Case studies present patients' medication history, enabling students to learn about the disease process from the point of medication use, an approach used in actual clinical practice. Other features include a review of key terms, home and intensive care scenarios, and a list of variables that must be considered in order to conduct an appropriate case analysis. Also present are a series of questions that will help guide students in developing effective ways to handle the scenario. Perfect for individual or group use, Pharmacology Case Studies is a valuable tool to help prepare nursing students for clinical practice. *Handbook of Conceptualization and Treatment of Child Psychopathology* Helen Orvaschel, Jan Faust, Michel Hersen, 2001-12-06 This handbook examines and illustrates the integration of conceptualization and treatment of child and adolescent psychopathology. The inspiration for this book arose largely from the teaching experiences of the editors, who found that while many students as well as experienced clinicians have knowledge in several theoretical domains and familiarity with a variety of interventions, significant numbers had difficulty linking the two.
