Science of Wound Healing and Dressing Materials Vibhakar Vachhrajani, Payal Khakhkhar, 2019-11-06 This book outlines from a surgeon's standpoint how physicians and mid-level providers working at wound care centres can expeditiously and effectively manage wounds. It comprehensively addresses the concept of wound healing from the healing process to debridement concepts and various antiseptics and local antibiotics used in dressing materials to facilitate healing. The book also discusses the latest inventions and treatment options that have revolutionized wound healing such as oxygen therapy, ozone therapy, hyperbaric oxygen therapy, electric therapy, and ultrasonic wound therapy. In closing, it examines the latest regenerative therapies based on stem cell therapy, cellular therapy, and gene therapy. Given its scope, the book offers a valuable resource for medical students and physicians dealing with wound management as well as a reference guide for nurses in primary and tertiary wound care settings.

Surgery in Wounds Luc Téot, Paul E. Banwell, Ulrich E. Ziegler, 2012-12-06 Wounds have existed since the beginning of

time and records of their nature and treatment are found in the earliest documents Interestingly many of these treatments are now being rediscovered or re used in modern day clinical practice In addition to the diverse nature of treatments that have been suggested as being beneficial for wounds over many centuries there has been a range of clinicians who have cared for patients with wounds and in many parts of the world today it is not doctors but other professional colleagues e g nurses or podiatrists who are the most knowledgeable persons on wounds and wound treatments Finally the nature of wounds seen in clinical practice is changing Increasing destructive power is resulting in more severe injuries occurring in patients involved in conflict Developments in surgical techniques have enabled new surgical procedures to be offered to patients but novel and more severe complications can result from such technical advances In addition many societies around the world are having to deal with an increasing ageing population and huge increases in the number of patients suffering from chronic wounds are being seen In summary expanding treatment options diverse groups of clinicians caring for patients and changes in the nature of wounds seen in clinical practice are real issues that have to be faced and solutions have to be found if patients are to receive optimal care for their wounds
