

**RE EX PARTE APPLICATION OF RIDZWAN IBRAHIM
(PRESUMPTION OF DEATH)**

**HIGH COURT MALAYA, KUALA LUMPUR
HELILIAH MOHD YUSOF J**

**[ORIGINATING MOTIONS NO: S7-25-8-2002]
27 AUGUST 2002**

EVIDENCE: Presumption - Death - Person missing for more than seven years - Declaration to presume person dead - Application for - Evidence Act 1950, s. 108 - Burden of proof - Whether there was evidence to prove person's whereabouts unknown - Syariah laws - Application involved a Muslim - Whether matter within jurisdiction of Syariah Court

The applicant applied to this court for a declaration that his relative, one Sheikh Mohamed, be presumed dead. Affidavits were tendered from those related to the said Sheikh to prove that efforts to secure information as to whether he was alive or dead had been unsuccessful.

The main issue in this matter was whether the said Sheikh could be presumed dead as no one close to him could ascertain whether he was alive. However, in considering the said application, this court saw it fit to comment on whether the present matter fell within the jurisdiction of the Syariah Court as firstly, the said Sheikh was a Muslim and the reason for the application was for the applicant to obtain letters of administration in relation to the said Sheikh's estate in absence of a will.

Held:

[1] Evidence disclosed that the applicant's father had failed in his efforts to obtain a death certificate of the said Sheikh. It was also indicated that the daughters of the said Sheikh had made a disclaimer to the assets of the latter which were situated in Malaysia. Such a conduct would not have been inconsistent with the said Sheikh being alive. Further affidavits from the applicant's relatives disclosed that the said Sheikh had left Malaysia for Saudi Arabia and had passed away. But attempts made by them to secure a death certificate have thus far been unsuccessful. (pp 505 f, h-i, 506 a, 514 b-d & 516 f-g)

[2] This court had the option of not making an order on the present application in view of the existence of a similar provision under the Syariah Court Civil Procedure (Federal Territories) Act 1998. However, granting this application would not be repugnant to the implementation of the 1998 Act. In allowing the application sought under s. 108 of the Evidence Act, consideration was also given to the fact that the period

Learning to Love Raksha Pande, 2021-03-19 Learning to Love moves beyond the media and policy stereotypes that conflate arranged marriages with forced marriages Using in depth interviews and participant observations this book assembles a rich and diverse array of everyday marriage narratives and trajectories and highlights how considerations of romantic love are woven into traditional arranged marriage practices It shows that far from being a homogeneous tradition arranged marriages involve a variety of different matchmaking practices where each family tailors its own cut and paste version of British Indian arranged marriages to suit modern identities and

ambitions Pande argues that instead of being wedded to traditions people in the British Indian diaspora have skillfully adapted and negotiated arranged marriage cultural norms to carve out an identity narrative that portrays them as modern and progressive migrants ones who are changing with the times and cultivating transnational forms of belonging

Microbial Modulation of Host Apoptosis and Pyroptosis Amal O. Amer,Yongqun He,2014-10-23 Infectious disease is the result of an interactive relationship between a microbial pathogen and its host In this interaction both the host and the pathogen attempt to manipulate each other using a complex network to maximize their respective survival probabilities Programmed host cell death is a direct outcome of host pathogen interaction and may benefit host or pathogen depending on microbial pathogenesis Apoptosis and pyroptosis are two common programmed cell death types induced by various microbial infections Apoptosis is non inflammatory programmed cell death and can be triggered through intrinsic or extrinsic pathways and with or without the contribution of mitochondria Pyroptosis is an inflammatory cell death and is typically triggered by caspase 1 after its activation by various inflammasomes Microbial pathogens are able to modulate host apoptosis and pyroptosis through different triggers and pathways The promotion and inhibition of host apoptosis and pyroptosis vary and depend on the microbe types virulence and phenotypes For example virulent pathogens and attenuated vaccine strains may use different pathways to modulate host cell death Specific microbial genes may be responsible for the modulation of host cell death Different host cells including macrophages dendritic cells and T cells can undergo apoptosis and pyroptosis after microbial infections The pathways of host apoptosis and pyroptosis induced by different microbes may also differ Different methods can be used to study the interaction between microbes and host cell death system **Key Cases: Family Law**

Models for Microscopic to Macroscopic Biological Macromolecules and Tissues Luis Olivares-Quiroz,Osbaldo Resendis-Antonio,2018-02-26 This book presents cutting edge research on the use of physical and mathematical formalisms to model and quantitatively analyze biological phenomena ranging from microscopic to macroscopic systems The systems

discussed in this compilation cover protein folding pathways gene regulation in prostate cancer quorum sensing in bacteria to mathematical and physical descriptions to analyze anomalous diffusion in patchy environments and the physical mechanisms that drive active motion in large sets of particles both fundamental descriptions that can be applied to different phenomena in biology All chapters are written by well known experts on their respective research fields with a vast amount of scientific discussion and references in order the interested reader can pursue a further reading Given these features we consider Quantitative Models for Microscopic to Macroscopic Biological Macromolecules and Tissues as an excellent and up to date resource and reference for advanced undergraduate students graduate students and junior researchers interested in the latest developments at the intersection of physics mathematics molecular biology and computational sciences Such research field without hesitation is one of the most interesting challenging and active of this century and the next

