Jones Shoemaker PhD, 2015-05-15 Good solid information is hard to get How hard is it for you to come up with ideas to boost learning for children at home Dont be taken in by expensive educational materials and toys that might not be up to date age appropriate or geared toward your childs learning style A childs most important first teacher is the parent With our preschool primary and upper grades programs we involve the parents in the individual educational needs of their child or children Please take some time to review the materials and learn more about simple educational materials and tools that you can use with your children at home to boost their IQ and vocabulary This program only requires a few minutes each day too as often as you would like **Federal Register** , 1980-01-02 Incentive Marketing , 1977 **Technical Report** , 1963 **Indeterminacy, Vagueness, and Truth** Ken Akiba, 2024-10-28 This book shows that the assumption that classical logic is essentially a bivalent i e 2 valued logic a logic of truth and falsity is an incorrect and harmful conception Classical logic is certainly a Boolean logic and the smallest non degenerate Boolean algebra is the 2 element Boolean algebra however there are numerous Boolean algebras that have more than 2 elements such as the 4 8 16 infinite element Boolean algebra and they all work equally well for the semantics of classical logic Contrary to the popular thought there is such a thing as classical or Boolean many valued logic The book applies this logic to solve such philosophical problems as the Fission Problem for personal identity the Sorites Paradox and the Liar Paradox All these problems concern situations that involve indeterminacy or vagueness situations where there seems no fact of the matter that makes the relevant sentences true or false thus requiring truth value gaps between truth and falsity Because of that classical logic has been thought to be an inadequate tool to deal with the problems This book however offers solutions to those problems by retaining classical logic but assigning intermediate Boolean values to the relevant sentences The book is of great value to researchers and graduate students in philosophy especially for those who are interested in the philosophical
