The New Psychedelic Revolution James Oroc, 2018-01-16 A bold exploration of modern psychedelic culture its history and future Examines 3 modern psy culture architects chemist Alexander Sasha Shulgin mycologist philosopher Terence McKenna

and visionary artist Alex Grey Investigates the use of microdosing in extreme sports the psy trance festival experience and the relationship between the ego entheogens and toxicity Presents a History of Visionary Art from its roots in prehistory to Ernst Fuchs and the Vienna School of the Fantastic to contemporary psychedelic art After the dismantling of a major acid laboratory in 2001 dramatically reduced the world supply of LSD the psychedelic revolution of the 1960s appeared to have finally run its course But the opposite has actually proven to be true and a psychedelic renaissance is rapidly emerging with the rise in popularity of transformational festivals like Burning Man and BOOM the return to positive media coverage of the potential benefits of entheogens and the growing number of celebrities willing to admit the benefits of their own personal use Along with the return of university research the revival of psychedelic philosophy and the increasing popularity of visionary art these new developments signify the beginning of a worldwide psychedelic cultural revolution more integrated into the mainstream than the counterculture uprising of the 1960s In his latest book James Oroc defines the borders of 21st century psychedelic culture through the influence of its three main architects chemist Alexander Shulgin mycologist Terence McKenna and visionary artist Alex Grey before illustrating a number of facets of this Second Psychedelic Revolution including the use of microdosing in extreme sports the tech savvy psychedelic community that has arisen around transformational festivals and the relationship between the ego entheogens and toxicity This volume also presents for the first time a History of Visionary Art that explains its importance to the emergence of visionary culture Exploring the practical role of entheogens in our selfish and fast paced modern world the author explains how psychedelics are powerful tools to examine the ego and the shadow via the transpersonal experience Asserting that a cultural adoption of the entheogenic perspective is the best chance that our society has to survive he then proposes that our ongoing psychedelic revolution now a century old since the first synthesis of a psychedelic in 1918 offers the potential for the birth of a new Visionary Age

Law & Advertising Dean K. Fueroghne, 2017-03-01 In this lively, entertaining, and informative book, Dean K. Fueroghne guides readers through the complex laws governing the creation of advertising, illuminating a heavily regulated arena at the intersection of free enterprise and consumer protection. Is it acceptable to use images of real people, famous or not? Can Nike talk about Adidas in its promotional campaign? When can money be shown? What constitutes puffery or deceptive truth or bait and switch advertising? What are the specific rules pertaining to professional businesses, political advertising, or the marketing of alcohol or tobacco? What is the difference between copyright and trademark? Fueroghne answers these questions and more as he covers the complex laws relevant to advertising in all its guises. In addition to discussing specific cases, he explains the reasoning behind the court's decisions and how it affects the business of advertising. Students of strategic communication, as well as advertising professionals from agency, account executives, and copywriters to art directors and freelance designers, will learn to anticipate when proposed advertising may cause legal problems and how to avoid costly mistakes. Advertising lawyers will also appreciate the book as a handy reference that gathers in one place the many disparate laws affecting marketing and promotion in the United States today.
