Auger,2020-07-25T00:00:00Z

Death is inevitable but our perspectives about death and dying are socially constructed This updated third edition takes us through the maze of issues both social and personal which surround death and dying in Canada Topics include euthanasia and medically assisted death palliative care and hospices the high incidence of opioid deaths the impact of cyber bullying in suicide deaths the sociology of hiv aids funeral and burial practices the high rates of suicide in Canada and dealing with grief and bereavement among others Additionally Auger explores alternative methods for helping dying persons and their loved ones deal with death in a holistic patient centred way Each chapter includes suggested readings discussion questions and in class assignments **Ethical Conduct of Clinical Research Involving Children** Institute of Medicine,Board on Health Sciences Policy,Committee on Clinical Research Involving Children,2004-08-09

In recent decades advances in biomedical research have helped save or lengthen the lives of children around the world With improved therapies child and adolescent mortality rates have decreased significantly in the last half century Despite these advances pediatricians and others argue that children have not shared equally with adults in biomedical advances Even though we want children to benefit from the dramatic and accelerating rate of progress in medical care that has been fueled by scientific research we do not want to place children at risk of being harmed by participating in clinical studies Ethical Conduct of Clinical Research Involving Children considers the necessities and challenges of this type of research and reviews the ethical and legal standards for conducting it It also considers problems with the interpretation and application of these standards and conduct concluding that while children should not be excluded from potentially beneficial clinical studies some research that is ethically permissible for adults is not acceptable for children who usually do not have the legal capacity or maturity to make informed decisions about research participation The book looks at the need for appropriate pediatric expertise at all stages of the design review and conduct of a research project to effectively implement policies to protect children It argues persuasively that a robust system for protecting human research participants in general is a necessary foundation for protecting child research participants in particular Art Therapy in Palliative Care Mandy Pratt,Michele Wood,2015-11-17

This book provides a comprehensive and accessible introduction to the practice and results of art therapy in palliative care It includes first hand accounts from both therapists and clients in a variety of palliative care settings including hospices and hospitals patients own homes prisons AIDS patients adolescent griefwork groups These case studies include examples of client art work and illustrate clearly how art therapy can allow patients to regain feelings of control over their lives **Children,**

Spirituality, Loss and Recovery Joyce E. Bellous, 2013-09-13 The book demonstrates the hopeful stance the young take in response to ordinary suffering and significant trauma when adults talk with them about their losses Its underlying themes convey the truth that loss and recovery are normal in the process of growing to maturity It examines the strength of the child's capacity for resilience through partnerships with adults who allow children to focus on the loss and tell the story of its meaning to someone who really hears it The authors agree that adults need to perceive their own losses so that their attentiveness to the young is informed by wisdom that comes through self understanding but also agree that many adults do not offer that help to children because they believe it will make matters worse The book reveals this fear as a false notion by dealing with childhood traumas such as acquired disability warfare HIV AIDS death of one's parents and cultural dislocation The authors are experienced practitioners who provide practical and theoretical insight into the dynamics of loss and recovery The book offers hope for those who live and work with children and youth through its studied approach to addressing loss by describing young people's potential to work towards wholeness even in the face of fundamental losses to their security This book was published as a special issue of the International Journal of Children's Spirituality

Handbook of Psychiatry in Palliative Medicine Division of Palliative Care University of Manitoba Harvey Max Chochinov Professor of Psychiatry and Family Medicine, William Breitbart Professor of Psychiatry at Weill Medical College of Cornell University, 2000-04-06 This work complements the Oxford Textbook of Palliative Medicine and The Handbook of Psychooncology Topics include the role of psychiatry in terminal care diagnosis and management of depression suicide in the terminally ill pain management the nature of suffering in terminal illness and psychotherapeutic interventions The book also takes into consideration new directions for psychosocial palliative care research

Death and Dying in America Andrea Fontana, Jennifer Reid Keene, 2009-07-20 This engaging new book takes a fresh approach to the major topics surrounding the processes and rituals of death and dying in the United States It emphasizes individual experiences and personal reactions to death as well as placing mortality within a wider social context drawing on theoretical frameworks empirical research and popular culture Throughout the text the authors highlight the importance of two key factors in American society which determine who dies and under what circumstances persistent social inequality and the American consumerist ethic These features are explored through a discussion of topics ranging from debates about euthanasia to deaths resulting from war and terrorism from the death of a child to children's experience of grieving and bereavement and from beliefs about life after death to more practical issues such as the disposal of the dead body Drawing on sociological anthropological philosophical and historical research the authors present the salient features of death and dying for upper level students across the social sciences For anyone interested in learning more about the end of life this book will provide a useful and accessible perspective on the uniquely American understanding of death and dying

Bodies of Knowledge Efua Prah, Susan Levine, 2021-12-01 Spanning the countries of South Africa Swaziland and Ghana this collection of work brings into focus child and youth experience together as a collage of anthropology creative writing poetry and the fine arts Woven together by questions related to the political economy of child and youth well being identity formation and the multiple layers through which children articulate their health narrative Bodies of Knowledge considers living in and coping with chronic illness spirit possession and death The growth in Critical Health Humanities and the Arts globally suggests the desire for blended efforts to draw in a wider breadth of knowledge that cuts across the divided worlds of critical social science and the arts This book set in an African context offers myriad possibilities for cross disciplinary synergies as learning sites It is a critical contribution to the field of children and childhood studies

