Anthropological Theory Today:

Anthropological Theory Today Henrietta L. Moore, 2000-01-12 This important book makes a bold statement about the nature and value of anthropological theory at the beginning of the 21st century

Neo Anthropological Theory Gaya Pandey, 2017-01-01 The book *Neo Anthropological Theory* presents the contributions of those great anthropological thinkers who have propounded their theories after Second World War particularly from 1950 onwards About the contributions of great classical anthropological thinkers we have sufficient books But about the contributions of great neo anthropological thinkers we have few books having expressions in foreign English language They lack Indian expressions As a result Indian students and scholars of anthropology are facing a great problem because they do not find reading materials on neo anthropological theory sufficiently and systematically under one cover The sole purpose of the book is to purely contextual written with a view to provide contributions of neo anthropological thinkers under one cover systematically in simple English language with Indian expression The book consists of contributions of neo anthropological thinkers in the following areas Neo evolutionism Cultural ecology and Neo cultural ecology Cultural materialism Neo Psychological anthropology Structuralism Biologised anthropology Cognitive anthropology Symbolic anthropology Interpretive anthropology Critical anthropology Modernism Post modernism Industrialism and post industrialism Globalisation Legacy of two Great thinkers in anthropology Karl Marx

Anthropological Theory Robert Alan Manners, David Kaplan, Anthropological theory has been much discussed in recent years yet the crucial questions still remain how can it be defined how is it developed how is it to be applied and how can one confirm it The editors of *Anthropological Theory* answer these questions by presenting essays relating to various aspects of anthropological theory Their selections from widely scattered and often difficult to obtain sources present a comprehensive set of writings that describe the current position and issues involved in theory The development of field work in anthropology generated a tremendous emphasis on empirical data and research The plethora of information awaiting collection and the enthusiasm with which the field embraced it so immersed anthropologists that they were unable to relate this new information to the field as a whole Manners and Kaplan believe that this lack of generalization had a profoundly negative effect upon the discipline Therefore they look closely into the relationship between field work and theory in an opening essay and go on to present material that demonstrates the value and the necessity of theory in anthropology Essays by anthropologists and other social scientists deal with explanation evolution ecology ideology structuralism and a number of other issues reflecting throughout the editors conviction that anthropology is a science the goal of which is to produce generalizations about sociocultural phenomena The book provides necessary perspective for examining and evaluating the crucial intellectual concerns of modern anthropology and will therefore be important for the work of every anthropologist Robert A Manners 1913 1996 received his Ph D from Columbia University and carried on field work in the Caribbean among American Indians in the Southwest and in East Africa He wrote numerous articles and reviews

for anthropological journals as well as many books He was professor of anthropology Brandeis University where he started up the department David Kaplan is professor emeritus of anthropology at Brandeis University He has contributed articles and reviews to various journals He has also done field work in Mexico and his areas of specialty include economic anthropology method and theory and peasant culture of Mesoamerica

Anthropological Explorations in Queer Theory Mark Graham,2016-04-15 Anthropological Explorations in Queer Theory offers a wide ranging fusion of queer theory with anthropological theory shifting away from the discussion of gender categories and identities that

have often constituted a central concern of queer theory and instead exploring the queer elements of contexts in which they are not normally apparent Engaging with a number of apparently non sexual topics including embodiment and fieldwork regimes of value gifts and commodities diversity discourses biological essentialisms intersectionality the philosophy of Bergson and Deleuze and the representation of heterosexuality in popular culture this book moves to discuss central concerns of contemporary anthropology drawing on both the latest anthropological research as well as classic theories In broadening the field of queer anthropology and opening queer theory to a number of new themes both empirical and theoretical Anthropological Explorations in Queer Theory will appeal not only to anthropologists and queer theorists but also to geographers and sociologists concerned with questions of ontology materiality and gender and sexuality Readings for a History of Anthropological Theory, Fifth Edition Liam D. Murphy, 2017-01-01 The fifth edition of this bestselling reader builds a strong foundation in both classical and contemporary theory with a sharpened focus on gender and anthropology and the anthropology of new media and technology Short introductions and key terms accompany every reading and light annotations have been added to aid students in reading original articles Used on its own or together with A History of Anthropological Theory Fifth Edition this anthology offers a flexible and unrivalled introduction to anthropological theory that reflects not only the history but also the changing nature of the discipline today *Engaging Anthropological Theory* Mark Moberg, 2024-09-30 The updated third edition of this book critically reconsiders the history of anthropological theory Covering key concepts and theorists in a lively style Engaging Anthropological Theory examines the historical context of anthropological ideas and the contested nature of anthropology itself The book illustrates how anthropological ideas about human diversity are rooted in historical conditions including the West's relationship with colonized societies and the politics of scholarly inquiry itself Exploring anthropological ideas in context helps students understand how they evolved and how they relate to society and history This new edition pays close attention to non canonical figures and scholars of color whose contributions are too often bypassed in disciplinary histories Students and instructors will also appreciate the open ended review questions for each chapter that stimulate critical thought and discussion Extensively illustrated throughout this engaging text moves away from the dry recitation of past viewpoints in anthropology and shows their continued relevance to modern life **Situating Fertility** Susan Greenhalgh, 1995-07-13 This collection addresses the world wide pattern of falling birth rates Fertility has commonly been treated from a specialized demographic perspective but there is today widespread dissatisfaction with conventional demographic approaches which are criticized for neglecting the cultural social and political forces that affect reproductive behavior For their part anthropologists have only recently begun to apply their characteristic approaches to the study of reproduction Drawing on new ethnographic and historical research and on a variety of theoretical approaches the contributors to this book indicate some of the ways in which demography might take into account historical processes political forces and cultural conceptions *Readings for a History of Anthropological Theory, Fifth Edition* Paul A.

