## **Anthropology Of Reading:**

**An Anthropology of Reading** Eric Livingston,1995      **Phrasikleia** Jesper Svenbro,2018-05-31 First published in French in 1988 this extraordinary book traces the meaning and function of reading from its very beginnings in Greek oral culture through the development of silent reading One of the most haunting early examples of Greek alphabetical writing appears on the life sized Archaic funerary statue of a young girl The inscription speaks for Phrasikleia who shall always be called maiden for she has received this name from the gods instead of marriage      **Anthropological Approaches to Reading Migrant Writing** Deborah Reed-Danahay,Helena Wulff,2023-10-24 This book brings fresh perspectives to the anthropology of migration It focuses on what migrants write and how anthropologists may incorporate insights gained from engagement with this writing into research methods and writing practices The volume includes a range of contributions from leading scholars in the field all organized around a striking set of questions about the conditions in which migrant narratives are written and translated the audiences for which they are intended the genres and media through which they are disseminated and what such stories include or leave out The contributors to this volume demonstrate an innovative shift in anthropological methods by showing how fiction and nonfiction graphic memoir and autoethnography song lyrics as well as social media posts and images unsettle the power dynamics in the study of migration narrative This book will serve as important supplemental reading for courses on migration literary anthropology ethnographic methods and sociocultural anthropology in general Its interdisciplinary perspective will appeal to a broad range of scholars and students with interests in migration narrative and anthropological writing genres      **The Ethnography of Reading** Jonathan Boyarin,2023-09-01 Writing the subject of much innovative scholarship in recent years is only half of what we call literacy The other half reading now finally receives its due in these groundbreaking essays by a distinguished group of anthropologists and literary scholars The essays move well beyond the simple rubric of literacy in its traditional sense of evolutionary advancement from oral to written communication Some investigate reading in exotically cross cultural contexts Some analyze the long historical transformation of reading in the West from a collective oral practice to the private silent one it is today while others demonstrate that in certain Western contexts reading is still very much a social activity The reading situations described here range from Anglo Saxon England to contemporary Indonesia from ancient Israel to a Kashaya Pomo Indian reservation Filled with insights that erase the line between orality and textuality this collection will attract a broad readership in anthropology literature history and philosophy as well as in religious gender and cultural studies Writing the subject of much innovative scholarship in recent years is only half of what we call literacy The other half reading now finally receives its due in these groundbreaking essays by a distinguished group of anthropologists and literary scholars      **The Anthropological Turn in Literary Studies** Jürgen Schlaeger,1996      *Medicine, Rationality and Experience* Byron J. Good,1994 Biomedicine is often thought to provide a scientific account of the human body and of illness In this view non Western and folk medical systems are regarded as

systems of belief and subtly discounted This is an impoverished perspective for understanding illness and healing across cultures one that neglects many facets of Western medical practice and obscures its kinship with healing in other traditions Drawing on his research in several American and Middle Eastern medical settings in this 1993 book Professor Good develops a critical anthropological account of medical knowledge and practice He shows how physicians and healers enter and inhabit distinctive worlds of meaning and experience He explores how stories or illness narratives are joined with bodily experience in shaping and responding to human suffering and argues that moral and aesthetic considerations are present in routine medical practice as in other forms of healing

**Critical Reading Across the Curriculum, Volume 2** Anton Borst,Robert DiYanni,2020-03-17 Provides educators with practical strategies tools and techniques for teaching critical reading skills to students in the social and natural sciences Strong

critical reading skills are an essential part of any student's academic success. Teaching these vital skills requires educators to develop and implement effective teaching strategies often based on their own critical reading practices. *Critical Reading Across the Curriculum Volume 2 Social and Natural Sciences* provides educators with expert insights, real world methods and proven strategies to build critical reading skills in students across disciplines. Drawing from the experience of seasoned classroom practitioners, this book presents a dozen essays that offer various applications of critical reading best practices in fields such as anthropology, biology, economics, engineering, political science and sociology. Clear, jargon-free chapters identify, explain and illustrate best teaching practices for critical reading. Containing numerous practical examples and demonstrations, essays written by experts in their respective fields explain what critical reading requires for their discipline as well as how to teach those skills in the classroom. Every essay includes a host of pedagogical activities, assignments and projects that can be used directly or adapted for diverse teaching applications. This valuable book helps educators develop the skills students need to ask the right questions, consider sources, assess evidence, evaluate arguments and reason critically. Encourage students to practice critical reading skills with engaging exercises and activities. Teach students to establish context and identify contextual connections. Explain how to read for arguments including content-based and conceptual arguments. Adapt and apply teaching strategies to various curricula and disciplines. *Critical Reading Across the Curriculum Volume 2 Social and Natural Sciences* is an ideal resource for educators in a wide range of areas such as college and high school instructors in science and social science disciplines and instructors of graduate education courses. **An**

