Antitrust Law Policy Procedure Case Materials Problems:

Antitrust Law, Policy, and Procedure, 2003 **Antitrust Law, Policy, and Procedure** E. Thomas Sullivan, Herbert Hovenkamp, 2003 The Fifth Edition continues to emphasize cases as the best way to teach antitrust law The principal cases in this edition are the best and most current legal precedents Judicial opinions are supplemented by historical and economic discussions and analyses In particular the notes discuss varying antitrust ideologies confronting their defects and presenting their strengths This new edition adds rich new material on the transnational reach of the United States² antitrust law antitrust²s application to intellectual property the Microsoft case and its history as it implicates monopolization tying doctrine and market power analysis expert testimony after Daubert and its relationship to antitrust summary judgment motions and antitrust²s application in the field of regulated industries **Competition Policy and Resource Utilization**

David Oluwadare Adetoro, 2016-04-26 This book examines the extent to which competition law and policy could be employed to promote the efficient allocation of resources in resource dependent developing economies Its background inquiry into competition policy and the analysis of economic problems of resource dependent developing economies inspired by global competition trends in the United States and Europe provide an indispensable framework for understanding competition policy and current attitudes to regulation in a liberalised developing economy The book provides a systematic exposition of some of the problems associated with resource dependent economies and the implications for competition and what kinds of conduct in which firms can and cannot engage In addition to building on basic competition and antitrust concepts it offers insights into some prevailing problems which include the issue of resource curse rent seeking corruption and abusive business practices among others Their examination here is aligned with scrutiny of the characteristics of developing countries in contrast to developed countries Nigeria is taken as a proxy for resource dependent developing countries The book also determines whether competition law and policy could be used as a tool for addressing competition problems that may exist in resource dependent developing countries This book provides meaningful material for both undergraduate and graduate business school programs In addition it will be of great interest to lawyers historians economists sociologists and policy makers in both government and business who wish to understand competition issues in a clear and rigorous way in developing economies

Handbook of Research in Trans-Atlantic Antitrust Philip Marsden, 2008-01-01 The book is handsomely produced by Edward Elgar The notes contain more than citations and are well worth reading A welcome feature is that after each set of notes there is a list of the most important writings on the topic followed by a list of the most important cases Edward Elgar is well known in economic circles hence the endnotes to which economists are accustomed It has published several books on competition for lawyers over the last years and is a welcome entrant to the lawyers market Valentine Korah *World Competition* This extremely well done and important book collects writings by more than two dozen academics and practitioners on important topics in competition law This is an excellent book important for research by

anyone who is serious about global or comparative competition policy European Law Review This Handbook assembles a valuable collection of insightful analyses dealing with many cutting edge issues arising in modern antitrust enforcement on both sides of the Atlantic Philip Lowe European Commission The contributions to this Handbook provide a comprehensive up to date treatment of antitrust law in the Americas and Europe I would recommend it to anyone who wants to learn about antitrust law and its administration in the major enforcement areas of the world This is bound to become an important reference for antitrust students and experts Keith Hylton Boston University US This comprehensive research Handbook brings together cutting edge legal and economic analysis into antitrust issues by leading experts from Europe the USA Canada Mexico and South America The Handbook of Research in Trans Atlantic Antitrust covers a wide range of areas including the meaning of consumer welfare mergers in monopsony markets unilateral effects private and criminal enforcement implementing competition policy in regulated sectors abuse of intellectual property rights competition remedies international enforcement cooperation complainants rights dominant firm pricing tying and bundling The Handbook also includes discursive consideration of the similarities and differences among the various regimes on either side of the Atlantic as well as a look to future trends and applications in regional and global contexts Offering a comparative view of pressing antitrust issues this Handbook will be of great interest to academics lawyers practitioners and officials **Media**

