Creating Distinctiveness Barbara K. Townsend, Jackson Newell, Michael D. Wiese, 1992-10-14 Prepared by ERIC in cooperation with the Association for the Study of Higher Education **Catalog of ERIC Clearinghouse Publications**, 1995

Two-Year Colleges for Women and Minorities Barbara Townsend, 2002-12-24 This book focuses upon approximately 250 nonprofit two year colleges with a student body that is entirely female or at least 25 percent black Hispanic or Native American These special focus colleges include two year colleges historically black colleges HBC s Hispanic serving institutions HIS s and tribal colleges with some of these schools being church affiliated Many of these schools serve as shining examples of how a genuine commitment to access and achievement for female students of color can enhance these students academic success *Resources in Education*, 1995 Shaping the College Curriculum Lisa R. Lattuca, Joan S. Stark, 2011-01-11 Shaping the College Curriculum focuses on curriculum development as an important decision making process in colleges and universities The authors define curriculum as an academic plan developed in a historical social and political context They identify eight curricular elements that are addressed intentionally or unintentionally in developing all college courses and programs By exploring the interaction of these elements in context they use the academic plan model to clarify the processes of course and program planning enabling instructors and administrators to ask crucial questions about improving teaching and optimizing student learning This revised edition continues to stress research based educational practices The new edition consolidates and focuses discussion of institutional and sociocultural factors that influence curricular decisions All chapters have been updated with recent research findings relevant to curriculum leadership accreditation assessment and the influence of academic fields while two new chapters focus directly on learning research and its implications for instructional practice A new chapter drawn from research on organizational change provides practical guidance to assist faculty members and administrators who are engaged in extensive program improvements Streamlined yet still comprehensive and detailed this revised volume will continue to serve as an invaluable resource for individuals and groups whose work includes planning designing delivering evaluating and studying curricula in higher education This is an extraordinary book that offers not a particular curriculum or structure but a comprehensive approach for thinking about the curriculum ensuring that important considerations are not overlooked in its revision or development and increasing the likelihood that students will learn and develop in ways institutions hope they will The book brings coherence and intention to what is typically an unstructured haphazard and only partially rational process guided more by beliefs than by empirically grounded substantive information Lattuca and Stark present their material in ways that are accessible and applicable across planning levels course program department and institution local settings and academic disciplines It s an admirable and informative marriage of scholarship and practice and an insightful guide to both Anyone who cares seriously about how we can make our colleges and universities more educationally effective should read this book

Globalisation, Trade Liberalisation, and Higher Education in North America C.W. Barrow, S. Didou-Aupetit, J. Mallea, 2012-12-06 Since the mid 1970s economic and educational developments in Canada Mexico and the USA have been influenced by two parallel trends 1 the resurgence of glob al economic competition and 2 the active promotion of knowledge intensive serv ice based economies Both trends have been reinforced by the liberalisation of inter national trade under the rubric of the General Agreement on Tariffs and Trade GATT and the World Trade Organisation WTO The North American Free Trade Agreement NAFTA has accelerated these trends in all three countries by providing the framework for an integrated regional economy in North America designed to compete against comparable trading blocs centred in Japan and the European Union The purpose of this study is to examine the developing relationship between trade liberalisation post industrialisation and higher education in Canada Mexico and the USA The larger trends and linkages that we identitY are by no means confined to these three countries We have chosen to focus on Canada Mexico and the USA because the adoption of the North American Free Trade Agreement has accelerated the devel opment of economic policies in these countries which identitY higher education as a central component of each country s new competitiveness strategy As a conse quence government policy makers and higher education decision makers are responding with targeted initiatives to promote the internationalisation of higher education generally and to promote trilateral co operation among North American higher education institutions specifically

Why a strong mission and inspired leadership are vital to the success of America's colleges and universities In 1998 soon after assuming the presidency of Tulane University Scott Cowen was confronted with a setback Despite an undefeated football season and putting the best financial deal on the table Cowen was unable to retain the school's football coach The coach wanted something the president didn't have a football program so popular as the coach put it that fans would line up their Winnebagos on Wednesdays in anticipation of Saturday games In that moment Cowen improbably found himself in the entertainment business and his university was deemed wanting At a time when schools seem overrun by sports programs spiraling costs and absurd ranking systems Winnebagos on Wednesdays argues that colleges and universities of all stripes and sizes can achieve their educational aims if they possess two things visionary leadership and a strong mission Cowen named one of the nation's top university presidents by Time magazine in 2009 gives a behind-the-scenes look at the critical demands faced by many education leaders He profiles a range of situations from how Diana Natalicio of the University of Texas at El Paso expanded a school serving a specific demographic into an academic powerhouse to how Michael Sorrell shifted Paul Quinn College's mission to urban entrepreneurship in order to save the institution Cowen also draws from his own hard-won experiences including the rebuilding of Tulane and New Orleans after Hurricane Katrina and the decision to maintain Tulane's football program He shows how crucial choices in tough situations shape organizations for better or ill A sweeping overview of the higher education landscape Winnebagos on Wednesdays demonstrates that the courage of transformative leadership is essential for colleges and universities to remain vital **Higher Education: Handbook of Theory and Research** Michael B. Paulsen, 2015-01-12
