Urban Avant-Gardes Malcolm Miles, 2004-07-31 Can art or architecture change the world Is it possible to think of a new cultural avant garde today This book contributes to the debate by looking back to past avant gardes and by profiling contemporary cases of radical cultural practices

Urban Avant-Gardes Malcolm Miles, 2004 Urban Avant Gardes presents original research on a range of recent contemporary practices in and between art and architecture giving perspectives from a wide range of disciplines in the arts humanities and social sciences that are seldom juxtaposed it questions many assumptions and accepted positions This book looks back to past avant gardes from the nineteenth and twentieth centuries examining the theoretical and critical terrain around avant garde cultural interventions and profiles a range of contemporary cases of radical cultural practices The author brings together material from a wide range of disciplines to argue for cultural intervention as a means to radical change while recognizing that most such efforts in the past have not delivered the dreams of their perpetrators Distinctive in that it places works of the imagination in the political and cultural context of environmentalism this book asks how cultural work might contribute to radical social change It is equally concerned with theory and practice part one providing a theoretical framework and part two illustrating such frameworks with examples

Urban Utopias Malcolm Miles, 2007-11-21 Utopia tends to generate a bad press regarded as impracticable perhaps nostalgic or contradictory when visions of a perfect world cannot accommodate the change that is necessary to a free and self organizing society But people from diverse backgrounds are currently building a new society within the old balancing literal and metaphorical utopianism and demonstrating plural possibilities for alternative futures and types of settlement Thousands of such places exist around the world including intentional communities eco villages permaculture plots religious and secular retreats co housing projects self build schemes projects for low impact housing and activist squats in urban and rural sites This experience suggests however that when planning and design are not integral to alternative social formations the modern dream to engineer a new society cannot be realized The book is structured in four parts In part one literary and theoretical utopias from the early modern period to the nineteenth century are reconsidered Part two investigates twentieth century urban utopianism and contemporary alternative settlements focusing on social and environmental issues activism and eco village living Part three looks to wider horizons in recent practices in the non affluent world and Part four reviews a range of cases from the author s visits to specific sites This is followed by a short conclusion in which a discussion of key issues is resumed This book brings together insights from literary theoretical and practical utopias drawing out the characteristics of groups and places that are part of a new society It links today s utopian experiments to historical and literary utopias and to theoretical problems in utopian thought

Designing Tito's Capital Brigitte Le Normand,2014-07-21 The devastation of World War II left the Yugoslavian capital of Belgrade in ruins Communist Party leader Josip Broz Tito saw this as a golden opportunity to recreate the city through his own vision of socialism In Designing Tito s Capital Brigitte Le Normand analyzes the unprecedented planning process called for by the new leader and the determination of planners to create an urban environment that would benefit all citizens Led first by architect Nikola Dobrovic and later by Milos Somborski planners blended the predominant school of European modernism and the socialist principles of efficient construction and space usage to produce a model for housing green space and working environments for the masses A major influence was modernist Le Corbusier and his Athens Charter published in 1943 which called for the total reconstruction of European cities transforming

them into compact and verdant vertical cities unfettered by slumlords private interests and traffic congestion As Yugoslavia transitioned toward self management and market socialism the functionalist district of New Belgrade and its modern living were lauded as the model city of socialist man The glow of the utopian ideal would fade by the 1960s when market socialism had raised expectations for living standards and the government was eager for inhabitants to finance their own housing By 1972 a new master plan emerged under Aleksandar Dordevic fashioned with the assistance of American experts Espousing current theories about systems and rational process planning and using cutting edge computer technology the new plan left behind the dream for a functionalist Belgrade and instead focused on managing growth trends While the public resisted aspects of the new planning approach that seemed contrary to socialist values it embraced the idea of a decentralized city connected by mass transit Through extensive archival research and personal interviews with participants in the planning process Le Normand s comprehensive study documents the evolution of New Belgrade and its adoption and ultimate rejection of modernist principles while also situating it within larger continental and global contexts of politics economics and urban planning

means of survival the revolution in the absence of men also prompted women to take up traditionally male roles created new jobs in the public sphere open to women and carved out new social spaces in which women could exercise agency In Deco Body Deco City Ageeth Sluis explores the effects of changing gender norms on the formation of urban space in Mexico City by linking aesthetic and architectural discourses to political and social developments Through an analysis of the relationship between female migration to the city and gender performances on and off the stage the book shows how a new transnational ideal female physique informed the physical shape of the city By bridging the gap between indigenismo pride in Mexico's indigenous heritage and mestizaje privileging the ideal of race mixing this new female deco body paved the way for mestizo modernity This cultural history enriches our understanding of Mexico's postrevolutionary decades and brings together social gender theater and architectural history to demonstrate how changing gender norms formed the basis of a new urban modernity
