Anticipating and Assessing Health Care Technology ,2012-12-06 This report Anticipating and Assessing Health Care Technology is the first report from the STG Commission on Future Health Care Technology The STG Stuurgroep Toekomstscenari o s Gezondheidszorg was established in 1983 as an independent advisory group to the State Secretary for Welfare Public Health and Cultural Affairs WVC to assist in long range health planning efforts Thus far STG commissions have examined cardiovascular disease cancer aging and life styles as issues of importance to the health of the Dutch population in the future Obviously health care technology is of great concern to the government On the one hand technology is one of the major tools to promote a healthy population On the other hand the costs of health care have been rising at an alarming rate in recent years It was these two facts along with the social consequences of certain technologies such as genetic screening that led the STG to establish the Commission on Future Health Care Technology in 1985 The European Office of the World Health Organization EURO cosponsored the project The Health Council Gezondheidsraad agreed to cooperate with the project by furnishing space and intellectual and logistical support The goal of the Commission s work is to develop sufficient information on future technological developments in health and health care to assist planning for their consequences Subsequent reports will give more detail on future health care technologies and will provide in depth assessments on a few specific technological areas *Anticipating and Assessing Health Care Technology* Scenario

Commission on Future Health Care Technology,2013-03-09 As noted in the Foreword this report is one of several volumes resulting from this study of future health care technology The purpose of the study as formulated by the STG was to analyze future health care technology Part of the task was to develop an early warning system for health care technology The primary goal of the project was to develop a list or description of a number of possible and probable future health care technologies as well as information on their importance Within the limits of time and money this has been done However given the vast number of possible future health care technologies complete information on the importance of each area could not be developed in any depth for all technology Therefore four specific technologies were chosen and were prospectively assessed These future technologies were examined in more depth looking particularly at their future health and policy implications Subsequently the project was extended to September 1986 and two additional technologies were chosen for assessment

Anticipating and Assessing Health Care Technology, Volume 2 ,2012-12-06 As noted in the Foreword this report is the second of several volumes resulting from this study of future health care technology The purpose of the study as formulated by the STG was to analyze future health care technology Part of the task was to develop an early warning system for health care technology The primary goal of the project was to develop a list or description of a number of possible and probable future health care technologies as well as information on their importance Within the limits of time and money this has been done This report is the description of anticipated future health care technologies However given the vast number of

possible future health care technologies complete information on the importance of each area could not be developed in any depth for all technology Therefore four specific technologies were chosen and were prospectively assessed These future technologies were examined in more depth looking particularly at their future health and policy implications Subsequently the project was extended to September 1987 and two additional technologies are being assessed **Anticipating and Assessing Health Care Technology: Future technological changes**, 1987 *Current Catalog* National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70 National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1990 **Getting Skills Right: Assessing and Anticipating Changing Skill Needs** OECD, 2016-04-08 Digitalisation globalisation demographic shifts and other changes in work organisation are constantly reshaping skill needs This can lead to persistent skill shortages and mismatch which are costly for individuals firms and society in terms of lost wages and lower productivity and growth **Health Care Technology and Its Assessment in Eight Countries** Mary Adams, 1995-10 Examines the management of health care technology in 8 countries Australia Canada France Germany the Netherlands Sweden the U K the U S Six technologies or sets of technologies including evaluation management efforts how the technologies diffused are presented compared treatments for coronary artery disease imaging technologies CT MRI scanning laparoscopic surgery treatments for end stage renal disease neonatal intensive care breast cancer screening Extensive bibliography for each country Charts tables **Health Care Technology and Its Assessment in Eight Countries** United States.
