Arrows To The Moon Avros Engineers And The Space Race:

Arrows to the Moon Chris Gainor, 2001 On 20 February 1959 the Canadian government shut down the CF 105 Avro Arrow jet interceptor programme putting the cream of Canada's aerospace engineering talent out of work. Many of the Avro engineers had just arrived in Canada from Great Britain. A brand new organisation called the National Aeronautics and Space Administration was charged with putting US astronauts into space and in 1959 it desperately needed engineering talent. Within 10 weeks of the demise of the Arrow 25 Avro engineers were working for NASA and another seven joined them later. Other Avro engineers found work with the aerospace contractors that built spacecraft and boosters for NASA. A little more than 10 years later US astronauts were standing on the surface of the Moon in the climax of one of the greatest stories of technology and exploration in human history. This book tells for the first time the story of the Canadian and British engineers from Avro Canada who played key roles in putting Americans on the Moon and in building today's US space programme including the space shuttle and the International Space Station. Also included are other Canadian contributions to Apollo and a chapter on the Canadian space programme. This is the final chapter in one of the most compelling stories in Canada's history. How the demise of Canada's national dream contributes to one of the greatest triumphs in American history.

Arrows to the Moon Chris Gainor, 2001-10-01 Tells the story of the Canadian and British engineers who played key roles in putting Americans on the Moon and in building the United States space program. [The Avro Arrow](#) Lawrence Miller, 2020-07-20 When it first flew in 1957 the Avro Arrow was the world's best supersonic combat aircraft. It was the proudest achievement of the engineers and designers in Canada's world leading aircraft industry. They had already succeeded in building the world's first passenger jet. This book tells the story of building, testing and flying the Arrow. It explores the reasons why the Diefenbaker Conservative government of the day cancelled the contract to build these planes and then ordered the six already finished airplanes cut up and destroyed. **The Avro Arrow: A Picture History** Lawrence

Miller, 2011-10-24 Dramatic images tell the story of the creation and destruction of the best aircraft in the world. **The Avro Arrow New Edition** Lawrence Miller, 2024-09-16 The Avro Arrow was one of the most innovative supersonic aircraft ever designed. This book looks at the history of its creation and the legacy of Canadian innovation that lasts to this day. The Avro Arrow was one of the most innovative supersonic aircraft ever designed but before it could enter service it was ordered destroyed. This book follows its creation, fanfare and destruction. In this new revised edition The Avro Arrow's legacy of Canadian innovation is explored by highlighting the first all Canadian electric car also designed and built by Avro Canada.

In the Shadow of the Moon Francis French, Colin Burgess, 2007-01-01 Tells the story of the exciting and challenging years in space flight with two superpowers engaged in a titanic struggle to land one of their own people on the moon. This book explores the inspirations, ambitions, personalities and experiences of the select few whose driving ambition was to fly to the moon. **NASA's Contributions to Aeronautics: Aerodynamics, structures, propulsion, controls**, 2010 Two

