Machuca, 2022-09-09 Recent years have seen an explosion of interest in evolutionary debunking arguments directed against certain types of belief particularly moral and religious beliefs According to those arguments the evolutionary origins of the cognitive mechanisms that produce the targeted beliefs render these beliefs epistemically unjustified The reason is that natural selection cares for reproduction and survival rather than truth and false beliefs can in principle be as evolutionarily advantageous as true beliefs The present volume brings together fourteen essays that examine evolutionary debunking arguments not only in ethics and philosophy of religion but also in philosophy of mathematics metaphysics and epistemology The essays move forward research on those arguments by shedding fresh light on old problems and proposing new lines of inquiry The book will appeal to scholars and graduate students interested in the possible skeptical implications of evolutionary theory in any of the above domains **Making Magic** Randall Styers, 2004 Randall Styers seeks to account for the vitality of scholarly discourse purporting to define and explain magic despite its failure to do just that He argues that it can best be explained in light of the European and Euro American drive to establish and secure their own identity as normative *The Science of Weird Shit* Chris French, 2024-03-19 An accessible and gratifying introduction to the world of paranormal beliefs and bizarre experiences Ghostly encounters alien abduction reincarnation talking to the dead UFO sightings inexplicable coincidences out of body and near death experiences Are these legitimate phenomena If not then how should we go about understanding them In this fascinating book Chris French investigates paranormal claims to discover what lurks behind this weird shit French provides authoritative evidence based explanations for a wide range of superficially mysterious phenomena and then goes further to draw out lessons with wider applications to many other aspects of modern society where critical thinking is urgently needed Using academic comprehensive logical and at times mathematical approaches The Science of Weird Shit convincingly debunks ESP communicating with the dead and alien abduction claims among other phenomena All the while however French maintains that our belief in such phenomena is neither ridiculous nor

trivial if anything such claims can tell us a great deal about the human mind if we pay them the attention they are due Filled with light bulb moments and a healthy dose of levity *The Science of Weird Shit* is a clever memorable and gratifying read you won't soon forget Parapsychology Jane Henry, 2005 Beginning with an introduction to the methodology this book provides the reader with a sympathetic yet critical overview of current research into unexplained phenomena including visions telepathy psychokinesis and out of body experiences **Current Catalog** National Library of Medicine (U.S.), 1992

Magic: A Very Short Introduction Owen Davies, 2012-01-26 A wide ranging overview of how magic has been defined understood and practiced over the millennia introduces it in today's world as a real force that helps people overcome misfortune poverty and illness *Parapsychology and Religion* Everton de Oliveira Maraldi, 2021-06-29 Parapsychology and Religion is perhaps the most controversial research area in the psychology of religion However in recent decades psychology of religion has witnessed a growing literature bearing on ontological issues including parapsychological topics such as distant healing and near death experiences This book argues that despite the methodological and theoretical controversies that still surround the field of parapsychology the findings of research on alleged anomalous processes can inform the study of religious spiritual experiences Psychological literature on the paranormal is critically reviewed and it is argued that it became less a scientific endeavor and more an ideological program devised to denigrate paranormal believers and experiencers This volume explores how an open minded dialogue between parapsychology and psychology of religion might help us move beyond the present ideological disputes and reviews the complex relations between parapsychology and religion over time as well as their implications for interdisciplinary research on religion and spirituality
