The Look of Van Dyck

John Peacock, 2017-07-05

Based on a close study of Van Dyck's Self portrait with a Sunflower, this book examines the picture's context in the symbolic discourses of the period and in the artist's oeuvre. The portrait is interpreted as a programmatic statement made in the ambience of the Caroline court after Van Dyck's appointment as Principal Painter in Ordinary. His view of the art of painting, this statement formulated in appropriately visual terms, characterizes painting as a way of looking and seeing, a mode of vision. In making such a claim, the artist steps aside from the familiar debate about whether painting was a manual or an intellectual discipline and moves beyond any idea of it as simply a means of representing the external world: the painter's definitive faculty of vision can reach further than those realities which present themselves to the eye. John Peacock analyses the motif of looking, the ways in which figures regard or disregard each other throughout Van Dyck's work, and the images of the sunflower and the gold chain in this particular portrait to reveal what is essentially an idealist conception of pictorial art. He contradicts previous opinions that the artist was pedestrian in his thinking by showing him to be familiar with a range of ideas current in contemporary Europe about painting and the role of the painter.

Anthony Van Dyck: Selected Drawings Marwin Hurn, 2017-07-24

Sir Anthony van Dyck (1599–1641) was a Flemish Baroque artist who became the leading court painter in England after enjoying great success in Italy and Flanders. He is most famous for his portraits of Charles I of England and his family, and court portraits painted with a relaxed elegance that was to be the dominant influence on English portrait painting for the next 150 years. He also painted biblical and mythological subjects, displayed outstanding facility as a draughtsman, and was an important innovator in watercolor and etching. The Van Dyke beard is named after him. Probably during his period in Antwerp, after his return from Italy, van Dyck began his iconography, eventually a very large series of prints with half-length portraits of eminent contemporaries. Van Dyck produced drawings, and for eighteen of the portraits he himself etched with great brilliance the heads and the main outlines of the figure for an engraver to work up. Portrait etching had scarcely had an existence before his time, and in his work it suddenly appears at the highest point ever reached in the art. However, for most of the series he left the whole printmaking work to specialists who mostly engraved everything after his drawings. His own etched plates appear not to have been published commercially until after his death, and early states are very rare. Most of his plates were printed after only his work had been

done some exist in further states after engraving had been added sometimes obscuring his etching He continued to add to the series until at least his departure for England and presumably added Inigo Jones whilst in London The series was a great success but was his only venture into printmaking portraiture probably paid better and he was constantly in demand At his death there were eighty plates by others of which fifty two were of artists as well as his own eighteen The plates were bought by a publisher with the plates reworked periodically as they wore out they continued to be printed for centuries and the series added to so that it reached over two hundred portraits by the late 18th century *Anthony Van Dyck* Robin
