Anthropological Perspectives On Kinship Ladislav Holy,1996-10-20 This authoritative introductory text takes into account the changes in the conceptualisation of kinship brought about by new reproductive technologies and the growing interest in culturally specific notions of personhood and gender Holy considers the extent to which Western assumptions have guided anthropological study of kinship in the past In the process he reveals a growing sensitivity on the part of anthropologists to individual ideas of personhood and gender and encourages further critical reflection on cultural bias in approaches to the subject

Anthropological Perspectives on Care Erdmute Alber,2015-09-01 In the course of last two decades the notion of care has become prominent in the social and cultural sciences As a result of this proliferation of care in several disciplinary fields we are observing not only the expansion of its conceptual meaning but also an increasing imprecision in its usage A growing amount of literature focuses on the intersection between work gender ethnicity affect and mobility regimes In view of this growing field of literature *Anthropological Perspectives on Care* looks at the notion of care from an anthropological perspective Complementing earlier approaches Alber and Drotbohm argue that an interpretation of care in relation to three different concepts namely work kinship and the life course will facilitate empirical and conceptual distinctions between the different activities that are labeled as care

Anthropological Perspectives on Care Erdmute Alber,Heike Drotbohm,2014-01-14 Drawing on ethnographic case studies from different world areas this book explores the notion of care from an anthropological perspective

The Politics of Making Kinship Erdmute Alber,David Warren Sabean,Simon Teuscher,Tatjana Thelen,2022-12-09 The long tradition of Western political thought included kinship in models of public order but the social sciences excised it from theories of the state public sphere and democratic order Kinship has however neither completely disappeared from the political cultures of the West nor played the determining social and political role

ascribed to it elsewhere Exploring the issues that arise once the divide between kinship and politics is no longer taken for granted The Politics of Making Kinship demonstrates how political processes have shaped concepts of kinship over time and conversely how political projects have been shaped by specific understandings idioms and uses of kinship Taking vantage points from the post Roman era to early modernity and from colonial imperialism to the fall of the Berlin Wall and beyond this international set of scholars place kinship centerstage and reintegrate it with political theory *New Directions in Anthropological Kinship* Linda Stone,2002-05-30 Following periods of intense debate and eventual demise kinship studies is now seeing a revival in anthropology New Directions in Anthropological Kinship captures these recent trends and explores new avenues of inquiry in this re emerging subfield The book comprises contributions from primatology evolutionary anthropology archaeology and cultural anthropology The authors review the history of kinship in anthropology and its theory and recent research in relation to new directions of anthropological study Moving beyond the contentious debates of the past the book covers feminist anthropology on kinship the expansion of kinship into the areas of new reproductive technologies recent kinship constructions in EuroAmerican societies and the role of kinship in state politics *An Anthropological Perspective on Indian Society* N. Sudhakar Rao,2025-06-30 Indian society with its blend of ancient grandeur and modernity faces significant social and gender inequalities similar to many traditional societies around the world This volume highlights these aspects of human life through empirical anthropological research conducted over the past four decades In India individuals cannot escape the inequalities stemming from gender ethnic and social hierarchies Living in such a context often involves struggling to survive or maintain a higher status This volume addresses these issues based on the empirical realities of life among various populations in different geographical regions of India while also considering their historical roots

Parenting in Global Perspective Charlotte Faircloth,Diane M. Hoffman,Linda L. Layne,2013-10-28 Drawing on both sociological and anthropological perspectives this volume explores cross national trends and everyday experiences of parenting Parenting in Global Perspective examines the significance of parenting as a subject of professional expertise and activity in which adults are increasingly expected to be emotionally absorbed and become personally fulfilled By focusing the significance of parenting as a form of relationship and as mediated by family relationships across time and space the book explores the points of accommodation and points of tension between parenting as defined by professionals and those experienced by parents themselves Specific themes include the ways in which the moral context for parenting is negotiated and sustained the structural constraints to good parenting particularly in cases of immigration or reproductive technologies the relationship between intimate family life and broader cultural trends parenting culture policy making and nationhood parenting and as adult identity work Including contributions on parenting from a range of ethnographic locales from Europe Canada and the US to non Euro American settings such as Turkey Chile and Brazil this volume presents a uniquely critical and international perspective which positions parenting as a global ideology that intersects in a variety of ways with the

