The Truth Machine Geoffrey C. Bunn,2012-06-01 How do you trap someone in a lie For centuries all manner of truth seekers have used the lie detector In this eye opening book Geoffrey C Bunn unpacks the history of this device and explores the interesting and often surprising connection between technology and popular culture Lie detectors and other truth telling machines are deeply embedded in everyday American life Well known brands such as Isuzu Pepsi Cola and Snapple have advertised their products with the help of the truth machine and the device has also appeared in countless movies and television shows The Charles Lindbergh crime of the century in 1935 first brought lie detectors to the public s attention Since then they have factored into the Anita Hill Clarence Thomas sexual harassment controversy the Oklahoma City and Atlanta Olympics bombings and one of the most infamous criminal cases in modern memory the O J Simpson murder trial The use of the lie detector in these instances brings up many intriguing questions that Bunn addresses How did the lie detector become so important Who uses it How reliable are its results Bunn reveals just how difficult it is to answer this last

question A lie detector expert concluded that O J Simpson was one hundred percent lying in a video recording in which he proclaimed his innocence a tabloid newspaper subjected the same recording to a second round of evaluation which determined Simpson to be absolutely truthful Bunn finds fascinating the lie detector s ability to straddle the realms of serious science and sheer fantasy He examines how the machine emerged as a technology of truth transporting readers back to the obscure origins of criminology itself ultimately concluding that the lie detector owes as much to popular culture as it does to factual science European Polygraph n.7, 2009/1 Jan WIdacki,2009-02-03 A Field Study on the Validity of the Quadri Track Zone Comparison Technique Probability Assessment of the Value of Psychophysiological Stimuli A Renaissance in Voice Analysers as Tools for Detection of Deception Book review Antagonistic polygraph examination Book review Ocena zezna i wyja nie Book review Multi Subject Polygraph Examination ISSN 1898 5238 **European Polygraph 19, 2012/1** Jan WIdacki,2012-01-06 scholarly journal European Polygraph which henceforth will be published quarterly The original version of the journal is the paper edition The home of the polygraph is the United States it was there that the first polygraph was built and first used in practice A substantial portion of the scientific studies fundamental to polygraph research was also conducted in the United States and the results have been published in American scientific and specialist journals Finally the United States host the largest organisation in the world for persons involved in various aspects of polygraph examinations the American Polygraph Association Asia is without a doubt the second continent after America in which the polygraph has entered into permanent practise and is the subject of scientific research Scientific and experimental research on the polygraph analysis of its practical applications and the widespread use of polygraph examinations in Israel and Japan are well known The polygraph is popular in many other Asian countries such as Singapore Malaysia and Taiwan The use of polygraph examinations in Latin America is also known In Europe the polygraph has been used relatively the least or at any rate information on it has been the least well known Further European scientific work on polygraph examinations seems disproportionately meagre compared to European scientific potential Traditionally Western Europe has not been favourably disposed in general toward polygraph examinations Further the work on polygraph examinations conducted in Central and Eastern Europe apart perhaps from Poland and the former Yugoslavia was also not widely known around the world After the unification of Europe made possible with the fall of communism and the end of Soviet domination in the region that took place several years ago it is possible to speak once again about a single European science As it turns out many Central and Eastern European countries have their own though not widely known body of scientific work and practical experience with polygraph examinations The attitude toward polygraph examinations is changing in Western countries as well as evidenced by the increasingly wider use of the polygraph by the Belgian police or the change in attitudes toward the polygraph noted in Germany Our journal was conceived as an international forum upon which to present the achievements and scientific research in polygraph examinations The forum will also serve as a means by which to exchange practical experience from

many countries and publish book reviews of works devoted to the subject The issue of polygraph examinations includes basic research in myriad fields such as psychology psychiatry psychophysiology criminology forensic sciences and in the near future certainly also neurophysiology and others The journal will also deal with approaches and research conducted as part of criminal justice jurisprudence criminal procedure human rights labour law and others It will also contain philosophical and strictly ethical reflections on polygraph examinations Our objective is to publish works on polygraph examinations from this broad spectrum of sciences We will publish both the results of experimental research as well as analyses of practises case studies works on the history of polygraph examinations legal considerations on polygraph examinations and their admissibility in investigations and court cases as well as pre employment and control examinations such as those used in the civil service and in business We will also publish training materials based on practical experience book reviews of works on polygraph examinations and proceedings from conferences and seminars devoted to the subject We invite all of you to co operate in this endeavour Prof Jan Widacki LL D Editor in Chief
