Hoffecker, 2002 John F Hoffecker provides an overview of Pleistocene or Ice Age settlement in Eastern Europe with a heavy focus on the adaptations of Neanderthals and modern humans to this harsh environmental setting Hoffecker argues

that the Eastern European record reveals a stark contrast between Neanderthals and modern humans with respect to technology and social organization both of which are tied to the development of language and the use of symbols Desolate Landscapes will bring readers up to date with the rich archaeological record in this significant region and its contribution to our understanding of one of our most important events in human evolution the rise of modern humans and the extinction of the Neanderthals      **Evolutionary Linguistics** April McMahon,Robert McMahon,2012-10-11 How did the biological brain and behavioural structures underlying human language evolve This is an introduction to the interdisciplinary debates

Origins of Psychopathology Horacio Fabrega (Jr.),2002 What are the origins of human psychopathology Is mental illness a relatively recent phenomenon or has it been with us throughout evolution In Origins of Psychopathology Horacio F rega Jr employs principles of evolutionary biology to better understand the significance of mental illness He explores whether what psychiatry has categorized as mental disorders could have existed during earlier phases of human evolution F brega approaches the prominent features of mental disorders as adaptive responses to the environment and life s circumstances which in turn can only be understood in the context of our evolutionary past Taking his cue from theoretical issues raised by research into primate behavior and early hominid evolution he poses the question What if any aspects of mental illness are rooted in our evolution Does mental illness occur in primates and other animals and if so what does this tell us about mental illness in human evolution How has mental illness played an adaptive role How has the development of language and higher cognitive functions affected characteristics of psychopathology F brega synthesizes insights from both the clinical and the evolutionary points of view This facet of psychopathology which involves its origins and manifestations viewed across the expanse of human evolution has until now been largely neglected in psychiatric education theory and practice      *The Paleobiology of Australopithecus* Kaye E. Reed,John G Fleagle,Richard E Leakey,2013-03-15 Australopithecus species have been the topic of much debate in palaeoanthropology since Raymond Dart described the first species Australopithecus africanus in 1925 This volume synthesizes the geological and paleontological context of the species in East and South Africa covers individual sites such as Dikika Hadar Sterkfontein and Malapa debates the alpha taxonomy of some of the species and addresses questions regarding the movements of the species across the continent Additional chapters discuss the genus in terms of sexual dimorphism diet reconstruction using microwear and isotopic methodologies postural and locomotor behavior and ontogeny      *People of the Earth* Brian M. Fagan,Nadia Durrani,2015-08-26 Understand major developments of human prehistory People of the Earth An Introduction to World Prehistory 14 e provides an exciting journey though the 7 million year old panorama of humankind s past This internationally renowned text provides the only truly global account of human prehistory from the earliest times through the earliest civilizations Written in an accessible way for beginning students People of the Earth shows how today s diverse humanity developed biologically and culturally over millions of years against a background of constant climatic change      A Natural History of Peace Thomas Gregor,1996 A stimulating and innovative

consideration of the concept causes and practice of peace in societies both ancient and modern human and primate We know a great deal about aggression conflict and war but relatively little about peace partially because it has been such a scarce phenomenon throughout history and in our own times Peace is more than the absence of war Peace requires special relationships structures and attitudes to promote and protect it A Natural History of Peace provides the first broadly interdisciplinary examination of peace as viewed from the perspectives of social anthropology primatology archeology psychology political science and economics Among other notable features this volume offers a major theory concerning the evolution of peace and violence through human history an in depth comparative study of peaceful cultures with the goal of discovering what it is that makes them peaceful one of the earliest reports of a new theory of the organization and collapse of ancient Maya civilization a comparative examination of peace from the perspective of change including the transition of one of the world s most violent societies to a relatively peaceful culture and the decision making process of terrorists who abandon violence and a theory of political change that sees the conclusion of wars as uniquely creative periods in the evolution of peace among modern nations      *Studies in Language Origins* Walburga von Raffler-Engel, Jan Wind, Abraham Jonker, 1991-08-22 The question of language origin has fascinated people for years The contributions in the present book stem primarily from the papers presented at the Third International Meeting of the Language Origins Society LOS held at Vanderbilt University in Nashville Tennessee June 1988 The contributors approach the problem not only from the viewpoint of linguistics but also from that of anatomy physiology social sciences physical anthropology paleoanthropology paleontology comparative zoology general biology ethology evolutionary biology and psychology      **Hunters and Gatherers (Vol I)** Tim Ingold, David Riches, James Woodburn, 2024-11-01 All that is central to the dynamic process in human society is evident in the study of hunter gatherers peoples whose subsistence way of life reflects the original form of human adaptation This is the thesis of these wide ranging volumes in which internationally leading scholars consider hunter gatherer peoples in Africa Asia Australia and North America and reflect theoretically on the hunter gatherer condition Volume 1 Hunters and Gatherers History Evolution and Social Change Volume II Hunters and Gatherers Property Power and Ideology      **Medical History of Mankind** Andrey Nabokov, 2013-05 The book reveals a new look at medicine and Health Care System as a factor that significantly influences the history of mankind as a species Considering the well known facts from a different angle systematically filed material clearly and simply traced the history of mankind from a medical point of view It turns out that the medical profession had great influence on the destiny of mankind creating additional opportunities for those populations where medicine has evolved Thus the future of many countries will directly depend on the quality of the health system The book will be of interest to all who are thinking about the future of medicine experienced physicians policy makers and healthcare managers and medical students      *Figments of Reality* Ian Stewart, Jack Cohen, 1997 Popular science tour de force from bestselling authors on evolution of intelligence culture and mind      Archaeology: The Key Concepts Colin

Thompson, François Tonneau, 2013-06-29 The relations between behavior evolution and culture have been a subject of vigorous debate since the publication of Darwin's *The Descent of Man* 1871 The latest volume of *Perspectives in Ethology* brings anthropologists ethologists psychologists and evolutionary theorists together to reexamine this important

relation With two exceptions the essays by Brown and Eldredge all of the present essays were originally presented at the Fifth Biannual Symposium on the Science of Behavior held in Guadalajara Mexico in February 1998 The volume opens with the problem of the origins of culture tackled from two different viewpoints by Richerson and Boyd and Lancaster Kaplan Hill and Hurtado respectively Richerson and Boyd analyze the possible relations between climatic change in the Pleistocene and the evolution of social learning evaluating the boundary conditions under which social learning could increase fitness and contribute to culture Lancaster Kaplan Hill and Hurtado examine how a shift in the diet of the genus Homo toward difficult to acquire food could have determined or coevolved with unique features of the human life cycle These two essays illustrate how techniques that range from computer modeling to comparative behavioral analysis and that make use of a wide range of data can be used for drawing inferences about past selection pressures As culture evolves it must somehow find its place within and also affect a complex hierarchy of behavioral and biological factors

*Society in Prehistory* Tim Megarry, 1995-12

Reveals a profound understanding of evolutionary biology and an excellent up to date knowledge of human evolution studies It is not only very well done but it is written from a novel point of view It needs to be very widely read and I hope that it will be Megarry is doing his subject a great service Bernard Campbell University of California Social scientists have tended to neglect prehistory in their approach to human societies Tim Megarry's lucid and authoritative book remedies this neglect It will be of great value to students of anthropology psychology and sociology Paul Hirst Birkbeck College University of London