Perspectives on Palliative Care for Children and Young People Rita Pfund, Susan Fowler-Kerry, 2010 Advances in medical science and technology are saving the lives of more children worldwide than ever Some survive and live out a normal life expectancy others have a life limiting life threatening diagnosis where death may come early and still others will live on well past projected life trajectories into adulthood With so many different care pathways children parents and communities often find themselves facing challenges for which neither they nor their healthcare systems are prepared This book opens a global discussion of these issues Extending Rita Pfund's text *Palliative Care Nursing of Children and Young People* it invites paediatric palliative care professionals parents and children from around the globe to share their knowledge and experience This book is of vital interest to palliative care professionals parents policy makers and academics It is an important move towards ensuring that all children and their families regardless of geographical location gender ethnicity or socio economic class have equal and guaranteed access to comprehensive paediatric palliative care services

Resilience in Palliative Care Barbara Monroe, David Oliviere, 2007-09-06 The first book

of its kind Resilience and Palliative Care Achievement in adversity takes the increasing international literature on resilience and applies it to palliative and end of life care The book offers an overview of all key aspects of palliative care presented through a resilience perspective Why do some patients and families break down while others surmounts the challenges facing them What interventions strengthen individual family and community coping This book aims to facilitate change with people facing the crisis of death dying and bereavement Much of the existing literature has focused on risk problems and vulnerability the emerging concept of resilience focuses on strengths and possibilities The total pain total care approach pioneered by Dame Cicely Saunders and St Christopher s Hospice now needs reinterpreting in the light of changing contexts and challenges The realities of demographic change and resource constrained health and social care environments have generated an increasingly risk focused approach to service delivery A narrowly medicalised approach has inevitable limitations professional care alone will be unable to meet need and demand in the face of ageing populations changing patterns of illness and the need for equity The resilience approach offers a counterbalance that harnesses the strengths of individuals and the communities in which they live and in which most of their dying will take place Resilience thinking emphasises the importance of public health and creates a partnership between patients professionals and community structures seeking to build community capacity and to deliver a preventive health care that will leave future generations less afraid of the dying and bereavement that will confront all of us This book offers insights into how at all levels of planning and delivering palliative care there is the opportunity to maximise coping build an infrastructure for self help and increase the capacity of strengthened teams and organisations

Integrative Pediatrics Timothy Culbert, Karen Olness, 2010-04-10
There is ample evidence that children and adolescents in large numbers are actively using integrative complementary and alternative therapies Various studies now indicate that over 50% of pediatricians surveyed would refer a patient for integrative therapy and they would welcome more natural therapies for children provided they were safe and effective However there has been little training for pediatricians in this area Integrative Pediatrics addresses these issues and provides guidelines for pediatricians parents and general audiences in a balanced evidence based manner In this volume in the Weil Integrative Medicine Library series the authors describe a rational and evidence based approach to the integrative therapy of childhood disorders and well child care integrating the principles of alternative and complementary therapies into the principles and practice of conventional pediatrics The authors examine what works and what doesn t and offer practical guidelines for physicians to incorporate integrative medicine into their practice and how to advise patients and their parents on reasonable and effective therapies The text also covers areas of controversy and identifies areas of uncertainty where future research is needed Chapters also cite the best available evidence for both safety and efficacy of all therapies discussed The series editor is Andrew Weil MD Professor and Director of the Program of Integrative Medicine at the University of Arizona Dr Weil s program was the first academic program in the US and he is the major name in integrative medicine in the

US and well known around the world His program s stated goal is to combine the best ideas and practices of conventional and alternative medicine into cost effective treatments without embracing alternative practices uncritically **In A Younger Voice** Cindy Dell Clark,2011 Adults were once children yet a generational gap can present itself when grown ups seek to know children s lives in research In A Younger Voice discloses how qualitative research tailored to be child centered can shrink the gap of generational unintelligibility The volume invites and instructs researchers who want to explore children s vantage points as social actors Its suggested tool kit draws from both academic and applied research based on the author s lifelong career as a child centered qualitative researcher World round research in knowing children has grown recently in anthropology sociology geography economics cultural psychology and a host of applied fields This book draws widely from the trending child centered research movement taking stock of methods for fulfilling its aims In A Younger Voice provides mature researchers with a kid savvy guide to learning effectively about from and with children The highlighted methods are steadfastly child attuned thinking smaller in order to free children to participate with empowerment From fieldwork and observation to focus groups and depth interviews to the use of photography artwork and metaphors viable methods are discussed with an old hand s acumen for making the procedures practical with children in the field Whether an investigator is at the beginning of a project designing from scratch procedures to involve and reveal the young or at the final stages conducting interpretations and analysis true to children s meanings In A Younger Voice gives know how for a challenging area of inquiry Playfully interviewing children as young as five years old as well as empowering teenagers to tell it like it is are tasks revealed to be both doable and essential For adults seeking to overcome generational cultural myopia these methods are invaluable
