Arquitectos Contemporaneos:

12 arquitectos contemporáneos Gomez Luque, 2022-03-23 12 no es un número mero cualquiera es el número mero de fragmentos con los que se puede comenzar a armar el retrato fracturado fragmentado del arquitecto contemporáneo una labor que es siempre continua y no reconoce estados de quietud y que por el contrario exige la agilidad del trato con agentes múltiples en constante evolución La selección de las figuras a estudiar comienza en Peter Eisenman y culmina en Rem Koolhaas polarizando la tensión latente en la discusión actual sobre la autonomía de la disciplina o el realismo de los fenómenos urbanos y sitúa en medio a un grupo de arquitectos cuyas posiciones divergentes definen gran parte de los tópicos ineludibles de la arquitectura contemporánea desde el problema de la organización material a la manipulación formal desde el problema del contexto a la sociedad del espectáculo desde la retórica tecnológica hasta la densidad conceptual la primacía del proceso o el discurso de lo inacabado El resultado es un cuadro heterogéneo y colorido complejo y esquivo a la figuratividad de la interpretación crítica Un retrato fragmentado

The Making of Mexican Modernist Architecture Celia Esther Arredondo Zambrano, 2023-05-03 This book presents the making of Mexican Modernist architecture through five power structures academic social status economic political gender and postcolonial and by interviews and analysis of 13 key Mexican architects These include Luis Barragán Jos Villagrán García Juan O Gorman Pedro Ramírez Vázquez Agustín Hernández Abraham Zabludovsky Carlos Mijares Ricardo Legorreta Juan José Díaz Infante Enrique Norten Alberto Kalach Javier Sordo Madaleno and Clara de Buen Although the five power structures framed what was built the testimony of these Mexican architects helps us to recognize and discover subtleties and nuances Their views thereby shed light on what contributed to making Mexican Modernist architecture so distinctive globally Even if these architects were not always aware of the power structures their projects nonetheless supported discrimination marginalization and subjugation In that sense the book also reveals the extent to which these power structures are still present today The Making of Mexican Modernist Architecture's uniqueness lies in uncovering the remarkable buildings that arose amid the five power structures while at the same time questioning their validity It also voices the urgent need today for a new kind of architecture outside these boundaries The book is essential reading for anyone studying Mexican and Latin American architecture

Caribbean Modernist Architecture Gustavo Luis Moré, 2010 In February and March 2008 the International Program and the Department of Architecture and Design at The Museum of Modern Art organised the Museum's first symposium on the modernist architecture of the Caribbean and bordering Latin American countries in collaboration with the Caribbean School of Architecture at the University of Technology Kingston Jamaica The goal was to encourage scholarly curatorial and broader educational awareness Topics covered included regional and international legacies preservation environmental sustainability and urban planning as they relate to modernist architectural history and contemporary practice The presenters were leading architects and architectural historians from the region and attendees included their colleagues as well as local and

international university students policy makers civic leaders and developers from Jamaica the surrounding Caribbean islands and the United States This illustrated volume co published by MoMA and Archivos de Arquitectura Antillana AAA an architectural journal based in the Dominican Republic presents the papers from this critical symposium in both English and Spanish making them accessible to a broader public

Constructing Identity in Contemporary Architecture Peter Herrle, Stephanus Schmitz, 2009 The global spread of uniform modes of production and cultural values has been accompanied by a dissemination of stereotypes of modern architecture styles almost everywhere around the globe Paradoxically the reverse process has also emerged In some countries the elites feel the necessity to counterbalance the loss of identity and defend their own cultures against the intruding forces of globalization What started as a defensive notion has developed into a more progressive attempt to re create what has allegedly been lost This trend is being strongly expressed in discourses about architecture in countries of the South Who are the actors feeling compelled to construct new identities How are these new identities in architecture created in various parts of the world And which are the ingredients borrowed from various historical and ethnic traditions and other sources These and other questions are discussed in five case studies from different parts of the world written by renowned scholars from Brazil Mexico Egypt India and Singapore

Modernity and the Architecture of Mexico Edward R. Burian, 2010-06-28 Since the mid 1970s there has been an extraordinary renewal of interest in early modern architecture both as a way of gaining insight into contemporary architectural culture and as a reaction to neoconservative postmodernism This book undertakes a critical reappraisal of the notion of modernity in Mexican architecture and its influence on a generation of Mexican architects whose works spanned the 1920s through the 1960s Nine essays by noted architects and architectural historians cover a range of topics from broad based critical commentaries to discussions of individual architects and buildings Among the latter are the architects Enrique del Moral Juan O Gorman Carlos Obregón Santacilia Juan Segura Mario Pani and the campus and stadium of the Ciudad Universitaria in Mexico City Relatively little has been published in English regarding this era in Mexican architecture Thus Modernity and the Architecture of Mexico will play a groundbreaking role in making the underlying assumptions ideological and political constructs and specific architects agendas known to a wide audience in the humanities Likewise it should inspire greater appreciation for this undervalued body of works as an important contribution to the modern movement

Urban Visions Carmen Díez Medina, Javier Monclús, 2018-06-23 This book is a useful reference in the field of urbanism It explains how the contemporary city and landscape have been shaped by certain twentieth century visions that have carried over into the twenty first century Aimed at both students and professionals this collection of essays on diverse subjects and cases does not attempt to establish universal interpretations it rather highlights some outstanding episodes that help us understand why the planning culture has given way to other forms of urbanism from urban design to strategic urbanism or landscape urbanism Compared with global interpretations of urbanism based on socioeconomic history or architectural historiography Urban

Visions From Planning Culture to Landscape Urbanism aims to present the discipline couched in international contemporary debate and adopt a historic and comparative perspective The book s contents pertain equally to other related disciplines such as architecture urban history urban design landscape architecture and geography Foreword by Rafael Moneo **F.C.I. Siza** Luis Muñoz,Carlos Seoane,Álvaro Siza,2002 **Neo-Gothic Architecture in Mexico** Martin M. Checa-Artasu,2025-06-02 Neo Gothic architecture is a global phenomenon observed in Mexico from the 1850s to the mid 20th century even with current examples In Mexico there are more than 500 buildings with some neo Gothic element new parishes and churches large temples examples of exterior decorations beautiful sacred furniture and art inside the temples funerary elements at cemeteries graves mausoleums tombs and civil buildings mansions houses schools hospitals porticoes so on This architecture in Mexico spread in two ways through architecture teaching academies but also thanks to the diffusion of bishops and priests who showed images and engravings for master builders stonemasons and other local artisans to copy Finally they built these buildings many times with the support of the parishioners Also the economic and political elites built mansions and houses in that style to show their wealth and financial and political power Something they also did in their tombs and pantheons since there are many built in that style A book on the characteristics agents and causes of the development of the neo Gothic style in Mexico is pioneering and the first of its kind It is a type of architecture extraordinarily little studied in Mexico A study of these characteristics would be of interest to a sector of the academy interested in the topics of history of architecture art studies on religion and culture in general This book covers a huge gap in knowledge about an architectural style widely spread worldwide and that is widely unknown in Mexico and Latin America and that today is already a cultural heritage to be protected disseminated and valued Sanctuary of Fatima Karla Britton,Alexandros N.
