Anthology Of Atheism And Rationalism:

An Anthology of Atheism and Rationalism Gordon Stein,1980 **A Second Anthology of Atheism and Rationalism** Gordon Stein,1987 No Marketing Blurb *Atheism* Michael Martin,1990 In this book Michael Martin provides logical reasons for being an atheist Carefully examining the current debate in Anglo American analytic philosophy regarding God s existence Martin presents a comprehensive critique of the arguments for the existence of God and a defense of arguments against the existence of God showing in detail their relevance to atheism Claiming that atheism is a rational position while theistic beliefs are not he relies both on logic and evidence and confines his efforts to showing the irrationality of belief in a personal supreme being who is omniscient omnipotent perfect and the creator of heaven and earth The author s approach is two fold By presenting and criticizing arguments that have been advanced in favor of belief he makes a case for negative atheism By offering arguments against atheism and defending it from these attacks he presents a case for positive atheism Along the way he confronts the views of numerous philosophers among them Anselm Aquinas Plantinga Hick and Swinburne and refutes both classical and contemporary arguments that have been advanced through the history of this debate In his conclusion Martin considers what would and would not follow if his main arguments were widely accepted and he defines and distinguishes atheism from other isms and movements Building on the work of religious skeptics and atheists of the past and present he justifies his reconstruction of this philosophical dispute by citing some of the most interesting and important arguments for atheism and criticisms of arguments for the existence of God that have appeared in recent journal articles and have yet to be systematically addressed Author note Michael Martin is Professor of Philosophy at Boston University and author of several books including *The Legal Philosophy of H L A Hart* *A Critical Appraisal* and *The Case Against Christianity* both from Temple **Anthology of Atheism and Rationalism** Gordon Stein,1984-07-01 *Against Religion: The Atheist Writings of H.P. The Flipside of Godspeak John Fulling Crosby,2007-01-01 A basic question in philosophy is how do we know what we think we know Constructivists answer this question as follows categories for constructing reality reside in the human mind so reality cannot escape the mind s limitations Human beings constantly assimilate new knowledge and experience Constructivists apply the same logic to the question of truth What we claim to be true is always provisional New information and breakthroughs may supplant what we presently hold to be true Ultimate or absolute truth is unknowable In *The Flipside of Godspeak* John Crosby applies the principles of philosophical and theological constructivism to theistic belief The idea of God is a constructed idea We come to think that we know there is a God because we have internalized stories images and historical accounts passed on to us by people with authority In these pages however and without reference to an authoritarian deity Crosby considers questions of ethics and morality An ethic of eudaemonism or well being is posited to be based on the principles of equality honesty and responsibility to self and others Implications of the meaning and purpose of

human existence are considered from the existential perspective that is from the viewpoint that we ourselves invent create and construct meaning

Skepticism and Humanism Paul Kurtz,2023-05-31 As we begin the third millennium there is cause for cautious optimism regarding the human prospect Democratic revolutions and the doctrine of universal human rights have captured the imagination of large sectors of humanity while major advances in science and technology continue to conquer disease and extend life contributing to rising standards of living affluence and cultural freedom on a worldwide basis Paradoxically at the same time ancient authoritarian fundamentalist religions have grown in vitriolic intensity along with bizarre New Age media driven paranormal belief systems Also surprising is the resurgence of primitive tribal and ethnic loyalties unleashing wars of intolerance and bitterness In *Skepticism and Humanism* Paul Kurtz locates these threatening developments within a long standing and largely unchallenged theological worldview He proposes as an alternative to religion a new cultural paradigm rooted in scientific naturalism rationalism and a humanistic outlook An estimated 60 percent of scientists are atheists or agnostics However the skeptical world view has been given little currency even in advanced societies because of a cultural prohibition against the criticism of religion At the same time science has become increasingly narrow and specialized so that few people can draw on its broader intellectual and cultural implications *Skepticism and Humanism* attempts to meet this need It defends skepticism as a method for developing reliable knowledge by using scientific inquiry and reason to test all claims to truth It also defends scientific naturalism an evolutionary view of nature life and the human species Kurtz sees the dominant religious doctrines as drawn from an agricultural nomadic past and emphasizes the need for a new outlook applicable to the postindustrial information age At the same time he rejects postmodernism for abandoning science and embracing a form of nihilism There can be no doubt that as a new global civilization emerges scientific naturalism rationalism and secular humanism have something significant to say about the meaning of life *Skepticism and Humanism* shows how they can to foster democratic values and social prosperity The book will be important for philosophers scientists and all those concerned with contemporary issues
