Gelber, 1999-06-25

Whether it s needlepoint or woodworking collecting stamps or dolls everyone has a hobby or is told they need one But why do we fill our leisure time with the activities we do And what do our hobbies say about our culture Steven Gelber here traces the history and significance of hobbies from the mid nineteenth century through the 1950s Although hobbies are often touted as a break from work Gelber demonstrates that they reflect and reproduce the values and activities of the workplace by bringing utilitarian rationality into the home imitating the economic stratification of the marketplace and reinforcing traditional gender roles Drawing on a wide array of social and cultural theory *Hobbies* fills a critical gap in American cultural history and provides a compelling new perspective on the meaning of leisure **Treasures Uncovered** Henry Jeffs, The

gentle tick of a Victorian mantel clock the lustrous patina of aged silver the delicate brushstrokes preserved on century old porcelain these are the sensory experiences that draw millions of people into the enchanting world of antique collecting More than mere objects antiques serve as tangible connections to previous eras each piece carrying within its form the stories of those who created owned and cherished it across generations The modern antique collector becomes a curator of these narratives preserving fragments of human civilization while experiencing the profound satisfaction that comes from surrounding oneself with objects of beauty craftsmanship and historical significance Understanding what transforms an old object into a coveted antique requires appreciating the complex interplay of age rarity craftsmanship and cultural significance that elevates certain items above mere vintage status Generally speaking true antiques must be at least one hundred years old though this arbitrary threshold serves more as a starting point than a definitive rule The real value of an antique lies not simply in its age but in its ability to represent the aesthetic ideals technological capabilities and social conditions of its era while maintaining sufficient quality and condition to continue serving as both functional object and historical artifact The psychology of antique collecting reveals itself through multiple motivations that often interweave to create deeply personal relationships between collectors and their treasures Some collectors are drawn primarily by aesthetic appreciation seeking objects whose beauty transcends temporal boundaries to provide daily pleasure through contemplation and use Others focus on historical significance viewing their collections as informal museums that preserve evidence of past ways of life while educating contemporary observers about earlier eras and cultures
