Markets in Vice, Markets in Virtue John Braithwaite, 2005 What have the market forces of supply and demand to do with making the tax system more equitable John Braithwaite argues that the competition policies that attack monopolies to ensure vigorous price competition and more efficient production of goods also drive more efficient production of bads Tax avoidance like any good or service follows market logic as the supply increases so does the demand Braithwaite makes this argument and explores its implications through a detailed comparative case study of taxation in the United States and Australia He shows that it is possible to flip markets in the vice of tax avoidance to markets in the virtue of tax system integrity Braithwaite sets out specific regulatory strategies and gives examples of how these might be applied The result is a blueprint for restoring the equity of Western tax systems and a breakthrough theory of how regulators can support markets in virtue and curtail markets in vice Markets in Vice Markets in Virtue is essential reading for anyone involved in policy governance and regulation It has profound implications for business and is of special interest to those working in taxation

Regulating Aged Care John Braithwaite, Toni

Makkai, Valerie A. Braithwaite, 2007-01-01 *Regulating Aged Care* is a significant achievement and addresses areas of personal caring which do not usually receive attention. It is an important book which draws attention to the central problems of providing care for large numbers of vulnerable people; it should be required reading on undergraduate and postgraduate courses relating to applied social science, health and medical sociology. Alison M. Ball, Sociology. This book provides an impressive evidence base for both theory development and reassessment of policy and practitioner responses in the field. International Social Security Review. They have given us a fascinating case study, here rich in detail and masterfully interpreted against the backdrop of evolving regulatory strategy. It is rare indeed to find this depth of analysis made accessible, laced throughout with humanity, compassion and humor. Malcolm Sparrow, Harvard University, US. This book offers an intelligent and insightful account of the development of nursing home regulation in three countries: England, the USA and Australia. But more than that, it intertwines theory and more than a decade of empirical work to provide a telling and sophisticated explanation of why and how good regulatory intentions often go awry and what can be done to create systems of regulation which really work to produce improvement. Kieran Walshe, University of Manchester, UK. This book is a major contribution to regulatory theory from three members of the world-class regulatory research group based in Australia. It marks a new development in responsive regulatory theory in which a strengths-based pyramid complements the regulatory pyramid. The authors compare the accomplishments of nursing home regulation in the US, the UK and Australia during the last 20 years and in a longer historical perspective. They find that gaming and ritualism rather than defiance of regulators are the greatest challenges for improving safety and quality of life for the elderly in care homes. *Regulating Aged Care* shows how good regulation and caring professionalism can transcend ritualism. Better regulation is found to be as much about encouragement to expand strengths as incentives to fix problems. The book is underpinned by one of the most ambitious sustained qualitative and quantitative data collections in both the regulatory literature and the aged care literature. This study provides an impressive evidence base for both theory development and reassessment of policy and practitioner responses in the field. The book will find its readership amongst regulatory scholars in political science, law, socio-legal studies, sociology, economics and public policy. Gerontology and health care scholars and professionals will also find much to reflect upon in the book.

Defiance in Taxation and Governance Valerie A. Braithwaite, 2009-01-01 Valerie Braithwaite merges her considerable knowledge of a wide range of disciplines to produce an exemplar of interdisciplinary research. The use of the taxation system as the basis for analysis of how people manage their relationship with authority is effective and produces a much needed addition to the behavioural literature. While the book is primarily about defiance in taxation, many instances of non-taxation related defiance are included which provides excellent support and extension of the tax-based arguments. Braithwaite has produced an excellent example of a book that is grounded in the extant literature while expanding our understanding of the importance of understanding the behaviours that drive defiance. The aim of the book is to show how

authorities can live symbiotically with defiance and she achieves this superbly illustrating how improved satisfaction with the process can minimise defiance Lisa Marriott Pacific Accounting Review This innovative book presents a theory of tax defiance integrating five years of research on people's hopes fears and expectations of the tax system and the authority that administers it Valerie Braithwaite makes a major contribution to regulatory theory by mapping the psychological processes of defiance At the heart of the analysis is the concept of motivational posturing signals sent to indicate how favourably an authority is viewed and readiness to defer to an authority's demands The author explains how resistant defiance expresses disapproval of the way an authority operates and signals to government the need to improve performance to win back public confidence Resistance weakens as the authority claws back its institutional integrity Dismissive defiance on the other hand is challenging and undermining and is not so responsive The book argues for institutional reforms that are both mindful of grievance and of alternative authorities that challenge power It illustrates that in delivering institutional reform commitment to democratic principles and integrity of government will enable authorities to argue their case for community co-operation where appropriate Finally the book goes on to show that power sharing is likely to be a more apt remedy when dismissive defiance is entrenched Safeguarding these deliberations in mature democracies are moral obligation and social capital both of which are likely to erode when authorities show neither justice nor wisdom in handling defiance This unique and innovative example of how psychology can be integrated into new institutional theory and public policy practice will prove an interesting read for scholars students and researchers in the fields of regulatory studies economics public policy and public finance politics and psychology