political social cultural and economic positions of parents and families Kinship and Beyond Sandra Bamford, Sandra C. Bamford, James Leach, 2012 The genealogical model has a long standing history in Western thought The contributors to this volume consider the ways in which assumptions about the genealogical model in particular ideas concerning sequence essence and transmission structure other modes of practice and knowledge making in domains well beyond what is normally labeled kinship The detailed ethnographic work and analysis included in this text explores how these assumptions have been built into our understandings of race personhood ethnicity property relations and the relationship between human beings and non human species The authors explore the influences of the genealogical model of kinship in wider social theory and examine anthropology's ability to provide a unique framework capable of bridging the social and natural sciences In doing so this volume brings fresh new perspectives to bear on contemporary theories concerning biotechnology and its effect upon social life **Kinship in Action** Andrew Strathern, Pamela J Stewart, 2015-07-02 For courses in Social Organization Kinship and Cultural Ecology Kinship has made a come back in Anthropology Not only is there a line of noted general introductory works and readers in the topic but theoretical discussions have been stimulated both by technological changes in mechanisms of reproduction and by reconsiderations of how to define kinship in the most productive ways for cross cultural comparisons In addition kinship studies have moved away from the minutiae of kin terminological systems and the kinship algebra often associated with these to the broader analysis of processes historical changes and fundamental cultural meanings in which kin relationships are implicated In this changed and changing context both Andrew Strathern and Pamela J Stewart both of the University of Pittsburgh bring together a number of interests and concerns in order to provide pointers for students as well as scholars in this field of study Taking an explicitly processual approach the authors examine definitions of terms such as kinship itself approach the topic in a way that is invariably ethnographic and deploy materials from field areas where they themselves have worked **European Kinship in the Age of Biotechnology** Jeanette Edwards, Carles Salazar, 2009-03-01 Interest in the study of kinship a key area of anthropological enquiry has recently reemerged Dubbed the new kinship this interest was stimulated by the new genetics and revived interest in kinship and family patterns This volume investigates the impact of biotechnology on contemporary understandings of kinship of family and belonging in a variety of European settings and reveals similarities and differences in how kinship is conceived What constitutes kinship for different publics How significant are biogenetic links What does family resemblance tell us Why is genetically modified food an issue Are genes and blood interchangeable It has been argued that the recent prominence of genetic science and genetic technologies has resulted in a geneticization of social life the ethnographic examples presented here do show shifts occurring in notions of nature and of what is natural But they also illustrate the complexity of contemporary kinship thinking in Europe and the continued interconnectedness of biological and sociological understandings of relatedness and the relationship between nature and nurture **Asian Lives in Anthropological Perspective** Susan Bayly, 2024-05-03 Contemporary Asian

societies bear the imprint of the experience and afterlives of colonialism revolutionary socialism and religious and secular nationalism in dramatically contrasting ways Asian Lives in Anthropological Perspective draws together essays that demonstrate the role of these far reaching transformations in the shaping of two Asian settings in particular India and Vietnam It traces historical and contemporary realities through a variety of compelling topics including the lived experience of India s caste system and the ethical challenges faced by Vietnamese working women **The Ways of Friendship** Amit Desai,Evan Killick,2010-08-01 Friendship is an essential part of human experience involving ideas of love and morality as well as material and pragmatic concerns Making and having friends is a central aspect of everyday life in all human societies Yet friendship is often considered of secondary significance in comparison to domains such as kinship economics and politics How important are friends in different cultural contexts What would a study of society viewed through the lens of friendship look like Does friendship affect the shape of society as much as society moulds friendship Drawing on long term ethnographic fieldwork in Asia the Middle East Africa Latin America and Europe this volume offers answers to these questions and examines the ideology and practice of friendship as it is embedded in wider social contexts and transformations
