the capitalist pig It can be a mistake to read too much into Responsible Management when the culture of management is designed around irresponsibility Companies have developed elaborate schemes of outsourcing in an environment of limited liability This cannot easily be overcome through gestures This book seeks to engage readers and to provoke thoughts It can be angry and polemical but it points a finger directly at ongoing superficial developments

**Collaborative Advantage** Jeffrey H. Dyer,2000-11-16 Why has Chrysler been twice as profitable as GM and Ford during the 1990s even though it is a much smaller company with plants that are less efficient than Ford s Why does Toyota continue to have substantial productivity and quality advantages long after knowledge of the Toyota Production System has diffused to competitors The answer according to Jeff Dyer is that Toyota and Chrysler have been the first in their industry to recognize that the fundamental unit of competition has changed from the individual firm to the extended enterprise In this book Dyer demonstrates the power of collaborative advantage arguing that in the future competitive advantage will increasingly be created by teams of companies rather than by the single firm Managers who do not recognize this development regardless of their industry are in danger of adopting the wrong strategies for their firms Dyer draws on eight years of study of the

automotive industry including a wealth of data from interviews with over 200 executives and surveys of over 500 suppliers as he offers detailed case studies of Toyota and Chrysler to show managers how to create collaborative advantage with their supplier networks Dyer demonstrates how to build trust in the extended enterprise how to exploit and manage knowledge describing how Toyota manages knowledge across organizational boundaries and how to create advantages through dedicated asset investments In turn these processes generate stunning performance advantages and an identity for the extended enterprise To be successful in future years executives will have to convert their corporations into fully integrated extended enterprises In Collaborative Advantage Jeff Dyer shows them how

**An Appraisal of Batswana Extension Agents' Work and Training Experiences** Rebecca N. Lekoko, 2002 Hermeneutic phenomenological interviews were conducted to explore community based extension workers CBEWs previous work and training experiences and how such experiences contributed to their present working relationships as partners in community development CBEWs responses foreshadowed challenges and problems of coordination that could have otherwise been addressed had they been considered integral elements of previous training curricula The findings throw light on how government policies though explicitly formulated to enhance conditions of service coordination can be in variance with realities of coordination at the village level Awareness of the fissure of policies and actual coordination does not refute the importance of government intervention in community development given CBEWs status as government employees Rather it is only with understanding of and familiarity with CBEWs circumstances that such policies would truly address the challenges problems and possibilities of effective coordination CBEWs comments reflected both awareness and learned understanding of social and political complexities surrounding their work as partners in community development Authority and interventions such as political interference illiterate communities enlightened communities and passive and negative attitudes complicate their working together resulting in problems of resistance rejection and other tensions that defeat the spirit of working together Meaningful acceptance of community development as a collective undertaking needs to be backed by a deliberate unification of CBEWs through centrally organized training Such training programs must not only illuminate the lived experiences of CBEWs as they work among themselves and with other community based groups in the villages but also provide opportunities for CBEWs to take active roles by engaging in activities such as placements in authentic work settings mini interdisciplinary groupings of CBEWs with local communities and other team activities There will be no end to the reservoir of learning if intentional efforts are made to incorporate local knowledge and needs that is immediate challenges problems and needs of CBEWs as they work with the local communities Further effective coordination requires basic skills of communication leadership and management personal and human relations technical skills and relevant attitudinal orientations The features described here are not exhaustive but have in common the intent of making training programs truly sensitive to CBEWs needs as partners in community development
