The Intrinsic Value of Nature Leena Vilkkä, 1997

What is intrinsic value What is the origin of value Are people always superior to nature This book is a philosophical analysis of the human relationship to the non human world It is a pioneering study of the philosophy of nature conservation in relation to the discussion of intrinsic value Vilkkä develops a naturalistic or naturocentric theory of value that is based on ethical extensionism and pluralism Vilkkä analyzes natural values and environmental attitudes zoocentrism biocentrism and ecocentrism This book forms a taxonomy for nature having intrinsic value The theory of intrinsic value is based on naturocentric and naturogenic values The book questions the thesis of weak anthropocentrism that denies the existence of naturogenic values In Vilkkä's theory animals and nature are the origin of value She defends the existence of zoogenic and biogenic values in the non human world and discusses the possibility of ecogenic value nature as a whole having value independent of human or animal minds Vilkkä analyzes the goodness and rights of nature the problem of priorities and ecological humanism A naturocentric recommendation is that the well being of animals and nature should have priority over human values at least in some real decision contexts Ecological humanism recommends an attitude of respect for people animals and nature The book includes an extensive glossary index and bibliography

The Nature of Order, Book One: The Phenomenon of Life Christopher Alexander, 2020-03-30 Christopher Alexander's series of ground breaking books including *A Pattern Language* and *The Timeless Way of Building* have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns Now in *The Nature of Order* Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities In *The Phenomenon of Life* the first volume in this four volume masterwork Alexander proposes a scientific view of the world in which all space matter has perceptible degrees

of life and sets this understanding of order as an intellectual basis for a new architecture With this view as a foundation we can ask precise questions about what must be done to create more life in our world whether in a room a humble doorknob a neighbourhood or even in a vast region He introduces the concept of living structure basing it upon his theories of centers and of wholeness and defines the fifteen properties from which according to his observations all wholeness is built Alexander argues that living structure is at once both personal and structural Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart A step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united

The Earth Care Manual Patrick Whitefield, 2004 The long awaited exploration of permaculture specifically for cooler Northern Hemisphere climates is finally here Already regarded as the definitive book on the subject The Earth Care Manual is accessible to the curious novice as much as it is essential for the knowledgeable practitioner Permaculture started out in the 1970s as a sustainable alternative to modern agriculture taking its inspiration from natural ecosystems It has always placed an emphasis on gardening but since then it has expanded to include many other aspects from community design to energy use It can be seen as an overall framework that puts a diversity of green ideas into perspective Its aims are low work high output and genuine sustainability

On Intersubjectivity and Cultural Creativity Martin Buber,1992-10 One of the foremost religious and social philosophers of the twentieth century Martin Buber also wrote extensively on sociological subjects particularly as these affected his philosophical concerns Collected here these writings offer essential insights into the human condition as it is expressed in culture and society Buber s central focus in his sociological work is the relation between social interaction or intersubjectivity and the process of human creativity Specifically Buber seeks to define the nature and conditions of creativity the conditions of authentic intersubjective social relations that nurture creativity in society and culture He attempts to identify situations favorable to creativity that he believes exist to some extent in all cultures though their fullest development occurs only rarely Buber considers the combination of open dialogue between human and human and a dialogue between man and God to be necessary for the crystallization of the common discourse that is essential for holding a free just and open society together Important for an understanding of Buber s thought these writings touching on education religion the state and charismatic leadership will be of profound value to students of sociology philosophy and religion **Select Cases and Other Authorities on the Law of Property** John Chipman Gray,1891 **ICEMSS 2018** Poppy Febriana,Mochammad Tanzil Multazam ,Fika Megawati,Robbi Rahim,2019-03-01 New media and development of gender roles law social and economic perspective This theme was raised as an effort to observe the development of new technology that has greatly affected people s lives Formerly to seek information people can get it through conventional radio media newspapers and television But now only use the smartphone we can get very much information that can be obtained by accessing the online media portal or sharing and socializing through social media For decades it has been stated that the media has the power to shape public opinion Media not only can form a worldview of society but also able to create awareness and individual belief in reality a reality that has been defined by the media Media has a powerful and direct effect to the audience market Including how then the media formed an opinion in the community about gender roles through the content provided by the new media Of course it will be interesting to study media related to the law social and economic perspective Hegel's Transcendental Induction Peter Simpson,1997-12-18 Hegel s Transcendental Induction challenges the orthodox account of Hegelian phenomenology as a hyper rationalism arguing that Hegel s insistence on the primacy of experience in the development of scientific knowledge amounts to a kind of empiricism or inductive epistemology While the inductive element does not exclude an emphasis on deductive demonstration as well Hegel s phenomenological description of knowledge demonstrates why knowing becomes scientific only to the extent that it recognizes its dependence on experience Simpson s argument closely parallels Hegel s own in the Phenomenology of Spirit highlighting those sections like Hegel s analysis of mastery and slavery that contribute to the argument that knowing is both vulnerable and responsive to the way in which experience resists our attempts to make sense of things Simpson s argument connects his account of Hegelian

phenomenology with traditional accounts of induction and with a number of other commentators

The Ethics of Health Care Rationing: An Introduction Greg Bogner, Iwao Hirose, 2014-06-05 Should organ transplants be given to patients who have waited the longest or need it most urgently or those whose survival prospects are the best The rationing of health care is universal and inevitable taking place in poor and affluent countries in publicly funded and private health care systems Someone must budget for as well as dispense health care whilst aging populations severely stretch the availability of resources The Ethics of Health Care Rationing is a clear and much needed introduction to this increasingly important topic considering and assessing the major ethical problems and dilemmas about the allocation scarcity and rationing of health care Beginning with a helpful overview of why rationing is an ethical problem the authors examine the following key topics What is the value of health How can it be measured What does it mean that a treatment is good value for money What sort of distributive principles utilitarian egalitarian or prioritarian should we rely on when thinking about health care rationing Does rationing health care unfairly discriminate against the elderly and people with disabilities Should patients be held responsible for their health Why does the debate on responsibility for health lead to issues about socioeconomic status and social inequality Throughout the book examples from the US UK and other countries are used to illustrate the ethical issues at stake Additional features such as chapter summaries annotated further reading and discussion questions make this an ideal starting point for students new to the subject not only in philosophy but also in closely related fields such as politics health economics public health medicine nursing and social work