volume collection of case studies on aspects of NACA NASA research by noted engineers airmen historians museum curators journalists and independent scholars Explores various aspects of how NACA NASA research took aeronautics from the subsonic to the hypersonic era publisher description Spacecraft Technology Mark Williamson,2006-02-23 This book covers the development of space technology in the late 1950s and 1960s from the launch of Sputnik 1 in October 1957 to the landing of men on the moon in 1969 The text begins by looking at the challenge of getting into space and the development of the launch of the space launch vehicle and moves on to discussion of unmanned satellites and spaceprobes and the first capsules deployed in Earth orbit and the Apollo missions to the moon **Remembering the space age: Proceedings of the 50th Anniversary Conference** , Proceedings of October 2007 conference sponsored by the NASA History Division and the National Air and Space Museum to commemorate the 50th anniversary of the Sputnik 1 launch in October 1957 and the dawn of the space age *The Birth of NASA* Manfred "Dutch" von Ehrenfried,2016-03-23 This is the story of the work of the original NASA space pioneers men and women who were suddenly organized in 1958 from the then National Advisory Committee on Aeronautics NACA into the Space Task Group A relatively small group they developed the initial mission concept plans and procedures for the U S space program Then they boldly built hardware and facilities to accomplish those missions The group existed only three years before they were transferred to the Manned Spacecraft Center in Houston Texas in 1962 but their organization left a large mark on what would follow Von Ehrenfried s personal experience with the STG at Langley uniquely positions him to describe the way the group was structured and how it reacted to the new demands of a post Sputnik era He artfully analyzes how the growing space program was managed and what techniques enabled it to develop so quickly from an operations perspective The result is a fascinating window into history amply backed up by first person documentation and interviews **The Power of the Space Club** Deganit Paikowsky,2017-07-20 This book analyses the decisions of nations to develop indigenous space programs in order to become a leading world power **Remembering the Space Age** Steven J. Dick,2008 From the Publisher Proceedings of October 2007 conference sponsored by the NASA History Division and the National Air and Space Museum to commemorate the 50th anniversary of the Sputnik 1 launch in October 1957 and the dawn of the space age To a Distant Day Chris Gainor,2020-04-01 Insightful instructive and definitely worth the read Greg Andres Journal of the Royal Astronomical Society of Canada As someone who has been teaching a course on space exploration for many years and has visited most of NASA s space centers I have found plenty of new and valuable material in *To a Distant Day* I recommend the book to all who wish to know more about the conditions people and discoveries between 1890 and 1960 that led to the space age Pangratios Papacosta Physics Today Although the dream of flying is as old as the human imagination the notion of rocketing into space may have originated with Chinese gunpowder experiments during the Middle Ages Rockets as both weapons and entertainment are examined in this engaging history of how human beings acquired the ability to catapult themselves into space Chris Gainor s irresistible narrative

introduces us to pioneers such as Konstantin Tsiolkovsky Robert Goddard and Hermann Oberth who pointed the way to the cosmos by generating the earliest wave of international enthusiasm for space exploration It shows us German engineer Wernher von Braun creating the V 2 the first large rocket which though opening the door to space failed utterly as the wonder weapon it was meant to be From there Gainor follows the space race to the Soviet Union and the United States giving us a close look at the competitive hysteria that led to Sputnik satellites space probes and finally human flight into space in 1961 As much a story of cultural ambition and personal destiny as of scientific progress and technological history To a Distant Day offers a complete and thoroughly compelling account of humanity's determined efforts sometimes poignant sometimes amazing sometimes mad to leave the earth behind

The Conquest of Space Vasil Teigens, Peter Skalfist, Daniel Mikelsten, Although its roots lie in early rocket technologies and the international tensions that followed World War II the space race began after the Soviet launch of Sputnik 1 on October 4 1957 The space race became an important part of the cultural and technological rivalry between the USSR and the United States during the Cold War Modern space exploration is reaching unbelievable areas Mars is the focal point of space exploration In the long term there are tentative plans for manned orbital and landing missions to the Moon and Mars establishing scientific outposts that will then give way to permanent and self sufficient settlements Additional exploration will potentially involve expeditions and settlements on other planets and their moons as well as the establishment of mining and fueling outposts particularly in the asteroid belt Physical exploration outside the solar system will be robotic in the foreseeable future

The Canadian Space Program Andrew B. Godefroy, 2017-05-03 Canada's space efforts from its origins towards the end of the Second World War through to its participation in the ISS today are revealed in full in this complete and carefully researched history Employing recently declassified archives and many never previously used sources author Andrew B Godefroy explains the history of the program through its policy and many fascinating projects He assesses its effectiveness as a major partner in both US and international space programs examines its current national priorities and capabilities and outlines the country's plans for the future Despite being the third nation to launch a satellite into space after the Soviet Union and the United States being a major partner in the US space shuttle program with the iconic Canadarm being an international leader in the development of space robotics and acting as one of the five major partners in the ISS the Canadian Space Program remains one of the least well known national efforts of the space age This book attempts to shed a clearer light on the progress made by the CSA thus far with more ambitious goals ahead Technical information diagrams glossaries a chronology and extensive notes on sources are also included in this volume