Handbook of the Behavioral Neurobiology of Serotonin Christian P. Muller, Barry Jacobs, 2009-12-30 Serotonin 5 hydroxytryptamine often cited as 5 HT is one of the major excitatory neurotransmitter and the serotonergic system is one of the best studied and understood transmitter systems It is crucially involved in the organization of virtually all behaviours and in the regulation of emotion and mood Alterations in the serotonergic system induced by e g learning or pathological processes underlie behavioural plasticity and changes in mood which can finally results in abnormal behaviour and psychiatric conditions Not surprisingly the serotonergic system and its functional components appear to be targets for a multitude of pharmacological treatments examples of very successful drugs targeting the serotonergic system include Prozac and Zoloft The last decades of research have not only fundamentally expanded our view on serotonin but also revealed in much more detail an astonishing complexity of this system which comprises a multitude of receptors and signalling pathways A detailed view on its role in basal but also complex behaviours emerged and was presented in a number of single review articles Although much is known now the serotonergic system is still a fast growing field of research contributing to our present understanding of the brains function during normal and disturbed behaviour This handbook aims towards a detailed and comprehensive overview over the many facets of behavioural serotonin research As such it will provide the most up to date and thorough reading concerning the serotonergic systems control of behaviour and mood in animals and humans The goal is to create a systematic overview and first hand reference that can be used by students and scholars alike in the fields of genetics anatomy pharmacology physiology behavioural neuroscience pathology and psychiatry The chapters in this book will be written by leading scientists in this field Most of them have already written excellent reviews in their field of expertise The book is divided in 4 sections After an historical introduction illustrating the growth of ideas about serotonin function in behaviour of the last forty years section A will focus on the functional anatomy of the serotonergic system Section B provides a review of the neurophysiology of the serotonergic system and its single components In section C the involvement of serotonin in behavioural organization will be discussed in great detail while section D deals

with the role of serotonin in behavioural pathologies and psychiatric disorders The first handbook broadly discussing the behavioral neurobiology of the serotonergic transmitter system Co edited by one of the pioneers and opinion leaders of the past decades Barry Jacobs Princeton with an international list 10 countries of highly regarded contributors providing over 50 chapters and including the leaders in the field in number of articles and citations K P Lesch T Sharp A Caspi P Blier G K Aghajanian E C Azmitia and others The only integrated and complete resource on the market containing the best information integrating international research providing a global perspective to an international community Of great value not only for researchers and experts but also for students and clinicians as a background reference *Life and Death in a Roman City* Andrew Simmonds, Nicholas Márquez-Grant, Louise Loe, 2008 This site report presents the findings from an August 2004 January 2006 excavation of a Roman burial site in Gloucester including a first century CE cemetery and a mass grave of at least 91 individuals from the second half of the second century Long sections discuss the human remains and the grave catalogue the finds and environmental evidence and a synoptic discussion of the gravesite as a whole Color images and black and white renderings accompany the text **Handbook of the Behavioral Neurobiology of Serotonin** , 2020-01-23 Handbook of the Behavioral Neurobiology of Serotonin Second Edition builds on the success of the first edition by continuing to provide a detailed and comprehensive overview of the many facets of behavioral serotonin research The text expands on the two key topics behavioral control sensory processing ultrasonic vocalization and melatonin and sleep control and psychiatric disorders including its role on psychostimulant abuse and addiction The new edition includes two new sections on the serotonin systems interactions and the involvement of serotonin in neurological disorders and associated treatment Serotonin is a major neurotransmitters in the serotonergic system which one of the best studied and understood transmitter systems Both are critically involved in the organization of all behaviors and in the regulation of emotion and mood Features two new sections on serotonin systems interactions and serotonin in neurological disorders Focuses on ionotropic and metabotropic 5 HT receptor involvement in behavior Maps receptors and receptor signaling pathways to neurochemical and behavioral outcomes Covers the interactions between serotonin melatonin and kynurenine pathways *Cellular Mechanics and Biophysics* Claudia Tanja Mierke, 2020-10-30 This book focuses on the mechanical properties of cells discussing the basic concepts and processes in the fields of immunology biology and biochemistry It introduces and explains state of the art biophysical methods and examines the role of mechanical properties in the cell protein interaction with the connective tissue microenvironment The book presents a unique perspective on cellular mechanics and biophysics by combining the mechanical biological physical biochemical medical and immunological views highlighting the importance of the mechanical properties of cells and biophysical measurement methods The book guides readers through the complex and growing field of cellular mechanics and biophysics connecting and discussing research findings from different fields such as biology cell biology immunology physics and medicine Featuring suggestions for further reading throughout and addressing a wide
