The US Army and the Texas Frontier Economy Thomas T. Smith, 1999 Seventy million dollars in fifty five years From Texas annexation in 1845 until the turn of the twentieth century the U S Army pumped at least that much or more into the economy of the fledgling state a fact that directly challenges the popular heritage of Texas as the state with roots of pioneer capitalism and fervent independence In *The U S Army and the Texas Frontier Economy 1845 1900* Thomas T Smith sheds light on just who bankrolled the evolution of Texas into viable statehood Smith draws on extensive research gathered from both government archives and Texas army posts in order to evaluate the symbiotic relationship between army quartermasters and the economy of the young state Texas was the army's largest and most costly engagement absorbing up to thirty percent of the total operating budget and channeling that currency into the commercial development of its frontier Smith expands on historian Robert Wooster's theory that the military was engaged in an alliance with the political authority in Texas and using documents such as army contracts for freighting foraging and fort leasing he illustrates how federal fiscal activity spurred commercial growth for the citizens of Texas Besides the obvious development of towns on the skirts of military bases and of roads between them the establishment of military spending as a bedrock of the Texas economy and the protector of middle class interests shaped the future of the state's commercial prosperity Writing with exceptional detail and clarity Smith traces the emergence of the army's influence and includes analyses of information on army spending and development such as the introduction of army weather and telegraph services to the state as well as accounts of real estate transactions involving the fort building program Smith also accounts for army failures maintaining that no one was truly prepared for the reality of western expansion As an examination of the complex yet mutually beneficial economic relationship between the nation and the state *The U S Army and the Texas Frontier Economy 1845 1900* is ideal for anyone interested in the early days of the state as well as in U S military and frontier history **Texas Roots** C. Allan Jones, 2005-03-01 In today's Texas with its growing urban populations and big city lifestyles it is worth remembering that in 1850 only 10 percent of

Texans lived in towns with as many as 100 people. The rest of many ethnic and racial groups lived off the land, which was blessedly suited to a profitable variety of crops and livestock and also provided an abundance of wildlife free for the taking. In Texas Roots, C. Allan Jones reminds us that the economic wealth of modern Texas arose from its agricultural heritage: a rich mixture of practices and traditions including Caddo hunting, gathering, gardening, and farming; irrigated agriculture at Spanish missions; Hispanic ranching; slave-based plantations; small-scale farmers and ranchers. Through time, people adapted the agricultural technologies, laws, and customs of New Spain, Mexico, Europe, and the South to their own practical, institutional, and legal needs. The result was a particularly Texan system that would serve as the foundation for the state's economic strength after the Civil War. Texas Roots shines a bright light on our relationship and connection with the land, bringing alive an aspect of the Texas history that contributed immeasurably to the state's identity and prosperity.
