Anthropology Of Space:

Anthropology of Space and Place Setha M. Low, Denise Lawrence-Zúñiga, 2003-02-04 Over the last two decades anthropologists have drawn on insights from ethnographic inquiry to challenge accepted definitions and ideas of space and place Their efforts have led to an understanding that both the conceptual and material dimensions of space as well as of built forms and landscape characteristics are central to the production and reproduction of social life The Anthropology of Space and Place Locating Culture is an unprecedented collection of key articles presented explicitly for students and researchers in anthropology environmental psychology sociology architecture geography and urban planning The volume includes an introduction that synthesizes existing literature highlights core issues and maps potential directions for future research

The Anthropology of Space and Place Setha M. Low, Denise Lawrence-Zúñiga, 2003 *Principles of Space Anthropology* Cameron M. Smith, 2019-09-16 This book shows how anthropology can provide an innovative perspective on the human movement into space It examines adaptation to space on timescales of generations rather than merely months or years and uses evolutionary adaptation as a guiding theme Employing the lessons of evolutionary adaptation Principles of Extraterrestrial Anthropology recommends evolutionarily sound strategies of space settlement covering genetics at the organismal and population levels The author organizes the concept of cultural adaptation to environments beyond Earth according to observed patterns in human adaptation on Earth He uses original artwork and tables to help convey complex information in a form accessible to undergraduate and graduate students Though primarily written to engage students interested in space settlement and exploration who will eventually build a full anthropology of space settlement Principles of Extraterrestrial Anthropology is engaging to anthropologists across sub disciplines as well as scholars interested in the human dimensions of space exploration and settlement Just as the term exobiology was invented only a few decades ago to shape the field of space life studies exoanthropology is outlined to assist in the perpetuation of Earth life through human space settlement *At Home* Irene Cieraad, 2021-10-28 In a volume that brings together a wide range of disciplines art history sociology architecture cultural anthropology and environmental psychology Irene Cieraad presents a collection of articles that focuses on the practices and symbolism of domestic space in Western society These essays go beyond the discussion of conventional issues such as aesthetics and social standing At Home takes an in depth anthropological look at how different cultures use their homes as a visual model of the culture s social structure **Spatializing Culture** Setha Low, 2016-08-12 This book demonstrates the value of ethnographic theory and methods in understanding space and place and considers how ethnographically based spatial analyses can yield insight into prejudices inequalities and social exclusion as well as offering people the means for understanding the places where they live work shop and socialize In developing the concept of spatializing culture Setha Low draws on over twenty years of research to examine social production social construction embodied discursive emotive and affective as well as translocal approaches A global range of fieldwork

examples are employed throughout the text to highlight not just the theoretical development of the idea of spatializing culture but how it can be used in undertaking ethnographies of space and place The volume will be valuable for students and scholars from a number of disciplines who are interested in the study of culture through the lens of space and place

Applied Anthropology Sheena Nahm, Cortney Hughes Rinker, 2015-10-16 This collection brings together recent innovative work in applied and practicing anthropology Organised around the theme of unexpectedness it examines some of the novel spaces topics and methods that anthropologists are involved with The volume emphasises non traditional settings and demonstrates the important role of anthropology in addressing some of the pressing issues facing society today The contributors offer detailed ethnographic examples from their own research and work that give students valuable insight and advice Drawn mainly from the United States the case studies illustrate the diverse arenas in which anthropologists operate from law and finance to education and health care Simultaneous consideration is given to practical applications theoretical reflections and professional experiences

Anthropology, Space, and Geographic Information Systems Mark S. Aldenderfer, 1996 Among the projects described here are studies of land degradation in the Peruvian Amazon settlement patterns in the Pacific northwest ethnic distribution within the Los Angeles garment industry and prehistoric sociopolitical development among the Anasazi Following an introduction that discusses the theory of geographic information systems in relation to anthropological inquiry the book is divided into sections demonstrating actual applications in cultural anthropology archaeology opaleoanthropology and physical anthropology

Anthropology, Space, and Geographic Information Systems Mark Aldenderfer, Herbert D. G. Maschner, 1996-07-18 Major advances in the use of geographic information systems have been made in both anthropology and archaeology Yet there are few published discussions of these new applications and their use in solving complex problems This book explores these techniques showing how they have been successfully deployed to pursue research previously considered too difficult or impossible to undertake Among the projects described here are studies of land degradation in the Peruvian Amazon settlement patterns in the Pacific northwest ethnic distribution within the Los Angeles garment industry and prehistoric sociopolitical development among the Anasazi Following an introduction that discusses the theory of geographic information systems in relation to anthropological inquiry the book is divided into sections demonstrating actual applications in cultural anthropology archaeology paleoanthropology and physical anthropology The work will be of much interest within all these communities