First Man James R. Hansen, 2012-11-27 On July 20 1969 the world stood still to watch American astronaut Neil A Armstrong become the first person ever to step on the surface of another heavenly body Upon his return to Earth Armstrong was celebrated for his monumental achievement He was also as NASA historian Hansen reveals in this authorized biography misunderstood Armstrong's accomplishments as an engineer a test pilot and an astronaut have

long been a matter of record but Hansen's access to private documents and unpublished sources and his interviews with more than 125 subjects including more than fifty hours with Armstrong himself yield the first in depth analysis of this elusive reluctant hero

Defence and Discovery Andrew B. Godefroy, 2011-04-01 The Cold War space race between the United States and the Soviet Union is well documented but few are aware of Canada's early activities in this important arena of global power *Defence and Discovery* represents the first comprehensive investigation into the origins development and impact of Canada's space program from 1945 to 1974 Meticulously researched it demonstrates the central role of the military in Canada's early space research illuminating a significant yet understudied period in Canada's growth as a nation

John Houbolt William F. Causey, 2020-03-15 In May 1961 President Kennedy announced that the United States would attempt to land a man on the moon and return him safely to the earth before the end of that decade Yet NASA did not have a specific plan for how to accomplish that goal Over the next fourteen months NASA vigorously debated several options At first the consensus was to send one big rocket with several astronauts to the moon land and explore and then take off and return the astronauts to earth in the same vehicle Another idea involved launching several smaller Saturn V rockets into the earth orbit where a lander would be assembled and fueled before sending the crew to the moon But it was a small group of engineers led by John C Houbolt who came up with the plan that propelled human beings to the moon and back not only safely but faster cheaper and more reliably Houbolt and his colleagues called it lunar orbit rendezvous or LOR At first the LOR idea was ignored then it was criticized and then finally dismissed by many senior NASA officials Nevertheless the group under Houbolt's leadership continued to press the LOR idea arguing that it was the only way to get men to the moon and back by President Kennedy's deadline Houbolt persisted risking his career in the face of overwhelming opposition This is the story of how John Houbolt convinced NASA to adopt the plan that made history

The Avro Arrow Story Bill Zuk, 2011-12-14 These dedicated men and women gave blood sweat and tears as their contribution And now it really happened our beloved bird was in the air Ray Boone A V Roe Canada employee In the 1950s A V Roe Canada was at the forefront of aviation development worldwide After building one of the first jet airliners and completing production of Canada's first jet fighter the company was poised to launch its most revolutionary design the Avro Arrow Despite the efforts of courageous test pilots and some of the world's best designers engineers and technicians the dream was shattered

Militarizing Outer Space Alexander C.T. Geppert, Daniel Brandau, Tilmann Siebeneichner, 2020-12-02 *Militarizing Outer Space* explores the dystopian and destructive dimensions of the Space Age and challenges conventional narratives of a bipolar Cold War rivalry Concentrating on weapons warfare and violence this provocative volume examines real and imagined endeavors of arming the skies and conquering the heavens The third and final volume in the groundbreaking European Astroculture trilogy *Militarizing Outer Space* zooms in on the interplay between security technopolitics and knowledge from the 1920s through the 1980s Often hailed as the site of heavenly utopias and otherworldly salvation outer space transformed from a promised

sanctuary to a present threat where the battles of the future were to be waged Astroculture proved instrumental in fathoming forms and functions of warfare s futures past both on earth and in space The allure of dominating outer space the book shows was neither limited to the early twenty first century nor to current American space force rhetorics
