giving the cold shoulder to the static isolated concept of visual art and searching instead for novel dynamic connections to
different image strategies Because of that visual art and aesthetics are both forced to reconsider their current positions and
their traditional apparatus of concepts In that process many questions surface To mention a few Could the characteristics of
an artistic image and its specific manner of signification be determined in a world which is entirely aesthetized What would
be the consequences of a variety of image strategies for aesthetic experience Would it be possible to develop a form of
cultural criticism by means of artistic activities in a culture awash in images In order to answer such questions aesthetics as
a philosophy of art needs to transform its field into a critical philosophy of topical visual culture As an impetus to such a
reinterpretation of the visual working area the L B Series organized three symposia evenings under the title Exploding
Aesthetics in cooperation with De Appel Center for Contemporary Art Amsterdam Besides the presentations and discussions
from these symposia this volume includes various arguments positions and statements in both articles and interviews by a
