Anthropology The Humanizing Process:

Anthropology Evelyn S. Kessler, 1974-02-01 A Theological Anthropology of Self-Realization Jennifer Slater O.P., 2012-07-31 The book addresses the intriguing problem of human self realization precisely because of the diverse uses of the term which ranges from abstract philosophical theological theories to practical psychological spiritual applications Jennifer Slater draws the concept from Karl Rahner the twentieth German theologian who uses the term self realization in his theology on freedom and symbolism relating it to the basic free choice which the human person makes to be for or against God Divine Jennifer Slater explores this fundamental free choice which is at the same time a basic choice about oneself She writes from the understanding that the human person is radically free to become the choices she or he makes and freedom is the capacity for definitive self realization In the book she shows that in the exercising of freedom humans precisely as historical beings are also transcendent beings Jennifer grapples with the perception that since human self realization involves the power to make decisions which in reality actualizes a persons own reality how then does this self realization come about and where does the Divine fit into the process If self realization is related to the human self and to the Divine Self she then questions what constitutes the self and self realization This struggle practically employs the woman in general and in particular the woman consecrated to a vowed life The pervasive question throughout is What constitutes the self realization of a human woman being **Anthropology in Medical Education** Iveris Martinez, Dennis W.

Creatures of Cain Erika Lorraine Milam,2018-12-11 How Cold War America came to attribute human evolutionary

success to our species unique capacity for murder After World War II the question of how to define a universal human nature took on new urgency *Creatures of Cain* charts the rise and precipitous fall in Cold War America of a theory that attributed man's evolutionary success to his unique capacity for murder Drawing on a wealth of archival materials and in depth interviews Erika Lorraine Milam reveals how the scientists who advanced this killer ape theory capitalized on an expanding postwar market in intellectual paperbacks and widespread faith in the power of science to solve humanity's problems even to answer the most fundamental questions of human identity The killer ape theory spread quickly from colloquial science publications to late night television classrooms political debates and Hollywood films Behind the scenes however scientists were sharply divided their disagreements centering squarely on questions of race and gender Then in the 1970s the theory unraveled altogether when primatologists discovered that chimpanzees also kill members of their own species While the discovery brought an end to definitions of human exceptionalism delineated by violence Milam shows how some evolutionists began to argue for a shared chimpanzee human history of aggression even as other scientists discredited such theories as sloppy popularizations A wide ranging account of a compelling episode in American science *Creatures of Cain* argues that the legacy of the killer ape persists today in the conviction that science can resolve the essential dilemmas of human nature
