Antisocial Child His Family His Commun:

The Antisocial Child Stanislaus Andrew Szurek, Irving N. Berlin, 1969 Principles and Practice of Child Psychiatry Stella Chess, Mahin Hassibi, 2013-06-29 Stella Chess's many admirers throughout the world have long looked forward to the day when she would produce her own textbook of child psychiatry. They will not be disappointed in this thoughtful and perceptive account of the principles and practices of the subject written in collaboration with Dr. Hassibi. It has all the hallmarks we have come to recognize as distinctive of the Chess approach to child psychiatry: gentle yet subtle and penetrating; always appreciative of the feelings and concerns of both the children and their parents; well informed and critically aware of research findings but far from overawed by the contributions of science; and above all, immensely practical. Anyone who wants to know how one of the world's outstanding clinicians appraises what child psychiatry has to offer could do no better than to read this book. Child psychiatry differs from general psychiatry in being concerned with a developing organism, and it is entirely appropriate that the book begins with an account of child development and of the principal theories put forward to explain it. Chess and Hassibi recognize the importance of theory in organizing ideas and in suggesting explanations, but they remain skeptical of how far existing theories do in fact account for the outstanding issues in development. They note the limitations of all theories in explaining how development takes place and why individual differences occur in the way they do.

The Juvenile Court Center for Studies of Crime and Delinquency (U.S.), Jeffrey E. Glen, 1971 **Resources in Education**, 1990-04 The Poisoning of Paradise United States. Congress. House. Committee on Government Reform. Subcommittee on Criminal Justice, Drug Policy, and Human Resources, 2005 Comprehensive Textbook of Community Health Nursing Including Environmental Science (Two Volume Set), First Edition - E-Book Neerja Sood, Sakshi Chaturvedi, 2025-04-07 This book has been written with student nurses learning needs in mind and it fully covers the Indian Nursing Council's new revised syllabus for nursing degree and diploma courses. Although it primarily intends to cater to the curriculum demands of BSc Nursing and GNM students, it will also be extremely valuable for students of various other streams studying community health courses, MLHP, CCH, and MPH courses. The main principles have been conveyed in clear terms from the students' perspective. The global and national health scenario and community health nursing principles are considered while explaining the role of community health nurses. Designed to meet the curricular needs of student nurses, relevant case studies and examples are included. Figures, tables, and pictures are placed in order to enhance logical thinking. Recent research work in the relevant field is included in the content. Contains short answer and long answer exam-oriented questions at the end of chapters. Provides additional multiple choice questions to help students have a firm grasp on the subject. *Conduct Disorders in Youth* Lourens Schlebusch, 2013-10-22 *Conduct Disorders in Youth* deals with the maladaptive behavior, delinquency, and other forms of waywardness in youth. It features significant contributions from the research literature relating to the subject in general and to the South African situation in particular. This book is organized into three main parts.

The chapters evaluate the usefulness of some psychological tests such as the I PAT Anxiety Scale Questionnaire the Children's Personality Questionnaire CPQ and the High School Personality Questionnaire HSPQ as diagnostic instruments They also provide an inventory of behavioral characteristics that can help in identifying symptoms of conduct disorders This book also features a detailed discussion of two clinical case histories to exemplify the main points formulated in the text This book will be of interest to students reading for degrees and diplomas in psychology education psychiatry social work psychiatric nursing sociology and criminology

Child Delinquents Rolf Loeber, David P. Farrington, 2001 Between 1980 and 1996 the number of arrests has increased considerably for offenders ages 12 and under This increase is a cost to society in two ways the cost of the crime and the cost of multiple agencies involved with these children Several questions have developed due to this increase How does the juvenile justice system deal with child delinquents Is child delinquency a predictor of serious violent and chronic offending How early can we

predict and what are early warning signs In an effort to develop answers for these questions and many more editors Rolf Loeber and David Farrington organized a study group on Very Young offenders comprising 39 experts on juvenile delinquency and child problem behavior Over a two year period of intense and collaborative work these individuals have produced the book *Child Delinquents Development Intervention and Service Needs* Presenting empirically derived insights *Child Delinquents* is the definitive statement to date on the working knowledge of prevalence development risk and protective factors and optimal intervention with preteen offenders This book is an excellent source for a broad audience of researchers scholars psychiatry and practitioners at the administrative level *Chicago Psychoanalytic Literature Index, 1920-1970* Institute for Psychoanalysis, 1971

