Education Kristján Kristjánsson, 2015-04-17 This book provides a reconstruction of Aristotelian character education shedding new light on what moral character really is and how it can be highlighted measured nurtured and taught in current schooling Arguing that many recent approaches to character education understand character in exclusively amoral instrumentalist terms Kristjánsson proposes a coherent plausible and up to date concept retaining the overall structure of Aristotelian character education After discussing and debunking popular myths about Aristotelian character education subsequent chapters focus on the practical ramifications and methodologies of character education These include measuring virtue and morality asking whether Aristotelian character education can salvage the effects of bad upbringing and considering implications for teacher training and classroom practice The book rejuvenates time honoured principles of the development of virtues in young people at a time when character features prominently in educational agendas and parental concerns over school education systems Offering an interdisciplinary perspective which draws from the disciplines of education psychology philosophy and sociology this book will appeal to researchers academics and students wanting a greater insight into character education Handbook of Research on Effective Communication in Culturally Diverse Classrooms González, Katia, Frumkin, Rhoda, 2016-02-17 Meaningful interaction between teachers and students is crucial to any educational environment and particularly so in intercultural settings When educators take steps to incorporate culturally responsive teaching into their classrooms student learning is enriched and improved The Handbook of Research on Effective Communication in Culturally Diverse Classrooms focuses on the significance of cultural sensitivity toward diverse students and the importance of communication to increase the overall educational experience Highlighting key concepts relating to curriculum design teaching models and critical pedagogies in transcultural classrooms this book is a pivotal reference source for teachers teacher educators and researchers interested in the impact of intercultural communication in learning environments Handbook of Moral and Character Education Larry Nucci, Tobias Krettenauer, 2014-04-24 There is widespread agreement that schools should contribute to the moral development and character formation of their students In fact 80% of US states currently have mandates regarding character education However the pervasiveness of the support for moral and character education masks a high degree of controversy surrounding its meaning and methods The purpose of this handbook is to supplant the prevalent ideological rhetoric of the field with a comprehensive research oriented volume that both describes the extensive changes that have occurred over the last fifteen years and points forward to the future Now in its second edition this book includes the latest applications of developmental and cognitive psychology to moral and character education from preschool to college settings and much more **The Discourse of Character Education** Peter Smagorinsky, Joel Taxel, 2005-05-06 In this book Peter Smagorinsky and Joel Taxel analyze the ways in which the perennial issue of character education has been articulated in the United States both historically and in the current character education movement that began in earnest in the 1990s The goal is to uncover the ideological nature of different conceptions

of character education The authors show how the current discourses are a continuation of discourse streams through which character education and the national purpose have been debated for hundreds of years most recently in what are known as the Culture Wars the intense often passionate debates about morality culture and values carried out by politicians religious groups social policy foundations and a wide range of political commentators and citizens in which the various stakeholders have sought influence over a wide range of social and economic issues including education The centerpiece is a discourse analysis of proposals funded by the United States Department of Education s Office of Educational Research and Improvement OERI Discourse profiles from sets of states that exhibit two distinct conceptions of character are examined and the documents from particular states are placed in dialogue with the OERI Request for Proposals One profile reflects the dominant perspective promoted in the U S based on an authoritarian view in which young people are indoctrinated into the value system of presumably virtuous adults through didactic instruction The other reflects the well established yet currently marginal discourse emphasizing attention to the whole environment in which character is developed and enacted and in which reflection on morality rather than didactic instruction in morality is the primary instructional approach By focusing on these two distinct regions and their conceptions of character the authors situate the character education movement at the turn of the twenty first century in the context of historical notions about the nature of character and regional conceptions regarding the nature of societal organization This enlightening volume is relevant to scholars practitioners policymakers and students across the field of education particularly those involved in character education moral development discourse analysis history and cultural foundations of education and related fields and to the wider public interested in character education