**Anthropology of the Enlightenment** Nigel Rapport, Huon Wardle, 2018-12-27 In a time of intellectual uncertainty, the question of how we know what we do about human lives becomes ever more pressing. The essays collated in this volume argue that anthropology can be used to acknowledge, explore and interpret divergence and ideological conflict over human meaning. Using questions raised as part of the Enlightenment movement, this volume is structured around some of the key themes the Enlightenment fostered, including human nature, time, Earth and the Cosmos, beauty, order, harmony and design, moral sentiments and the query of whether wealthy nations make for healthy publics. The volume focuses in particular on how moral sentiment offered a guiding idea in Enlightenment thought. The idea of moral sentiment is central to the essays grappling with the ethical anxieties of contemporary anthropology. The essays therefore trace historical connections and fissures and focus on Adam Smith's attempts toward an understanding of what would later be called modernity. With an afterword from Marilyn Strathern, this volume will be a strong addition to the Association of Social Anthropologists conference proceedings. *Gramsci, Culture and Anthropology* Kate Crehan, 2002-11-15 In the last twenty years, the legacy of Italian theorist Antonio Gramsci has soared to new heights. His work has become one of the most cited sources on power and hegemony. He is often used by anthropologists working on issues of culture and power. This book explores Gramsci's understanding of culture and the links between culture and power in relation to anthropology. Extensive use is made of

Gramsci's own writings including his pre-prison journalism and prison letters as well as the prison notebooks. The book also provides an account of the intellectual and political contexts within which he was writing. The challenge Gramsci's approach presents to some common anthropological assumptions about the nature of culture is examined, as is the potential usefulness of Gramsci's writings for contemporary anthropologists.

*Anthropology and Archaeology* Chris Gosden, 2002-01-04  
Anthropology and Archaeology provides a valuable and much-needed introduction to the theories and methods of these two inter-related subjects. This volume covers the historical relationship and contemporary interests of archaeology and anthropology. It takes a broad historical approach, setting the early history of the disciplines with the colonial period during which the Europeans encountered and attempted to make sense of many other peoples. It shows how the subjects are linked through their interest in kinship, economics, and symbolism, and discusses what each contributes to debates about gender, material culture, and globalism in the post-colonial world.

**Heidegger and French Philosophy** Tom Rockmore, 2002-09-11  
Martin Heidegger's impact on contemporary thought is important and controversial. However, in France, the influence of this German philosopher is such that contemporary French thought cannot be properly understood without reference to Heidegger and his extraordinary influence. Tom Rockmore examines the reception of Heidegger's thought in France. He argues that in the period after the Second World War, due to the peculiar nature of the humanist French philosophical tradition, Heidegger became the master thinker of French philosophy. Perhaps most importantly, he contends that this reception, first as philosophical anthropology and later as post-metaphysical humanism, is systematically mistaken.

*Reading Popol Wuj* Nathan C. Henne, 2020-04-14  
Popol Wuj is considered one of the oldest books in the Americas. Various elements of Popol Wuj have appeared in different written forms over the last two millennia, and several parts of Popol Wuj likely coalesced in hieroglyphic book form a few centuries before contact with Europeans. Popol Wuj offers a unique interpretation of the Maya world and ways of being from a Maya perspective. However, that perspective is often occluded since the extant Popol Wuj is likely a copy of a copy of a pre-contact Indigenous text that has been translated many times since the fifteenth century. Reading Popol Wuj offers readers a path to look beyond Western constructions of literature to engage with this text through the philosophical foundation of Maya thought and culture. This guide deconstructs various translations to ask readers to break out of the colonial mold in approaching this seminal Maya text. Popol Wuj or Popol Vuh in its modern form can be divided thematically into three parts.

cosmogony the formation of the world tales of the beings who inhabited the Earth before the coming of people and chronicles of different ethnic Maya groups in the Guatemala area Examining thirteen translations of the K'iche' text Henne offers a decolonial framework to read between what translations offer via specific practice exercises for reading studying and teaching Each chapter provides a close reading and analysis of a different critical scene based on a comparison of several translations English and Spanish of a key K'iche' word or phrase in order to uncover important philosophical elements of Maya worldviews that resist precise expression in Indo European languages Charts and passages are frontloaded in each chapter so the reader engages in the comparative process before reading any leading arguments This approach challenges traditional Western reading practices and enables scholars and students to read Popol Wuj and other Indigenous texts from within the worldview that created them

**Reading in Anthropology** Morton Herbert Fried, 1959 Experiential and Performative Anthropology in the Classroom Pamela R. Freese, Susan Brownell, 2020-07-08 The contributors gathered here revitalize ethnographic performance the performed recreation of ethnographic subject matter pioneered by Victor and Edith Turner and Richard Schechner as a progressive pedagogy for the 21st century They draw on their experiences in utilizing performances in a classroom setting to facilitate learning about the diversity of culture and ways of being in the world The editors themselves both students of Turner at the University of Virginia and Richard Schechner share recollections of the Turners vision and set forth a humanistic pedagogical agenda for the future A detailed appendix provides an implementation plan for ethnographic performances in the classroom

**Between Anthropology and Literature** Rose De Angelis, 2003-08-27 This collection suggests that the disciplines of literature and anthropology are not static entities but instead fluid sites of shifting cultural currents and academic interests The essays conclude that the origins sources and intersections of the two disciplines are constantly being revised and reconceived leading to new possibilities of understanding texts The authors address the ways in which the language of social science fuses with that of the literary imagination The essays fit excellently with the current interest in interdisciplinary studies and challenge students to see texts as parts of a larger global and cultural matrix
