Strategies for Tourism Industry Murat Kasimoglu, 2012-04-20 Today it is considered good business practice for tourism industries to support their micro and macro environment by means of strategic perspectives This is necessary because we cannot contemplate companies existing without their environment If companies do not involve themselves in such undertakings they are in danger of isolating themselves from the shareholder That in turn creates a problem for mobilizing new ideas and receiving feedback from their

environment In this respect the contributions of academics from international level together with the private sector and business managers are eagerly awaited on topics and sub topics within Strategies for Tourism Industry Micro and Macro Perspectives Travelling Across Cultures Spanish Association for American Studies.
