Grotjahn, 1979 Social Psychiatry Vladimir Hudolin, 2013-06-29 It is becoming more and more difficult to publish papers from international and world scientific meetings The causes are partly financial in addition the number of meetings held is so large that it is impossible to find the necessary time for the enormous amount of work involved in preparing and publishing these materials Also the scientific and professional quality of these meetings is often poor as the same points of view as well as more or less the same papers with only slight modifications are usually presented. The educational system is also responsible since professionals are required to publish papers in order to get promoted in their profession and in their institutions Overproduction of meetings and papers is often mentioned by many pro fessionals but when we look at the professional activities of the critics of these meetings and papers we can see that they also behave in the stereotypic way they write papers read them at congresses and publish in periodicals The number of periodical publications of some medical branches including psychiatry is enor mous In the light of such thoughts it seems opportune to evaluate the 8th World Congress of Social Psychiatry and the papers presented the papers you are now holding in your hands Although such an evaluation is a delicate and difficult task I think it should be at least attempted in this Editorial **Current Catalog National** Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 Art Therapy National Institute of Mental Health (U.S.),1974 The bibliography on art therapy presents 1175 citations 1940 1973 drawn from searches of the medical indexes computer systems of the National Library of Medicine and the National Institute of Mental Health other bibliographies Centre International de Documentation Concernant les Expressions Plastiques and the American Journal of Art Therapy References are listed alphabetically by author within 11 categories of art therapy as a profession with specifically diagnosed individuals including psychotic cognitively impaired and physically disabled persons in institutions in groups with children and adolescents in diagnosis and evaluation case studies techniques and methods personality studies of artists research and miscellaneous including films and bibliographies Listings include information on author title source pagination date and sometimes a brief annotation An author index is provided CL The Handbook of Art Therapy Caroline Case, Tessa Dalley, 2003-09-02 What is art therapy How can art and therapy combine to help individuals understand aspects of their inner life This new edition of The Handbook of Art Therapy is thoroughly revised and updated and includes new sections on neurobiological research and a current review of literature and contemporary practice It provides a comprehensive introduction to the field of art therapy in a variety of different settings Caroline Case and Tessa Dalley draw on their experience of teaching and practising art therapy concentrating on what art psychotherapists actually do where they practice and how and why art therapy is effective First hand accounts of the experience of art therapy from both therapists and clients are used throughout enriching the discussion of subjects including the art therapy room art and psychoanalysis art therapy and creativity working with groups in art therapy art therapy with individual patients This straight forward and highly practical Handbook will be invaluable not only as an introduction to the profession but also as a reference for students
