The Voices of the Dead Hiroaki Kuromiya, 2007-01-01 Swept up in the maelstrom of Stalin's Great Terror of 1937-1938, nearly a million people died. Most were ordinary citizens who left no records and as a result have been completely forgotten. This book is the first to attempt to retrieve their stories and reconstruct their lives drawing upon recently declassified archives of the former Soviet Secret Police in Kiev. Hiroaki Kuromiya uncovers in the archives the hushed voices of the condemned and he chronicles the lives of dozens of individuals who shared the same dehumanizing fate: all were falsely arrested, executed and dumped in mass graves. Kuromiya investigates the truth behind the fabricated records, filling in at least some of the details of the lives and deaths of ballerinas, priests, beggars, teachers, peasants, workers, soldiers, pensioners, homemakers, fugitives, peddlers, ethnic Russians, Ukrainians, Poles, Germans, Koreans, Jews, and others. In recounting the extraordinary stories gleaned from the secret files, Kuromiya not only commemorates the dead and forgotten but also proposes a new interpretation of Soviet society that provides useful insights into the enigma of Stalinist terror. **The Medical Department of the United States Army in the World War: Activities concerning mobilization camps and ports of embarkation**, by A. Legal scholar Judith Resnik charts the creation of the corrections profession and weaves together the stories of people who made rules for prisons and the stories of those living under the resulting regimes. Resnik maps three centuries of shifting ideas, norms, and legal standards aiming to draw lines between permissible and impermissible punishments. Her account documents the impact of World War II, the United Nations, the US Civil Rights movement, and the pioneering prisoners who insisted that law should protect their individual dignity. Taking us to the present, Resnik analyzes the expansion of imprisonment, the inability of public and private prisons to provide safe housing, and the impact of abolition politics. Exploring the interdependency of people in and out of prisons, *Impermissible Punishments* examines what governments committed to equality owe to the people they detain and argues that many contemporary forms of punishment need to end.

Creation: "Behold, it was very good." Richard Schaefer, 2019-10-28 Author Richard A Schaefer was a lifelong communicator fascinated by stories and like any good journalist dug for the facts and verified sources exploring nagging questions such as Is creation or evolution more credible based on science and expert opinions This book truly represented a personal passion of looking at all sides of the CREATION vs EVOLUTION issue He called on many experts and theorists including Charles Darwin himself Surprisingly Darwin was far more skeptical of his own theories than are many PhDs today and admitted to significant holes in his logic Read for yourself as great thinkers explore the pros and cons of both theories and their variants
