One of my goals in this book is to explain the underlying principles of these apparent paradoxes from Living Weapons Biological weapons are the least well understood of the so called weapons of mass destruction Unlike nuclear and chemical weapons biological weapons are composed of or derived from living organisms In Living Weapons Gregory D Koblentz provides a comprehensive analysis of the unique challenges that biological weapons pose for international security At a time when the United States enjoys overwhelming conventional military superiority biological weapons have emerged as an attractive means for less powerful states and terrorist groups to wage asymmetric warfare Koblentz also warns that advances in the life sciences have the potential to heighten the lethality and variety of biological weapons The considerable overlap between the equipment materials and knowledge required to develop biological weapons conduct civilian biomedical research and develop biological defenses creates a multiuse dilemma that limits the effectiveness of verification hinders civilian oversight and complicates threat assessments Living Weapons draws on the American Soviet Russian South African and Iraqi biological weapons programs to enhance our understanding of the special challenges posed by these weapons for arms control deterrence civilian military relations and intelligence Koblentz also examines the aspirations of terrorist groups to develop these weapons and the obstacles they have faced Biological weapons Koblentz argues will continue to threaten international security until defenses against such weapons are improved governments can reliably detect biological weapon activities the proliferation of materials and expertise is limited and international norms against the possession and use of biological weapons are strengthened Encyclopedia of Arms Control and Disarmament Richard Dean Burns, 1993 Covering antiquity through to the breakup of the Soviet Union this three volume set makes accessible to the general reader the history and processes of international arms control and disarmament The work covers the history of arms control in all regions of the world changing relationships and alliances in the Middle East neutralization of Switzerland international co operation in Latin America the failures of the League of Nations the successes of the United Nations inlcuding its tenacity in dismantling the Iraqi nuclear arms capability and many other topics of worldwide importance International Peacekeeping Paul F.
