Arms Export Challenge:

The Arms Export Challenge Kevin P. O'Prey, 1995 This book examines the nature of the international arms trade and the adjustment of the defense industries in the United States and Russia to the post cold war world O Prey offers a number of suggestions for resolving the problems posed by arms export competition and defense industry adjustment [Taking Aim at the Arms Trade](#) Doctor Anna Stavrianakis, 2013-07-18 Taking Aim at The Arms Trade NGOs Global Civil Society and the World Military Order takes a critical look at the ways in which NGOs portray the arms trade as a problem of international politics and the strategies they use to effect change NGOs have been pivotal in bringing the suffering caused by the arms trade to public attention documenting its negative impact on human rights conflict security and development around the world and pushing for measures to control or eradicate the trade Overall however their activity has helped sideline debate on Northern military predominance while facilitating intervention in the South based on liberal understandings of the arms trade conflict development and human rights They thus contribute to the perpetuation of a hierarchical world military order and the construction of the South as a site of Northern benevolence and intervention Stavrianakis exposes the tensions inherent in NGOs engagement with the arms trade and argues for a re examination of dominant assumptions about NGOs as global civil society actors

The International Arms Trade Rachel Stohl, Suzette Grillot, 2013-04-29 The multi billion dollar business of the international conventional arms trade involves virtually every country in the world Around the globe people's lives are being irrevocably changed by the effects of guns tanks and missiles These weapons have the potential to cause a deadly and current threat one responsible for hundreds of thousands of deaths a year This succinct and accessible new book explores the complexities and realities of the global conventional weapons trade The first book on the subject in nearly a decade The International Arms Trade provides an engaging introduction to the trade the effects and the consequences of these weapons The authors trace the history of the arms trade and examine how it has evolved since the end of the Cold War In particular they assess the role of the largest arms exporters and importers the business of selling conventional arms around the world and shed new light on the illicit arms trade and the shadowy dealers who profit from their deadly commerce The book also looks closely at the devastating effect the business can have on countries societies and individuals and concludes with an evaluation of the various existing control strategies and the potential for future control opportunities The International Arms Trade will be invaluable for students and scholars of international relations and security studies and for policymakers and anyone interested in understanding more about the conventional arms trade

The Arms Trade and International Criminal Law Tomas Hamilton, 2025-01-22 Despite the establishment of UN embargoes the Arms Trade Treaty ATT and the EU Common Position arms export regulation suffers from significant legal and practical limitations This book critically evaluates the existing body of Arms Trade Law highlighting its inadequacies in preventing weapons from reaching perpetrators of mass violence Drawing on interviews participant observation and

empirical research to assess the perspectives of judges and lawyers it also explores the International Criminal Court's narrow focus on prosecuting political and military leaders. Arguing that institutional attitudes and commitments contribute to a legal culture that obscures the potential for an arms trader case, the book illustrates these dynamics through a case study of the UN Security Council's response to the Second Congo War and the ICC's investigations in the DRC Situation, elucidating missed opportunities to enforce accountability against the entire spectrum of actors responsible for international crimes. Through detailed examination of the arms trade's complexities, *The Arms Trade and International Criminal Law* foregrounds the structural causes of atrocity and argues for broader accountability. It investigates how individuals including corporate executives, state officials, and arms traffickers can be held directly accountable for atrocities under international law even when their actions are geographically or causally distant from the violence itself. Furthermore, by advancing a specific interpretation of the *actus reus* and *mens rea* elements of accomplice liability under Article 25 of the Rome Statute, this book argues for a robust legal basis upon which the ICC can prosecute arms traders. It therefore underscores how international criminal law can complement existing regulations by leveraging its expressive function to condemn all those who profit from atrocity.

