Creating A Healthy Camp Community A Nurses Role:

The Many Roles of the Registered Nurse Debra J. Gillespie, 2020-12-16 Nurses are the largest population of healthcare providers practicing in both urban and remote areas across the globe. Currently the nursing profession is in the midst of a significant shortage as aging baby boomers retire and a nursing faculty shortage forces many colleges and universities to turn away qualified applicants. As healthcare needs of the population become more complex and technologies advance, our world needs nurses now more than at any other time in history. This book provides the reader with a wide overview of the many vast roles within the nursing profession, showing that the responsibilities are complex, challenging, and rewarding. It will allow the reader to understand the current job market for nurses and perhaps even persuade some to choose this rewarding profession.

Creating a Healthy Camp Community Kris Miller Lishner, Margaret Auld Bruya, 1994 This book provides an organized, systematic overview of the basic aspects of health program management, nursing practice, and human relations issues in camp nursing. A foremost assumption is that health care in most camps needs improvement. Good health is dependent upon interventions involving social, environmental, and lifestyle factors that impact health more than health care services alone. Professional registered nurses are the best prepared health care providers for most camps. Management skills, community health preparation, broad-based general education background, and emphasis on prevention and health promotion are integral parts of the baccalaureate degree in nursing. Each camp is a small community, and camp nurses must know the nature, characteristics, and informal politics of said community. Health care should be a collaborative effort among its members. A needs assessment survey by the Dean's Fund of the Intercollegiate Center for Nursing Education in Spokane, Washington, was the basis for the information included in this book. Chapters cover traditional issues such as developing a health program, first aid, records, communicable diseases, and injury prevention, as well as more challenging community and professional issues of ethical behavior, violence, substance abuse, and sexuality. Appendices outline American Camping Association standards, staff and camper training in prevention and health promotion, procedures for analyzing accidents, OSHA regulations on occupational exposure to pathogens, and relevant developmental characteristics of young adults. Provide sample checklists and recordkeeping forms and list additional resources. Contains an index. JAT