Leisure and Liberty in North America Pierre Lagayette, 2008 Depuis Aristote le loisir est un temps libre c est dire propice la r flexion ou la m ditation ce que les Grecs consid raient comme le bien supr me de notre existence Le loisir pour des hommes libres c est l occasion de penser leur libert de choisir la mani re dont il vont assurer le progr s de leur connaissances y compris la connaissance de soi alors m me qu ils sont d barrass s des contraintes de la n cessit le travail et la r ussite sociale Au fil du temps se sont greff es celle de loisir les notions de jeu d amusement ou de r cr ation La libert devient ludique dans ce contexte et l amusement l expression

d'une libre pratique de la vie en société. Autrefois réservée à une élite, le loisir a fini par s'insinuer dans l'ordre social particulièrement en Amérique du Nord où il voulait être plus galitaire et au cours des siècles il s'est imposé comme l'un des pivots principaux de l'American Way of Life. Mais aux idées originelles est venue subrepticement se substituer la logique du gain et de la réussite individuelle. À ceux qui penseraient encore le loisir comme un moyen d'évasion culturelle, l'instrumentalisation des loisirs dans une économie dominée par le profit dément cette idée. Qu'il s'agisse de tourisme, de voyages, de parcs d'attraction ou plus simplement de cinéma ou de gastronomie, tout est prêt à exalter la valeur financière du loisir par ses valeurs esthétiques ou morales. Transformé en simple bien de consommation, le loisir ne cesse d'interroger les questions d'environnement, d'identité ethnique ou de genre. À cet égard, peut-on encore le considérer comme un facteur de libération sociale ou culturelle ? Crée-t-il les conditions favorables à la mise en œuvre d'un niveau de liberté individuelle ou collective plus élevé ? Il reste que le loisir, malgré ses dérives consuméristes, n'en tient pas moins une place grandissante dans l'identité des peuples et dans le flux planétaire des cultures. À ce titre, il nous est aussi vital que le travail dont il est l'inévitable complément. **An**

Anthropology of Learning Cathrine Hasse, 2014-12-05 This book has one explicit purpose to present a new theory of cultural learning in organisations which combines practice based learning with cultural models a cognitive anthropological schema theory of taken for granted connections tied to the everyday meaningful use of artefacts The understanding of culture as emerging in a process of learning open up for new understandings which is useful for researchers practitioners and students interested in dynamic studies of culture and cultural studies of organisations The new approach goes beyond culture as a static essentialist entity and open for our possibility to learn in organisations across national cultures across ethnicity and across the apparently insurmountable local educational differences which makes it difficult for people to communicate working together in an increasingly globalized world The empirical examples are mainly drawn from organisations of education and science which are melting pots of cultural encounters **The Anthropology of Landscape**, 2023 This volume offers anthropological perspectives on landscape a topic of emerging interest for anthropologists geographers art historians and archaeologists It proposes that landscape be conceptualized as a cultural process situated between place and space **Spatial Anthropology** Les Roberts, 2018-06-20 Spatial Anthropology draws together a number of interrelated strands of research focused on landscape place and cultural memory in the north west of England At the core of the book lies an engagement with the methodological opportunities offered by new interdisciplinary frameworks of research and practice that have emerged in the wake of a putative spatial turn in arts and humanities scholarship in recent years The spatial methods explored in the book represent a consolidation of site specific interventions enacted in landscapes located in the north west and beyond Utilising digital tools and geospatial technologies alongside ethnographic performative and autoethnographic modes of spatio cultural analysis spatial anthropology is presented as a geographically immersive and critically reflexive set of practices designed to explore the embodied and increasingly multi faceted spatialities of place

mobility and memory From the radically placeless environment of a motorway traffic island to the affective archipelago of former cinema sites or the songlines and micro geographies of musical memory Spatial Anthropology offers a rich tapestry of landscapes practices and spatial stories that speaks to both the particularities of place and locality as well as the more delocalised topographies of regional national and global mobility Anthropology Christoph Wulf,2013-04-08 Originally published in German Christoph Wulf's Anthropology sets its sights on a topic as ambitious as its title suggests anthropology itself Arguing for an interdisciplinary and intercultural approach to anthropology that incorporates science philosophy history and many other disciplines Wulf examines with breathtaking scope all the ways that anthropology has been understood and practiced around the globe and through the years Seeking a central way to understand anthropology in the midst of many different approaches to the discipline Wulf concentrates on the human body An emblem of society culture and time the body is also the result of many mimetic processes the active acquisition of cultural knowledge By examining the role of the body in the performance of rituals gestures language and other forms of imagination he offers a bold new look at how culture is produced handed down and transformed Drawing such examinations into a comprehensive and sophisticated assessment of the discipline as a whole Anthropology looks squarely at the mystery of humankind and the ways we have attempted to understand it The Anthropology of the Enlightenment Larry Wolff,Marco Cipolloni,2007-09-04 The modern enterprise of anthropology with all of its important implications for cross cultural perceptions perspectives and self consciousness emerged from the eighteenth century intellectual context of the Enlightenment If the Renaissance discovered perspective in art it was the Enlightenment that articulated and explored the problem of perspective in viewing history culture and society If the Renaissance was the age of oceanic discovery most dramatically the discovery of the New World of America the critical reflections of the Enlightenment brought about an intellectual rediscovery of the New World and thus laid the foundations for modern anthropology The contributions that constitute this book present the multiple anthropological facets of the Enlightenment and suggest that the character of its intellectual engagements acknowledging global diversity interpreting human societies and bridging cultural difference must be understood as a whole to be fundamentally anthropological

