Leslie,2011 In Antitrust Law and Intellectual Property Rights Cases and Materials Christopher R Leslie

describes how patents copyrights and trademarks confer exclusionary rights on their owners and how firms sometimes exercise this exclusionary power in ways that exceed the legitimate bounds of their intellectual property rights Leslie explains that while substantive intellectual property law defines the scope of the exclusionary rights antitrust law often provides the most important consequences when owners of intellectual property misuse their rights in a way that harms consumers or illegitimately excludes competitors Antitrust law defines the limits of what intellectual property owners can do with their IP rights In this book Leslie explores what conduct firms can and cannot engage in while acquiring and exploiting their intellectual property rights and surveys those aspects of antitrust law that are necessary for both antitrust practitioners and intellectual property attorneys to understand This book is ideal for an advanced antitrust course in a JD program In addition to building on basic antitrust concepts it fills in a gap that is often missing in basic antitrust courses yet critical for an intellectual property lawyer the intersection of intellectual property and antitrust law The relationship between intellectual property and antitrust is particularly valuable as an increasing number of law schools offer specializations and LL.M.s in intellectual property This book also provides meaningful material for both undergraduate and graduate business schools programs because it explains how antitrust law limits the marshalling of intellectual property rights

Competition Policy Analysis Kai Hüscherlath, 2008-09-08 Competition policy is an integral and prominent part of economic policy making in the European Union The EU Treaty prescribes its member states to conduct economic policy in accordance with the principle of an open market economy with free competition More precisely the goal of EU competition policy is to defend and develop effective competition in the common market European Commission 2000 7 Under its Commissioners van Miert Monti and most recently Kroes the EU Commission has stepped up its effort to pursue and achieve the aforementioned goal A number of so called hard core cartels such as the notorious vitamin cartel led by Roche have been detected tried in violation of Art 81 of the Maastricht Accord and punished with severe fines Also Microsoft was hit hard by the strong hand of the Commission having been severely fined for exploiting a dominant market position Economic analysis has been playing an increasingly significant role in the Commission's examination of competition law cases This holds true in

particular for merger control Here however the Commission has had to accept some poignant defeats in court such as the Court's reversals of *Airtours* First Choice or *GE Honeywell* Among other things the European Court of Justice found the economic analysis as conducted by the EU's Directorate General for Competition to be flawed and the conclusions drawn not to be convincing These rejections by the courts have stirred up the scholarly debate on the conceptual foundations of European competition policy

The Definition of Subsidy and State Aid Luca Rubini, 2009-12-24 This book presents a conceptual framework for analysing the definitions of State aid and subsidy in EC and WTO law This is done through a comparative analysis examining the coherence of the conceptual understanding of the crucial but still elusive issue of the definition of subsidy The first important finding is that the topic is not only technical but raises more fundamental questions about the objectives of subsidy control in a given legal system and more radically about the goals of that system itself The analysis does not only concentrate on the state of the law but critically looks forward offering suggestions for new interpretations and law reform The book focuses on the substantive provisions of the EC and WTO relating to what are identified by the author as the core properties of a notion of subsidy ie a form of public action the grant of an economic advantage and the ensuing impact on the competitive process The current regulation in EC and WTO law is analysed compared and assessed in depth and tested against a baseline represented by of a notion of subsidy inserted in a subsidy regulation pursuing certain objectives Drawing on the results of the comparative exercise the book argues that both systems can learn valuable lessons from each other to achieve a greater coherence and a more efficient regulatory system

European Merger Control Catalin Stefan Rusu, 2010-01-01 Twenty years of experience have inevitably brought to light challenges and tensions in the enforcement of the European merger control system Some of these challenges have been faced some have been solved and some remain latent This very valuable study starts from the proposition that the EU has never fully acknowledged those fundamental challenges which relate to the rationale behind merger control in Europe The author shows how the Commission's focus on adapting the rules of merger control to the economic realities of the future business environment

although designed with a view to facilitating European integration has compromised attainment of legal certainty transparency and welfare enhancement In its detailed evaluation of the future market structure prediction process embedded in European merger control policy this book approaches two rock bottom far reaching questions In what ways does merger control promote consumer and societal welfare Is the Commission able to correctly predict the outcome of any given concentration transaction These considerations take the reader through a deep and searching analysis that calls into question the very credibility and transparency of the system leading to alternatives which promise a new clarity of purpose and procedure The author describes how these recommendations can be integrated into the functioning framework of the European project Taken fully into account along the way is a wide spectrum of relevant source material including the following applicable articles and chapters of the founding and subsequent European Treaties secondary European legislation concerning competition and merger activity domestic competition laws guidelines notices and action plans competition law reviews statements of intentions draft legislative attempts speeches on the enactment and purpose of merger control Member States views concerning European merger control as expressed during Council negotiations officially available concentration related statistics and a wide ranging literature review covering both the legal and economic sides of merger control Throughout the author substantiates theoretical assertions with case law examples clearly exposing doctrines arising from such cases as Continental Can Phillip Morris Rothmans and the Airtours Schneider and Tetra Laval trilogy A unique feature of the analysis draws on the author s personal experience while working for a Brussels competition law firm This book is a remarkable compound of academic guide to the roots and rationales of the European Merger Control System practical guide to the day to day intricacies of merger control enforcement and raw guide for decision makers and merger control law enforcers It will be of immense value in all three contexts