Erickson, Liam D. Murphy, 2016-10-19 The fifth edition of this bestselling reader builds a strong foundation in both classical and contemporary theory with a sharpened focus on gender and anthropology and the anthropology of new media and technology Short introductions and key terms accompany every reading and light annotations have been added to aid students in reading original articles Used on its own or together with *A History of Anthropological Theory Fifth Edition* this anthology offers a flexible and unrivalled introduction to anthropological theory that reflects not only the history but also the changing nature of the discipline today

We Are Playing Football Will Rollason, 2010-10-12 Sport is an important part of the lives of rural Papua New Guineans and a significant connection to global imaginaries for economically marginal villagers Such grassroots sport however is rarely studied and has never previously been the subject of an ethnographic monograph This book represents a pioneering study of the history and effects of grassroots sport in Papua New Guinea *We Are Playing Football* explores Panapompom people's attempts to recreate the international game and the social and subjective effects of this effort From a raw ethnographic starting point the book moves through historical and interpretive materials exploring the motives methods and results of Panapompom people's work to recreate global images of football and to turn them to their own political ends As the argument proceeds we see how playing football implicates Panapompom people in circuits of domination power and humiliation that tether them to colonial modes of control and derogatory racialist identities which they themselves reproduce in their communities From its effects on the most intimate self understanding through the embodied experience of playing football to the details of colonial history and the values and ideas underpinning community life this book offers an original and challenging assessment of what it means to be globalised It charts the new outlooks and imaginaries the disruptions failures and disappointments and above all the vital synergies between different people that define the global situation of Panapompom people

A Fallibilist Social Methodology for Today's Institutional Problems John Wettersten, 2021-12-13 This book identifies and explains far ranging consequences for methodology as a consequence of the observation that all rationality is social and highlights the need for methodological reforms in publications and interactions among colleagues and research programs The idea that all rationality is social needs to be part and parcel of all social scientific theories which means that their content must be changed Sociology needs to study the impact of social rules economics must revise assumptions about how individual rationality impacts financial developments and cognitive psychology must include social dimensions In addition there is also a need for moral theories that explain how social standards of behavior can be improved in specific institutional contexts

A History of Anthropology Thomas Hylland Eriksen, Finn Sivert Nielsen, 2013-05-10 This is a thoroughly updated and revised edition of a popular classic of modern anthropology The authors provide summaries of Enlightenment Romantic and Victorian anthropology from the cultural theories of Morgan and Taylor to the often neglected contributions of German scholars The ambiguous relationship between anthropology and national cultures is also considered The book provides an unparalleled account of theoretical developments

in anthropology from the 1920s to the present including functionalism structuralism hermeneutics neo Marxism and discourse analysis There are brief biographies of major anthropologists and coverage of key debates including totemism kinship and globalisation This essential text on anthropology is highly engaging authoritative and suitable for students at all levels Philosophy and Anthropology Ananta Kumar Giri, John Clammer, 2013-12-15 Philosophy and anthropology have many but largely unexplored links and interrelationships Historically they have informed each other in subtle ways This volume of original essays explores and enhances this relationship through anthropological engagement with philosophy and vice versa the nature sources and history of philosophical anthropology phenomenology and the practical methodological and theoretical implications of a dialogue between the two subjects Philosophy and Anthropology Border Crossings and Transformations seeks to enrich both the humanities and the social sciences through its informative and stimulating essays

The Ethics of Participation in Environmental Field Research Lydia Gibson, Julia Sauma, 2025-07-28 Local participation is increasingly seen as a central and ethical part of environmental research As such many environmental efforts are becoming increasingly participatory Participation as a string of literature has shown has many political economic social and epistemic consequences and ethics is fluid polyvalent and contextual Right is right wrong is wrong is dangerous rhetoric that centres western experiences and forecloses the myriad realities and relations bundled within and forced upon marginalised experiences Both participation and ethics as concepts and praxis cast decades long shadows over field research particularly in anthropology yet much of these discussions are left at the threshold of interdisciplinary spaces where participation traditional and Indigenous knowledge and co production are brought in to sanitise and legitimise environmental actions Where are our lessons learned and what ought we to make of their absence The first half of this volume offers ethnographic examples that allow us to begin to ask whether participation in the capitalist machinery and colonial legacies of academic knowledge is ever even ethical The second half of the book is dedicated to anti solutions refusals to define problems and approaches in fixed closed terms from which equations calculations and solutions can be derived This book provokes important new discussions about ethical participation in environmental field research by bringing to the fore the fluid nature of both ethics and participation The volume aims to provide critical intervention for students and researchers across natural and social sciences whose fieldwork includes engagement with local communities and stakeholders as well as conservation policymakers and practitioners who consult and work with local communities Encyclopedia of Social and Cultural Anthropology Alan Barnard, Jonathan Spencer, 2009-12-04 Written by leading scholars in the field this comprehensive and readable resource gives anthropology students a unique guide to the ideas arguments and history of the discipline The fully revised and expanded second edition reflects major changes in anthropology in the past decade
