**Custerology** Michael A. Elliott, 2008-08-26 On a hot summer day in 1876 George Armstrong Custer led the Seventh Cavalry to the most famous defeat in U S military history Outnumbered and exhausted the Seventh Cavalry lost more than half of its 400 men and every soldier under Custer s direct command was killed It s easy to understand why this tremendous defeat shocked the American public at the time But with Custerology Michael A Elliott tackles the far more complicated question of why the battle still haunts the American imagination today Weaving vivid historical accounts of Custer at Little Bighorn with contemporary commemorations that range from battle reenactments to the unfinished Crazy Horse memorial Elliott reveals a Custer and a West whose legacies are still vigorously contested He takes readers to each of the important places of Custer s life from his Civil War home in Michigan to the site of his famous demise and introduces us to Native American activists Park Service rangers and devoted history buffs along the way Elliott shows how Custer and the Indian Wars continue to be both a powerful symbol of America s bloody past and a crucial key to understanding the nation s multicultural present Elliott is an approachable guide as he takes readers to battlefields where Custer fought American Indians to the Michigan town of Monroe that Custer called home after he moved there at age 10 to the Black Hills of South Dakota where Custer led an expedition that gave birth to a gold rush Steve Weinberg Atlanta Journal Constitution By Custerology Elliott means the historical interpretation and commemoration of Custer and the Indian Wars in which he fought not only by those who honor Custer but by those who celebrate the Native American resistance that defeated him The purpose of this book is to show how Custer and the Little Bighorn can be and

have been commemorated for such contradictory purposes Library Journal Michael Elliott's *Custerology* is vivid trenchant engrossing and important The American soldier George Armstrong Custer has been the subject of very nearly incessant debate for almost a century and a half and the debate is multicultural multinational and multimedia Mr Elliott's book provides by far the best overview and no one interested in the long haired soldier whom the Indians called Son of the Morning Star can afford to miss it Larry McMurtry *The Ethos of Rhetoric* Michael J. Hyde, 2004 Fourteen noted rhetorical theorists and critics answer a summons to return ethics from abstraction to the particular They discuss and explore a meaning of ethos that predates its more familiar translation as moral character and ethics Together the contributors define ethical discourse and describe what its practice looks like in particular communities *The Long and Winding Road* Richard Brook, 2008-09 Exploring the intersection of art science and religion Seeking Truth Living with Doubt considers that all three are paths to the same end Attacking not only the unyielding smugness of evolutionary biologists but also the uncompromising surety of Fundamentalist figureheads in both the Christian and Islamic faiths author Steven Fortney and Marshall Onellion take the reader on a path that disavows all such certainties and considers the thought provoking question What does it mean to live with doubt Far from leaving questions unanswered instead they tackle such questions as proof versus faith the impossibility of absolute understanding and how a combination of art science and religion can lead to a transcendence of that which we cannot know In so doing they expose the dangers of certainty be it in religion science or any other ideology that claims to offer absolute truth Seeking Truth Living with Doubt has been endorsed by theologians Arthur Dewey Professor of Theology Xavier University a Jesuit University Ohio USA biologists Clark Lindgren Grinnell College Iowa USA and physicists Narendra Kumar Director of the Raman Research Institute Bangalore India by Christians Jews Hindus and Buddhists It will appeal to those interested in the two channels of truth seeking transcendence also called religion and the physical world also called science The book interconnects many science topics including cosmology neurobiology and evolution to religion and the arts It also proposes some unorthodox ideas including the equivalence of the Christian concept of Grace and the Buddhist concept of Emptiness and that what a religious devout person does in prayer is identical to what a writer does during the creative process