Locating the Field Simon Coleman,Peter Collins,2006-01-01 Are reports of the death of conventional fieldwork in anthropology greatly exaggerated This book takes a critical look at the latest developments and key issues in fieldwork The nature of locality itself is problematic for both research subjects and fieldworkers on the grounds that it now must be maintained and represented in relation to widening and fragmenting social frames and networks Such developments have raised questions concerning the nature of ethnographic presence and scales of comparison From the social space of a cybercaf to cities in India the UK and South Africa among others this book features a wide range of ethnographic studies that provide new ways of looking at the concepts of locality and site **Contextual Identities** Leo Loveday,Emilia Parpală,2015-09-18 By bringing the concepts of identity comparativism and communication together this volume invites a

reinterpretation of these defining concepts of postmodernism Composed of contributions from Australia Azerbaijan Japan Romania and the Ukraine this interdisciplinary and intercultural book investigates the multiple identities activated in broader discursive contexts This collection of nineteen chapters opens with an introductory overview followed by two parts the first focusing on Plural identities and comparativism contains a series of case studies that can be subsumed within imagology and comparativism the second Communication and discourse illustrates two directions of research literary communication and terminology In spite of the methodological and thematic polyphony of its contributions the volume adopts a unified and coherent tone By integrating the study of contextual and discursive identities this book will be of interest to all those involved in image and literary studies in both linguistics and culture *Journal of Anthropology* ,1871 Nomadic and Indigenous Spaces Judith Miggelbrink,Joachim Otto Habeck,Nuccio Mazzullo,Peter Koch,2016-05-06 This volume is devoted to aspects of space that have thus far been largely unexplored How space is perceived and cognised has been discussed from different stances but there are few analyses of nomadic approaches to spatiality Nor is there a sufficient number of studies on indigenous interpretations of space despite the importance of territory and place in definitions of indigeneity At the intersection of geography and anthropology the authors of this volume combine general reflections on spatiality with case studies from the Circumpolar North and other nomadic settings Spatial perceptions and practices have been profoundly transformed by new technologies as well as by new modes of social and political interaction How do these changes play out in the everyday lives identifications and political projects of nomadic and indigenous people This question has been broached from two seemingly divergent stances spatial cognition on the one hand and production of space on the other Bringing these two approaches together this volume re aligns the different strings of scholarship on spatiality making them applicable and relevant for indigenous and nomadic conceptualizations of space place and territory **The Routledge Handbook of Social Studies of Outer Space** Juan Francisco Salazar,Alice Gorman,2023-07-10 The Routledge Handbook of Social Studies of Outer Space offers state of the art overview of contemporary social and cultural research on outer space International in scope the thirty eight contributions by over fifty leading researchers and artists across a variety of disciplines and fields of knowledge present a range of debates and pose key questions about the crafting of futures in relation to outer space The Handbook is a call to attend more carefully to engagements with outer space empirically affectively and theoretically while characterizing current research practices and outlining future research agendas This recalibration opens profound questions of intersectional politics race equity and environmental justice around the contested topics of space exploration and life off Earth Among the many themes included in the volume are the various infrastructures networks and systems that enable and sustain space exploration space heritage the ethics of outer space social and environmental justice fundamental debates about life in outer space as it pertains to both astrobiology and SETI the study of scientific communities the human body and consciousness Indigenous astronomical systems of Knowledge contemporary space art and ongoing critical interventions to

overcome the legacies of colonialism and dismantle hegemonic narratives of outer space **A Companion to the Anthropology of Europe** Ullrich Kockel, Máiréad Nic Craith, Jonas Frykman, 2015-12-14 A Companion to the Anthropology of Europe BLACKWELL COMPANIONS TO ANTHROPOLOGY A Companion to the Anthropology of Europe The volume also deserves a place on the shelves of academic libraries as well as the larger public library Reference Reviews Summing Up Highly recommended All academic levels libraries Choice This important collection challenges all anthropologists to re-examine the importance of European perspectives on the most provocative debates of our time It transcends regional interests to highlight the complex intellectual landscape of our field Tracey Heatherington University of Wisconsin Milwaukee This significant volume critically interrogates assumptions about Europe as an idea and a place for research It provides fresh perspectives on the past and future of anthropological studies of Europe Deborah Reed Danahay SUNY at Buffalo President of the Society for the Anthropology of Europe A Companion to the Anthropology of Europe offers a survey of contemporary Europeanist anthropology and European ethnology and a guide to emerging trends in this geographical field of research Utilizing diverse approaches to the anthropological study of Europe Kockel Nic Craith and Frykman provide a synthesis of the different traditions and contemporary practices Investigating the subject both geographically and thematically the companion covers key topics such as location heritage experience and cultural practices Written by leading international scholars in the field the volume constitutes the first authoritative guide for researchers instructors and students of anthropology and European studies