Export Controls: Challenges Exist in Enforcement of an Inherently Complex System, 2006 **Export Control Challenges Associated with Securing the Homeland** National Research Council, Policy and Global Affairs, Development, Security, and Cooperation, Committee on Homeland Security and Export Controls, 2012-04-21. The homeland security mission of the Department of Homeland Security (DHS) is paradoxical. Its mission space is uniquely focused on the domestic consequences of security threats, but these threats may be international in origin, organization, and implementation. The DHS is responsible for the domestic security implications of threats to the United States posed in part through the global networks of which the United States is a part. While the security of the U.S. air transportation network could be increased if it were isolated from connections to the larger international network, doing so would be a highly destructive step for the entire fabric of global commerce and the free movement of people. Instead, the U.S. government, led by DHS, is taking a leadership role in the process of protecting the global networks in which the United States participates. These numerous networks are both real (e.g., civil air transport, international ocean shipping, postal services, international air freight) and virtual (the Internet, international financial payments system) and they have become vital elements of the U.S. economy and civil society. *Export Control Challenges Associated with Securing the Homeland* found that outdated regulations are not uniquely responsible for the problems that export controls pose to DHS, although they are certainly an integral part of the picture. This report also explains that the source of these problems lies within a policy process that has yet to take into account the unique mission of DHS relative to export controls. *Export Control Challenges Associated with Securing the Homeland* explains the need by the Department of Defense and State to recognize the international nature of DHS's vital statutory mission, the need to further develop internal processes at DHS to meet export control requirements, and implement export control policies as well as the

need to reform the export control interagency process in ways that enable DHS to work through the U S export control process to cooperate with its foreign counterparts

Japan's Strategic Challenges in a Changing Regional Environment Purnendra Jain, Peng Er Lam, 2013 Japan faces significant challenges in both traditional and non traditional areas of national security policy as the economic resurgence of China and the loss of US hegemonic clout significantly transform the strategic landscape of the Asia Pacific region How is Japan coping with this new global and regional politico security environment What strategic moves has it taken to best position itself for the future to maximize its global and regional influence More importantly how is Japan perceived within the region by traditionally close regional partners such as the US and Australia by supporters in Southeast Asia and by new competitors most prominently China and India What international role do these nations wish Japan to play In this comprehensive volume these crucial questions are explored in depth by a group of scholars both distinguished and diverse

Trends and Challenges in Aerospace Offsets National Research Council,Board on Science, Technology, and Economic Policy,1999-03-03 The granting of offsets to promote exports of major aircraft systems has been a source of significant controversy Critics believe that offsets undermine the U S manufacturing base lead to the transfer of commercial technology possibly affecting national security and result in the loss of high wage jobs Defenders of the practice argue that offsets are a fact of commercial life and can result in net U S job gains In an effort to focus the offsets debate on analytical issues the White House National Economic Council asked the National Research Council to convene expert academicians representatives from the aerospace industry and top government officials to discuss the impact of offsets on the U S economy To ensure a rigorous discussion encompassing all points of view the conference included a series of papers outlining the positions of key participants This resulting volume offers a comprehensive and up to date analysis of the impact of aerospace offsets *The Market for Force* Deborah D. Avant,2005-07-25 The legitimate use of force is generally presumed to be the realm of the state However the flourishing role of the private sector in security over the last twenty years has brought this into question In this book Deborah Avant examines the privatization of security and its impact on the control of force She describes the growth of private security companies explains how the industry works and describes its range of customers including states non government organisations and commercial transnational corporations She charts the inevitable trade offs that the market for force imposes on the states firms and people wishing to control it suggests a new way to think about the control of force and offers a model of institutional analysis that draws on both economic and sociological reasoning The book contains case studies drawn from the US and Europe as well as Africa and the Middle East **The Future of the Defence Firm: New Challenges, New Directions** A. Latham,N. Hooper,2013-03-09 This book is the result of a collaborative research project involving the Centre for Defence and Security Studies at the University of Manitoba Canada and the Centre for Defence Economics at the University of York in England Perhaps not surprisingly given its transatlantic

origins its lineage is somewhat involved In Canada its origins can be traced to two earlier research projects on the political economy of arms production undertaken by members of what has since become the Centre for Defence and Security Studies The first of these carried out in collaboration with Toronto s York University and financially supported by the Centre for Studies in Defence Resources Management at the National Defence College in Kingston Ontario was entitled *The Implications of Europe 1992 For Canadian Defence and Defence Industrial Interests* The second undertaken in conjunction with both York University and Nova Scotia s Dalhousie University was supported by the now defunct Canadian Institute for International Peace and Security and dealt with *N a t i o n a l Defence and the Canadian Economy* Workshops were held in connection with both these studies which brought together academic governmental and industry experts in the field of defence production

