

This is the power of culture.

Training and retraining should be a continuous process. Otherwise sustenance will be difficult.

- **Value System – Driver of Culture**

Values of an organization communicate what is acceptable and what is not acceptable behavior. For example one of the companies had the following values

1. Quality First
2. Respect for people
3. Sense of urgency

Now this will be the guiding factors for every employee. They will be questioned by any one if they deviate from this. Like a compass in the ship showing direction to the captain, the value system tells organization the right and wrong direction.

No one can question this including CEO. Once again, it depends on leaders, how they drive it and communicate it.

4. Quality Assurance (QA) and Human Resource Development (HRD) should not just remain as nameplate change:

- In the last two decades many organizations changed name of their two departments
- Quality Control became Quality Assurance and Personnel department became Human Resource Development. Unfortunately many companies just changed the board and continued to function in the old way. Few companies adopted new philosophy and become very successful. We strongly recommend companies to adopt the philosophy of QA and HRD in true spirits to create Quality Culture.

Becoming a High Expectation Teacher Christine Rubie-Davies, 2014-08-13 We constantly hear cries from politicians for teachers to have high expectations But what this means in practical terms is never spelled out Simply deciding that as a teacher you will expect all your students to achieve more than other classes you have taught in the same school is not going to translate automatically into enhanced achievement for students Becoming a High Expectation Teacher is a book that every education student training or practising teacher should read It details the beliefs and practices of high expectation teachers teachers who have high expectations for all their students and provides practical examples for teachers of how to change classrooms into ones in which all students are expected to learn at much higher levels than teachers may previously have thought possible It shows how student achievement can be raised by providing both research evidence and practical examples This book is based on the first ever intervention study in the teacher expectation area designed to change teachers expectations through introducing them to the beliefs and practices of high expectation teachers A holistic view of the classroom is emphasised whereby both the instructional and socio emotional aspects of the classroom are considered if teachers are to increase student achievement There is a focus on high expectation teachers those who have high expectations for all students and a close examination of what it is that these teachers do in their classrooms that mean that their students make very large learning gains each year Becoming a High Expectation Teacher explores three key areas in which what high expectation teachers do differs substantially from what other teachers do the way they group students for learning the way they create a caring classroom community and the way in which they use goalsetting to motivate students to promote student

autonomy and to promote mastery learning Areas covered include Formation of teacher expectations Teacher personality and expectation Ability grouping and goal setting Enhancing class climate Sustaining high expectations for students Becoming a High Expectation Teacher is an essential read for any researcher student trainee or practicing teacher who cares passionately about the teacher student relationship and about raising expectations and student achievement *Handbook of Research on Adapting Remote Learning Practices for Early Childhood and Elementary School Classrooms* Courtney-Dattola, Ashley, 2021-12-17 Teaching is a demanding profession as there is constant fluctuation and evolution A portion of teaching is the ability to be able to adapt to various environments especially shifting from in person instruction to online practices Over the last few years early childhood and elementary school classrooms have been thrust into hybrid and remote learning environments and it is vital that educators and institutions adapt to new practices and create various outlets for teachers to be able to more adequately reach their young audience The *Handbook of Research on Adapting Remote Learning Practices for Early Childhood and Elementary School Classrooms* is a critical resource to assist teachers as they develop online teaching practices and work to cater to young students so that they can receive the strongest benefits from their education Through coverage of topics such as hybrid learning and parental involvement paired with sample lesson plans course formats concepts ideas and additional components to further the body of research pertaining to remote learning this book is tremendously beneficial to administrators researchers academicians practitioners instructors and students **How to Meet Standards, Motivate Students, and Still Enjoy Teaching!** Barbara P. Benson, 2003 *How to Meet Standards Motivate Students and Still Enjoy Teaching* is a truly outstanding practical resource that should be in every educator's professional library It succeeds beautifully with the complex challenge of defining a classroom in which standards come alive for teachers and students in a doable manner From the Foreword by Spence Rogers Founder and Director Peak Learning Systems Most states in the USA have adopted some form of standards and accountability into their systems but few teachers understand how to model their classrooms to prepare their students to thrive in this new educational environment In this book the author offers teachers the tools they need to build the standards based classroom Rather than throwing away all their valuable techniques and experience teachers learn to synthesize the best of what they already know and do with current and emerging research on learning and learners The four components of the standards based classroom will help teachers plan lessons assess student work and create a community of learning that meets the standards that have been set for their students *Mapping Equity and Quality in Mathematics Education* Bill Atweh, Mellony Graven, Walter Secada, Paola Valero, 2011-01-06 Concerns about quality mathematics education are often posed in terms of the types of mathematics that are worthwhile and valuable for both the student and society in general and about how to best support students so that they can develop this mathematics Concerns about equity are about who is excluded from the opportunity to develop quality mathematics within our current practices and systems and about how to remove social barriers that systematically

disadvantage those students This collection of chapters summarises our learning about the achievement of both equity and quality agendas in mathematics education and to move forward the debate on their importance for the field
