Management Arthur G. Bedeian,1993 **The Skeptical Environmentalist** Bjørn Lomborg,2001-08-30 The Skeptical Environmentalist challenges widely held beliefs that the environmental situation is getting worse and worse The author himself a former member of Greenpeace is critical of the way in which many environmental organisations make selective and misleading use of the scientific evidence Using the best available statistical information from internationally recognised research institutes Bjørn Lomborg systematically examines a range of major environmental problems that feature prominently in headline news across the world His arguments are presented in non technical accessible language and are carefully backed up by over 2500 footnotes allowing readers to check sources for themselves Concluding that there are more reasons for optimism than pessimism Bjørn Lomborg stresses the need for clear headed prioritisation of resources to tackle real not imagined problems The Skeptical Environmentalist offers readers a non partisan stocktaking exercise that serves as a useful corrective to the more alarmist accounts favoured by campaign groups and the media **Applied Machine Learning for**

Assisted Living Zia Uddin, 2022-08-29 User care at home is a matter of great concern since unforeseen circumstances might occur that affect people's well-being. Technologies that assist people in independent living are essential for enhancing care in a cost-effective and reliable manner. Assisted care applications often demand real-time observation of the environment and the resident's activities using an event-driven system. As an emerging area of research and development, it is necessary to explore the approaches of the user care system in the literature to identify current practices for future research directions. Therefore, this book is aimed at a comprehensive review of data sources, e.g., sensors with machine learning for various smart user care systems. To encourage the readers in the field, insights of practical essence of different machine learning algorithms with sensor data, e.g., publicly available datasets, are also discussed. Some code segments are also included to motivate the researchers of the related fields to practically implement the features and machine learning techniques. It is an effort to obtain knowledge of different types of sensor-based user monitoring technologies in home environments. With the aim of adopting these technologies, research works and their outcomes are reported. Besides up-to-date references are included for the user monitoring technologies with the aim of facilitating independent living. Research that is related to the use of user monitoring technologies in assisted living is very widespread but it still consists mostly of limited scale studies. Hence, user monitoring technology is a very promising field, especially for long-term care. However, monitoring of the users for smart assisted technologies should be taken to the next level with more detailed studies that evaluate and demonstrate their potential to contribute to prolonging the independent living of people. The target of this book is to contribute towards that direction.

Globalisation in Transition Umair Gori, Mary Hiscock, Louise Parsons, Casey Watters, 2023-07-01 This book brings together diverse ideas on selected facets of globalisation and transitions in globalisation. The scholars that have contributed to this book examine the phenomenon of globalisation through varied lenses focusing specifically on the human and economic perspectives. These analyses originate in many areas and different legal systems but are all connected through the work of Professor John Farrar and the associations of the contributors with him. This book does not attempt to provide answers to the many challenges of globalisation. Instead, this book discusses selected particular aspects of globalisation that derive from and are connected to the authors' own research. The thematic diversity of this book is a true strength and should draw a broad range of readers. Whilst this book is primarily written from a legal angle, its content overlaps with broader specialised policy areas with contributions ranging from taxation to ageing, from insolvency to social licences and from refugees to the treatment of first nations people. In short, there is something for everyone in this book. As a tribute to the life's work of an outstanding legal scholar, Professor John Farrar, this book explores legal responses to the social and economic impacts of globalisation. After personal acknowledgments from colleagues highlighting the significance of his scholarship, this book is divided into two parts. The first part addresses the social impact of globalisation, focusing on immigration and the impact on First Nations people. Changes in the regulation of medicine and technologies related to ageing are also addressed.

in this part In part two the book addresses the transitioning corporate law landscape and notions of fairness and good faith in the law The final part contains the conclusions reflections and synthesis of the editors Aging in Asia National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Panel on Policy Research and Data Needs to Meet the Challenge of Aging in Asia, 2012-07-31 The population of Asia is growing both larger and older Demographically the most important continent on the world Asia's population currently estimated to be 4.2 billion is expected to increase to about 5.9 billion by 2050 Rapid declines in fertility together with rising life expectancy are altering the age structure of the population so that in 2050 for the first time in history there will be roughly as many people in Asia over the age of 65 as under the age of 15 It is against this backdrop that the Division of Behavioral and Social Research at the U.S. National Institute on Aging NIA asked the National Research Council NRC through the Committee on Population to undertake a project on advancing behavioral and social research on aging in Asia Aging in Asia Findings from New and Emerging Data Initiatives is a peer reviewed collection of papers from China India Indonesia Japan and Thailand that were presented at two conferences organized in conjunction with the Chinese Academy of Sciences Indian National Science Academy Indonesian Academy of Sciences and Science Council of Japan the first conference was hosted by the Chinese Academy of Social Sciences in Beijing and the second conference was hosted by the Indian National Science Academy in New Delhi The papers in the volume highlight the contributions from new and emerging data initiatives in the region and cover subject areas such as economic growth labor markets and consumption family roles and responsibilities and labor markets and consumption **The Limits of the Human Species in the Face of Sustainable Development** Alberto Roghi, 2023-06-16 This book is the product of the author's research into the possible causal links between the COVID 19 epidemic and the ongoing environmental catastrophe The research has confirmed not only the existence of the link but also the strict dependence of the survival of the human species on the radical modification of the current development model The book presents a critical reflection on the limits of our species in the face of climate change and introduces anthropological religious and philosophical issues that offer new tools for understanding and analysing the present and future of humanity