Ownership and Concentration in America Eli M. Noam, 2009-10-19 People have worried for many years about the concentration of private power over the media as evidenced by controversy over Federal Communication Commission rulings on broadcast ownership limits The fear it seems is of a media mogul with a political agenda a new William Randolph Hearst who could help start wars or run for political office using the power of the media In the light of these concerns about freedom of speech Eli Noam provides a comprehensive survey of media concentration in America covering everything from the early media empire of Benjamin Franklin to the modern day cellular phone industry Competition Law Richard Whish, David Bailey, 2012-01-12 The authors describes the potential scope and application of the various legal provisions which regulate competition in the UK This book also examines the results of the convergence of UK and EC law with regard to competition in business European Yearbook of International Economic Law 2013 Christoph Herrmann, Markus Krajewski, Jörg Philipp Terhechte, 2013-04-02 Part one of Volume 4 2013 of the European Yearbook of International Economic Law offers a special focus on recent developments in international competition policy and law International competition law has only begun to emerge as a distinct subfield of international economic law in recent years even though international agreements on competition co operation date back to the 1970s Competition law became a prominent subject of political and academic debates in the late 1990s when competition and trade were discussed as one of the Singapore issues in the WTO Today international competition law is a complex and multi layered system of rules and principles encompassing not only the external application of domestic competition law and traditional bilateral co operation agreements but also competition

provisions in regional trade agreements and non binding guidelines and standards Furthermore the relevance of competition law for developing countries and the relationship between competition law and public services are the subject of heated debates The contributions to this volume reflect the growing diversity of the issues and elements of international competition law Part two presents analytical reports on the developments of the regional integration processes in North America Central Africa and Southeast Asia as well as on the treaty practice of the European Union Part three covers the legal and political developments in major international organizations that deal with international economic law namely the IMF WCO WTO WIPO ICSID and UNCTAD Lastly part four offers book reviews of recent works in the field of international economic law

Resale Price Maintenance and Vertical Territorial Restrictions Barbora Jedlicková, 2016-03-25 Theoretical discussions among competition lawyers and economists on the approach to Resale resale Price price Maintenance maintenance RPM and Vertical vertical Territorial territorial Restrictions restrictions VTR have often caused controversy However commentators agree that there is a lack of comprehensive study surrounding the topic This book explores these two forms of anticompetitive conduct from legal historical economical and theoretical points of view focusing on the EU and US experiences The author expertly goes beyond the current legal practice to explain among other things what approach should apply to RPM and VTR and why RPM and VTR are introduced in situations where procompetitive theories would not make economic sense or do not apply in practice The book takes account of economic values such as efficiency and welfare as well as other values such as freedom fairness and free competition Scholars and students of law will find the book s depth of legal economic and historical analysis to be a rich contribution to the scholarship This book will also be of use to EU and US practitioners and enforcers dealing with RPM and VTR cases

Competition Law and Development D. Daniel Sokol, Thomas K. Cheng, Ioannis Lianos, 2013-09-11 The vast majority of the countries in the world are developing countries there are only thirty four OECD Organisation for Economic Co operation and Development countries and yet there is a serious dearth of attention to developing countries in the international and comparative law scholarship which has been preoccupied with the United States and the European Union Competition Law and Development investigates whether or not the competition law and policy transplanted from Europe and the United States can be successfully implemented in the developing world or whether the developing world experience suggests a need for a different analytical framework The political and economic environment of developing countries often differs significantly from that of developed countries in ways that may have serious implications for competition law enforcement The need to devote greater attention to developing countries is also justified by the changing global economic reality in which developing countries especially China India and Brazil have emerged as economic powerhouses Together with Russia the so called BRIC countries have accounted for thirty percent of global economic growth since the term was coined in 2001 In this sense developing countries deserve more attention not because of any justifiable differences from developed countries in competition law enforcement either in theoretical or

practical terms but because of their sheer economic heft This book the second in the Global Competition Law and Economics series provides a number of viewpoints of what competition law and policy mean both in theory and practice in a development context

Competition Law as Regulation Josef Drexler, Fabiana Di Porto, 2015-10-30 To what extent should competition agencies act as market regulators Competition Law as Regulation provides numerous insights from competition scholars on new trends at the interface of competition law and sector specific regulation By relying on the experiences of a considerable number of different jurisdictions and applying a comparative approach to the topic this book constitutes an important addition to international research on the interface of competition and regulation It addresses the fundamental issues of the subject and contributes to legal theory and practice Topics discussed include foundations of the complex relationship of competition law and regulation new forms of advocacy powers of competition agencies competition law enforcement in regulated industries in general information and telecommunications markets and competition law as regulation in IP related markets Scholars in the two fields of law and economics will find the research aspects of the book to be of interest Officials in competition and regulatory agencies will benefit from the practical relevance of the book
