**Snapshots and Visions** Jim Willis,2009-02-05 You have the power to reinvent yourself The power lies not in your mind alone It s also in your genes and DNA It s what makes us human Humans change that s the essence of life Everything from the smallest plant to the largest mountain is in the process of change And that s especially true with human beings We can t always recognize it when it happens slowly and we learn to adjust to the differences But when a living organism stops changing it dies I m not just talking about simple physical changes here Those changes are not that important really They re going to happen one way or another whether we are conscious of them or not I m talking about psychological emotional and spiritual changes the kinds of changes for instance that mold children into mature emotionally balanced adults Each of us by the time we hit senior citizenship will have made countless choices and agonized over millions of decisions We tend to think of them as either good or bad Some of them led to happy productive constructive events Others got us into a world of trouble But from the perspective of age every choice was good in this sense it offered the opportunity to learn something Right or wrong good or bad whatever the consequences that followed our decision we learned from what we have done That kind of learning is called experience That s all experience is living through the consequences of choices and remembering what happened
