## **Anthropological Theory In North America:**

Anthropological Theory in North America E. L. Cerroni-Long, 1999-10-30 Cultural anthropology is at a crossroads Under the impact of postmodernist critiques serious doubts have been raised about the scientific validity indeed the very viability of the ethnographic enterprise These doubts have been voiced most loudly in North America where the field nonetheless still enjoys the broadest academic base and attracts the largest number of practitioners Over the last decade a set of critical issues has increasingly engaged cultural anthropologists in heated debate The first part of this volume includes a full fledged discussion of these issues offering suggestions for their constructive resolution In spite of the disciplinary self doubts engendered by postmodernism the theory building process in anthropology has not been abandoned The second part of the volume presents a range of original theoretical statements by which American and Canadian anthropologists set the premises for disciplinary trends likely to shape anthropological practice for years to come If as it is prognosticated the 21st century will see an explosion of interest in cultural anthropology the models and ideas presented in this volume define the parameters of disciplinary expansion North American cultural anthropology enters its second century on a wave of theoretical innovation and pragmatic translatability that may finally resolve the disciplinary contrast between analysis and application

Anthropological Theory Robert Alan Manners, David Kaplan, Anthropological theory has been much discussed in recent years yet the crucial questions still remain how can it be defined how is it developed how is it to be applied and how can one confirm it The editors of Anthropological Theory answer these questions by presenting essays relating to various aspects of anthropological theory Their selections from widely scattered and often difficult to obtain sources present a comprehensive set of writings that describe the current position and issues involved in theory The development of field work in anthropology generated a tremendous emphasis on empirical data and research The plethora of information awaiting collection and the enthusiasm with which the field embraced it so immersed anthropologists that they were unable to relate this new information to the field as a whole Manners and Kaplan believe that this lack of generalization had a profoundly negative effect upon the discipline Therefore they look closely into the relationship between field work and theory in an opening essay and go on to present material that demonstrates the value and the necessity of theory in anthropology Essays by anthropologists and other social scientists deal with explanation evolution ecology ideology structuralism and a number of other issues reflecting throughout the editors conviction that anthropology is a science the goal of which is to produce generalizations about sociocultural phenomena The book provides necessary perspective for examining and evaluating the crucial intellectual concerns of modern anthropology and will therefore be important for the work of every anthropologist Robert A Manners 1913 1996 received his Ph D from Columbia

University and carried on field work in the Caribbean among American Indians in the Southwest and in East Africa He wrote numerous articles and reviews for anthropological journals as well as many books He was professor of anthropology Brandeis University where he started up the department David Kaplan is professor emeritus of anthropology at Brandeis University He has contributed articles and reviews to various journals He has also done field work in Mexico and his areas of specialty include economic anthropology method and theory and peasant culture of Mesoamerica