Business And Policy Challenges Of Global Uncertainty: European Perspectives Torben Juul Andersen,Edward Ashbee,Bent Petersen,2025-02-10 The global business landscape is changing rapidly The past decade has seen major disruptions including the pandemic military conflict and geopolitical tensions with severe ramifications for multinational organizations that operate as part of the global economy It is no longer viable to optimize international business activities in tightly coupled value chains too rigid and inflexible to deal with major often unexpected disruptions Instead rapidly changing environmental conditions require flexible processes and structures to enable adaptation to major events In this edited volume researchers at the Copenhagen Business School associated international scholars and talented students attempt to make sense of these global political developments considering how they may affect global business conditions and how multinational enterprises can navigate them The volume includes 18 distinct chapters addressing different business and policy challenges posed by an uncertain economic future The possible consequences of these changes are analyzed in view of emerging trends toward deglobalization between Europe and the rest of the world These will inevitably affect the structure of global industries and multinational corporations must find ways to deal effectively with the changing conditions Many of the contributions frame the issues from a European angle whereas others present diverse backgrounds outside of European markets including China India and the United States So the volume presents European Perspectives while also engaging with broader economic political and cultural views

Current and Future Challenges for Asian Nonproliferation Export Controls Scott Allan Jones,2004 As Asia develops into a clearly demarcated economic region it is confronted by similar export control challenges as those faced in Europe with the advent of the Common Market As such a regional system of export control standards and practices emerged as a means to ensure not only economic parity but regional and international security as well While not necessarily as advanced in terms of regional identity as the European free trade area the states of Asia could benefit profitably from a regional approach to export control development and coordination In addition the states of Asia could also gain from increased export control cooperation with the United States As a global leader in nonproliferation the United States can provide critical assistance to export control development efforts

through training and the allocation of other resources Likewise the United States should focus its export control outreach efforts to the less developed export control systems in Asia especially the transshipment countries **Those Challenging Cracks of Secularism** Oliver O. Nwachukwu, 2014 Lack of religious enthusiasm is a universal nemesis with long ranging effects This work shows how secularism can further deepen dividing lines among people **Complexities and Challenges of Nuclear India** Dr. Roshan Khanijo, 2014-11-01 Four decades have passed since India conducted its first nuclear test Since then the world has undergone a transition both in terms of power dynamics and military warfare The emergence of New Nuclear and Threshold states has transformed the traditional military warfare making it more asymmetric Though the concept of nuclear deterrence in the American strategic thought has diminished but the Asian countries still consider nuclear weapons as an important strategy in combating conventional weaknesses This altered strategic space has created problems in the civilian and the military domains The emergence of economically strong China aiming for military modernization to achieve global reach through precision missiles is making Asia edgy A nuclear Pakistan which is constantly increasing its nuclear stockpile is creating stability instability paradoxes in Asia India which is also emerging as a powerful state needs to approach this dynamic shift in a holistic manner A strategic churning has begun in Asia and whether this will be in India's favour depends on the strategic choices that India adopts China has revolutionized its Second Artillery through a process of Informationalisation and Modernisation and is diversifying the military technology which is having a cascading effect in Asia Pakistan through its nuclear policy of First Use its alleged use of Tactical Nuclear Weapons is making South Asia vulnerable to nuclear terrorism Under such conditions are there any gaps between India's nuclear doctrine and its force structure Can India's nuclear strategy counter China Is India capable of countering a Sino Pak nexus These are a few questions along with others which this book will try to unravel *Worldwide Maritime Challenges, 1997*, 1997 Major Management Challenges and Program Risks, 2001
