Anthropometry Of The American Negro:

The Anthropometry of the American Negro Melville Jean Herskovits, 1930 *Anthropometry of the American Negro*
Melville Jean Herskovits, 1987 **Black and African-American Studies** Gunnar Myrdal, 1995 **The American Negro**
Melville Jean Herskovits, 1964 **Medicine, Science, and Making Race in Civil War America** Leslie A. Schwalm, 2023-02-14 This social and cultural history of Civil War medicine and science sheds important light on the question of why and how anti Black racism survived the destruction of slavery During the war white Northerners promoted ideas about Black inferiority under the guise of medical and scientific authority In particular the Sanitary Commission and Army medical personnel conducted wartime research aimed at proving Black medical and biological inferiority They not only subjected Black soldiers and refugees from slavery to substandard health care but also scrutinized them as objects of study This mistreatment of Black soldiers and civilians extended after life to include dissection dismemberment and disposal of the Black war dead in unmarked or mass graves and medical waste pits Simultaneously white medical and scientific investigators enhanced their professional standing by establishing their authority on the science of racial difference and hierarchy Drawing on archives of the U S Sanitary Commission recollections of Civil War soldiers and medical workers and testimonies from Black Americans Leslie A Schwalm exposes the racist ideas and practices that shaped wartime medicine and science Painstakingly researched and accessibly written this book helps readers understand the persistence of anti Black racism and health disparities during and after the war The Retreat of Scientific Racism Elazar Barkan, 1992 This fascinating study in the sociology of knowledge documents the refutation of scientific foundations for racism in Britain and the United States between the two World Wars when racial differences were no longer attributed to cultural factors Professor Barkan considers the social significance of this transformation particularly its effect on race relations in the modern world Discussing the work of the leading biologists and anthropologists who wrote between the wars he argues that the impetus for the shift in ideologies came from the inclusion of outsiders women Jews and leftists who infused greater egalitarianism into scientific discourse But even though the emerging view of race was constrained by a scientific language he shows that modern theorists were as much influenced by social and political events as were their predecessors **The Chicago Afro-American Union Analytic Catalog** Chicago Public Library, 1972 **African Americans in Sports** Gary A. Sailes, 2017-07-05 Research on African American athletes generally focuses on negative stereotypes of physical prowess and socially controversial themes Most studies investigate racism prejudice discrimination and exploitation experienced by African American athletes Many studies contrast African American and white athletes on a number of variables that support prevailing elitist stereotypes and denigrate African American athletes But few studies investigate the diverse and complex cultural dichotomies within the infrastructure of sport in the African American community Gary Sailes maintains that it is crucial to develop a more eclectic and immersed cultural approach when investigating African American involvement in com

petitive sports The contributors to African Americans in Sports show that there are also intrinsic cultural paradigms that are evident presenting an informative and interesting narrative regarding African American athletes The chapters that make up this volume were written by noted scholars who were selected based on their expertise in their specific academic areas They write about different components of the experience of African American male athletes Chapters and contributors include Race and Athletic Performance A Physiological Review by David W Hunter The Athletic Dominance of African Americans Is There a Genetic Basis by Vinay Harpalani African American Player Codes on Celebration Taunting and Sportsmanlike Conduct by Vernon L Andrews and Stacking in Major League Baseball by Earl Smith and C Keith Harrison Many chapters were originally published as a special issue of the Journal of African American Men This volume should be read by all those involved in athletics as well as by sports sociologists and African American studies scholars

Interracialism Werner Sollors, 2000-10-19 Interracialism or marriage between members of different races has formed torn apart defined and divided our nation since its earliest history This collection explores the primary texts of interracialism as a means of addressing core issues in our racial identity Ranging from Hannah Arendt to George Schuyler and from *Pace v Alabama* to *Loving v Virginia* it provides extraordinary resources for faculty and students in English American and Ethnic Studies as well as for general readers interested in race relations By bringing together a selection of historically significant documents and of the best essays and scholarship on the subject of miscegenation Interracialism demonstrates that notions of race can be fruitfully approached from the vantage point of the denial of interracialism that typically informs racial ideologies

Color Protocols Carolyn L. Kane, Lida Zeitlin-Wu, 2025-09-30 An edited volume that explores how color intersects with problematic histories of racial encoding in linguistic visual and algorithmic media What is at stake when categories like color race and ethnicity are transformed into a common language lexicon or industry standard And more critically how can we avoid the epistemic and ontological violence that seems inevitable in organizing color into a series of grammars syntaxes indexes and protocols Color Protocols offers a series of responses to these questions and others It begins with the premise that color is central to the history of systemic racism and in turn that the encoding of race vis vis color is an intrinsic aspect of chromatic technologies The book's eighteen curated essays edited by Carolyn Kane and Lida Zeitlin Wu are written by scholars from across the arts social sciences and humanities Each section contains both original essays and republished excerpts fundamental to understanding how the history of color technology and its racialized double valences have played out across multiple fields and media platforms over the last century and a half Contributors Ruha Benjamin Jianqing Chen Anne Anlin Cheng Frederick Douglass W E B Du Bois Richard Dyer Ali Feser Nicholas Gaskill Quran M Karriem Michael Keevak Lisa Nakamura Tina Post Aileen Robinson Michael Rossi Lorna Roth Amber Sweat Genevieve Yue