A Community of One Martin A. Danahay, 1993-08-24 Complementing recent feminist studies of female self representation this book examines the dynamics of masculine self representation in nineteenth century British literature Arguing that the category autobiography was a product of nineteenth century individualism the author analyzes the dependence of the nineteenth century masculine subject on autonomy or self naming as the prerequisite for the composition of a life history The masculine autobiographer achieves this autonomy by using a feminized other as a metaphorical mirror for the self The feminized other in these texts represents the social cost of masculine autobiography Authors from Wordsworth to Arnold including Samuel Taylor Coleridge Thomas De Quincey John Ruskin Alfred Tennyson Robert Louis Stevenson John Stuart Mill and Edmund Gosse use female lovers and family members as symbols for the community with which they feel they have lost contact In the theoretical introduction the author argues that these texts actually privilege the autonomous self over the images of community they ostensibly value creating in the process a self enclosed and self referential community of one

The Psychiatric Interview in Clinical Practice Roger A. MacKinnon, Robert Michels, Peter J. Buckley, 2015-10-20 Much has changed in the critical interval since the last edition of *The Psychiatric Interview in Clinical Practice* was published This new third edition provides an up to date examination of the psychiatric interview that reflects changes introduced in DSM 5 while continuing to recognize that describing symptoms and establishing a diagnosis should command only a portion of the clinician s attention and that a patient s personal history must be elicited and character structure addressed in the clinical engagement Significant advances have been made in biological psychiatry and research in genetics cognitive neuroscience psychopharmacology brain imaging and the neurosciences in general continues apace informing the culture of psychiatry and providing growing insight into the etiology of mental illnesses However the book reflects the authors belief that virtually all major psychiatric disorders are complex amalgams of genetic disposition and environmental influences In this context the psychiatric interview is a vitally important dialogue and effective strategies are modeled through the use of clinical vignettes taken from the authors experience Topics and features of this new edition include An updating of diagnostic considerations to reflect the publication of DSM 5 A chapter on interviewing the patient with dissociative identity disorder DID which is now recognized as an entity distinct from other

psychopathological conditions and rooted in childhood trauma The frequency of DID in the ambulatory setting has been repeatedly demonstrated and speaks to the need to accurately diagnose and treat this often debilitating disorder An entirely updated chapter on interviewing the traumatized patient A section on interviewing the patient of different background The book emphasizes that the subjective experience of being different is universal and that psychiatry is enriched by recognizing and exploring that experience validating its existence and attempting to understand how it influences the patient's life Continued emphasis on and inclusion of relevant case vignettes drawn from the authors' clinical experiences Structural consistency across chapters with sections on psychopathology and psychodynamics differential diagnosis management of the interview transference and countertransference and so forth which reinforces skills acquisition and makes the text easy to use By creating a text that is aligned with DSM 5 while continuing to stress the importance of eliciting the patient's subjective experience and achieving a therapeutic dialogue the authors of *The Psychiatric Interview in Clinical Practice* have done a great service to the profession and provided much needed guidance to mental health clinicians and trainees

National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1969 First multi year cumulation covers six years 1965-70 *Treatment Strategies in Child and Adolescent Psychiatry* H.B. Ferguson, J.G. Simeon, 2013-06-29 It is clear that child and adolescent psychiatric disorders impose a heavy burden of suffering Recent large scale community epidemiological studies suggest that as many as 20% of children and adolescents in the general population may have clinically important mental disorders These disorders are accompanied by associated impairments in various domains of the child's life resulting in lowered life quality for the child and his or her family In addition for some conditions the onset of the disorder in childhood heralds a lifetime of serious psychosocial disturbance for a significant subgroup of affected children For instance about 40% of children seen in clinic settings with conduct disorder in late childhood and early adolescence will have serious psychiatric disorders in adult life Finally the heavy burden of suffering of these conditions is indicated by the large amounts of both human and financial resources devoted to their assessment and treatment There is a pressing need in the field for effective treatments that is those that have been shown to do more good than harm that will result in a significant reduction in the burden of suffering resulting from these disorders Further these effective interventions must be readily available and acceptable to clinicians in the settings in which children with mental disorders and their families seek care This book addresses an important need in the treatment field *Hearings, Reports and Prints of the Senate Committee on Appropriations* United States.
