Wilbeck,2014-08-15 This thesis is a historical analysis of the combat effectiveness of the German schwere Panzer Abteilung or Heavy Tank Battalions during World War II During the course of World War II the German Army developed heavy tank battalions to fulfill the concept of breaking through enemy defenses so faster lighter mechanized forces could exploit the rupture These heavy tank battalions had several different tables of organization but were always centered around either the Tiger or the Tiger II tank They fought in virtually every theater of Europe against every enemy of Germany Ultimately the German military created eleven Army and three Waffen SS heavy tank battalions Of the Army battalions the German command fielded ten as independent battalions which were allocated to Army Groups as needed The German Army assigned the last heavy tank battalion as an organic unit of the elite Panzer Grenadier Division Grossdeutschland The Waffen SS allocated all of their battalions to a different Waffen SS Corps Because these units were not fielded until late in 1942 they did not participate in Germany s major offensive operations that dominated the early part of World War II Germany s strategic situation after mid 1943 forced their military onto the

defensive Consequently there are very few instances when heavy tank battalions attacked as a breakthrough force During the latter part of the war they were used in many different ways to provide defensive assistance along very wide frontages This study assesses the German heavy tank battalions as generally effective primarily because of the high kill ratio they achieved However based upon observations from a wide variety of examples this study also outlines several areas where changes may have increased their effectiveness Air Force and Space Digest ,1996 *Encyclopedia of Military Technology and Innovation* Stephen Bull,2004-06-30 From the Abrams M1 tank to the zeppelin this essential reference details the invention and evolution of nearly 600 of the most important advances in military technology from prehistory to the present International in scope it covers weapons ammunition defenses land vehicles aircraft ships detection stealth gear supplies weapons of mass destruction and much more Whether researching such cutting edge technologies as the B 2 Stealth Bomber Patriot Missile and the Roborat project or such historical topics as forts Molotov cocktails or the U 2 Encyclopedia of Military Technology and Innovation is a must have reference Warfare and national defense have provided a strong stimulus for technological advances throughout history This reference provides students and researchers from high school through college scholars and the general public essential information historical perspective and scientific context to understand better the development capabilities and uses of major military technologies Fifty illustrations helpful cross references a bibliography and an index help users navigate this reference and supplement their research *Armor* ,1962 *Arms and Armour* Arms and Armour Society,1998 Building Guderian’s Duck: Germany’s Response To The Eastern Front Antitank Crisis, 1941 To 1945 L-Cmdr Scott M. Chafian,2014-08-15 The appearance of the T 34 in 1941 caused a crisis for German antitank forces Existing antitank guns were nearly impotent against the new Russian tank while antiaircraft and artillery pieces though successful when pressed into action were insufficiently mobile to accompany mechanized forces The German Army Ordnance Office the Heereswaffenamt was responsible for development of new weapons and would be responsible for countering the threat of Russian armor The Heereswaffenamt would need to not only counter the T 34 but also do so in an environment of shifting political relationships and with an increasingly stressed industrial system Utilizing lessons from the bitterly contested battlefields of western Russia the Heereswaffenamt developed a tank destroyer the Jagdpazer IV using the existing chassis of the Panzer IV tank and the guns of both the Panzer IV and Panther tanks The Jagdpanzer IV known by its crews as Guderian s Duck proved to be a capable tank killer against both the T 34 threat of 1941 and 1942 as well as the improved versions of 1943 and 1944
