Mass Communication, Popular Taste and Organized Social Action

By PAUL F. LAZARFIELD and ROBERT K. MERTON

PROBLEMS INVOLVING THE ATTENTION of men change, and they change not at random but largely in accord with the altering demands of society and economy. . . . As a host of recent confessions, books and articles indicate, the role of radio, print and film in society has become a problem of interest to many and a source of concern to some. This shift in public interest appears to be the product of several social trends.

SOCIAL CONCERN WITH THE MASS MEDIA

Many are alarmed by the ubiquity and potential power of the mass media. It is widely felt that the mass media comprise a powerful instrument which may be used for good or for ill and that, in the absence of adequate controls, the latter possibility is on the whole more likely. For these are the media of propaganda, and Americans stand in peculiar dread of the power of propaganda. As the British observer, William Empson, recently remarked of us: "They believe in machinery more passionately than we do; and modern propaganda is a scientific machine; so it seems to them obvious that a mere reasoning man can't stand up against it. All this produces a curiously glibish attitude toward anyone who might be doing propaganda. 'Don't let that man come near. Don't let him tempt me, because if he does I'm sure to fall.'"

The ubiquity of the mass media promptly leads many to an almost magical belief in their enormous power. But there is another and, probably, a more realistic basis for widespread concern with the social role of the mass media; a basis which has to do with the changing types of social control exercised by powerful interest groups in society. Increasingly, the chief power groups, among which organized business occupies the most spectacular place, have come to adopt techniques for manipulating mass public through propaganda in place of more direct means of control.

R. Willison, 1972-12-07 More than fifty specialists have contributed to this new edition of volume 4 of The Cambridge Bibliography of English Literature The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis articulation and coordination that it has been retained in all its essentials for the new edition The task of the new contributors has been to revise and integrate the lists of 1940 and 1957 to add materials of the following decade to correct and refine the bibliographical details already available and to re shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries *Monographic Series Library of Congress*, 1979 [The British Library General Catalogue of Printed Books 1976 to 1982](#) British Library, 1983 *Library of Congress Catalogs Library of Congress*, 1980 *Books in Print Supplement*, 1988 **The Future of the Arts** David B. Pankratz, Valerie B. Morris, 1990 This volume presents the work of social scientists public policy analysts policy makers and arts funding decision makers The contributors seek to address serious issues confronting the future of the arts in America by defining the role of social science research in the formulation of public policies The chapters reflect the diverse disciplinary perspectives and methodologies which make up the broad enterprise of arts research and cover a wide array of current issues in arts research and public policy including the current state of arts and arts education research arts participation by

ethnic cultures baby boomers and older adults emerging patterns of aesthetic choice public arts policy in the future and conditions for the growth and effective use of arts research Academics and students in political science policy analysis sociology economics arts administration and education policy makers and arts administrators will find *The Future of the Arts* a valuable resource The contributors conclude that the future of the arts in America will be shaped by a wide array of forces The challenge is in avoiding passive reactivity to these trends assessing their short term and long term influences and strategically developing policy options that are within the decision making control of leadership sectors in the complex arts policy world Until recently the political context of public arts policy has hindered the development and utilization of arts research In many ways this book illustrates the promise of research based policy formulation for the arts in America
