Introductory Readings in Anthropology Hilary Callan, Brian Street, Simon Underdown, 2013-03-15 Anthropology seeks to understand the roots of our common humanity the diversity of cultures and world views and the organisation of social relations and practices As a method of inquiry it embraces an enormous range of topics and as a discipline it covers a multitude of fields and themes as shown in this selection of original writings As an accessible entry point for upper level students and first year undergraduates new to the study of anthropology this reader also offers guidance for teachers in exploring the subject's riches with their students That anthropology is an immensely expansive inquiry of study is demonstrated by the diversity of its topics from nature conservation campaigns to witchcraft beliefs from human evolution to fashion and style and from the repatriation of indigenous human remains to research on literacy There is no single story of anthropology Taken together these fundamental readings are evidence of a contemporary vibrant subject that has much to tell us about all the worlds in which we live

Popularizing Anthropology Jeremy McClancy, Christian McDonough, 2002-11-01 Anthropology written for a popular audience is the most neglected branch of the discipline In the 1980s postmodernist anthropologists began to explore the literary and reflective aspects of their work *Popularizing Anthropology* advances that trend by looking at a key but previously marginalized genre of anthropology The contributors

who are well known anthropologists explore such themes as why so many anthropologists are women how the Japanese have reacted to Ruth Benedict why Margaret Mead became so successful how the French media promote Levi Strauss and Louis Dumont Why Bruce Chatwin tells us more about Aborigines than many anthropologists in Australia how personal accounts of fieldwork have evolved since the 1950s how to write a personal account of fieldwork Popularizing Anthropology unearths a submerged tradition within anthropology and reveals that from the beginning anthropologists have looked beyond the boundaries of the academy for their listeners It aims to establish the popularization of the discipline as an illuminating topic of investigation in its own right arguing that it is not an irrelevant appendage to the main body of the subject but has always been an integral part of it *The Ethics of Anthropology* Pat Caplan, 2004-03-01 Since the inception of their discipline anthropologists have studied virtually every conceivable aspect of other peoples morality religion social control sin virtue evil duty purity and pollution But what of the examination of anthropology itself and of its agendas epistemes theories and praxes In 1991 Raymond Firth spoke of social anthropology as an essentially moral discipline Is such a view outmoded in a postmodern era Do anthropological ethics have to be re thought each generation as the conditions of the discipline change and as choices collide with moral alternatives The Ethics of Anthropology looks at some of these crucial issues as they reflect on researcher relations privacy authority secrecy and ownership of knowledge The book combines theoretical papers and case studies from eminent scholars including Lisette Josephides Steven Nugent Marilyn Silverman Andrew Spiegel and Veronica Strang Showing how the topic of ethics goes to the heart of anthropology it raises the controversial question of why and for whom the anthropological discipline functions **Sharing Our Worlds** Joy Hendry, 2008-04 Women today are being instructed on how they can raise their self esteem love their inner child survive their toxic families overcome codependency and experience a revolution from within By holding up the ideal of a pure and happy inner core psychotherapists refuse to acknowledge that a certain degree of unhappiness or dissatisfaction is a routine part of life and not necessarily a cause for therapy Lesbians specifically are now guided to define themselves according to their frailties inadequacies and insecurities An incisive critique of contemporary feminist psychology and therapy Changing our Minds argues not just that the current practice of psychology is flawed but that the whole idea of psychology runs counter to many tenets of lesbian feminist politics Recognizing that many lesbians do feel unhappy and experience a range of problems that detract from their well being Changing Our Minds makes positive prescriptive suggestions for non psychological ways of understanding and dealing with emotional distress Written in a lively and engaging style Changing our Minds is required reading for anyone who has ever been in therapy or is close to someone who has and for lesbians feminists psychologists psychotherapists students of psychology and women s studies and anyone with an interest in the development of lesbian feminist theory ethics and practice **Indigenous Studies and Engaged Anthropology** Paul Sillitoe, 2016-05-23 Advancing the rising field of engaged or participatory anthropology that is emerging at the same time as increased opposition from Indigenous peoples to

research this book offers critical reflections on research approaches to date The engaged approach seeks to change the researcher researched relationship fundamentally to make methods more appropriate and beneficial to communities by involving them as participants in the entire process from choice of research topic onwards The aim is not only to change power relationships but also engage with non academic audiences The advancement of such an egalitarian and inclusive approach to research can provoke strong opposition Some argue that it threatens academic rigour and worry about the undermining of disciplinary authority Others point to the difficulties of establishing an appropriately non ethnocentric moral stance and navigating the complex problems communities face Drawing on the experiences of Indigenous scholars anthropologists and development professionals acquainted with a range of cultures this book furthers our understanding of pressing issues such as interpretation transmission and ownership of Indigenous knowledge and appropriate ways to represent and communicate it All the contributors recognise the plurality of knowledge and incorporate perspectives that derive at least in part from other ways of being in the world

Working Images Ana Isabel Alfonso, Laszlo Kurti, Sarah Pink, 2004-08-02 Visual methods such as drawing painting video photography and hypermedia offer increasingly accessible and popular resources for ethnographic research In Working Images prominent visual anthropologists and artists explore how old and new visual media can be integrated into contemporary forms of research and representation Drawing upon projects undertaken both at home in their native countries and abroad in locations such as Ethiopia and Venezuela the book's contributors demonstrate how visual methods are used in the field and how these methods can produce and communicate knowledge about our own and other cultures As well as focusing on key issues such as ethics and the relationship between word and image they emphasize the huge range of visual methods currently opening up new possibilities for field research from cartoons and graphic art to new media such as digital video and online technologies
