Anthropology And Antihumanism In Imperial Germany:

Anthropology and Antihumanism in Imperial Germany Andi Zimmerman, 2010-02-15 With the rise of imperialism the centuries old European tradition of humanist scholarship as the key to understanding the world was jeopardized. Nowhere was this more true than in nineteenth century Germany. It was there, Andrew Zimmerman argues, that the battle lines of today's culture wars were first drawn when anthropology challenged humanism as a basis for human scientific knowledge. Drawing on sources ranging from scientific papers and government correspondence to photographs, pamphlets, and police reports of freak shows, Zimmerman demonstrates how German imperialism opened the door to antihumanism. As Germans interacted more frequently with peoples and objects from far flung cultures, they were forced to reevaluate not just those peoples but also the construction of German identity itself. Anthropologists successfully argued that their discipline addressed these issues more productively and more accessibly than humanistic studies. Scholars of anthropology, European and intellectual history, museum studies, the history of science, popular culture, and colonial studies will welcome this book.

Colonialism, Antisemitism, and Germans of Jewish Descent in Imperial Germany Christian Davis, 2012-01-26 An exploration of anti-Semitic behaviors in the German empire in the pre WWI period. **Doing Anthropology in Wartime and War Zones** Reinhard Johler, Christian Marchetti, Monique Scheer, 2014-04-09 World War I marks a well known turning point in anthropology and this volume is the first to examine the variety of forms it took in Europe. Distinct national traditions emerged and institutes were founded partly due to collaborations with the military. Researchers in the cultural sciences used war zones to gain access to informants, prisoners of war, and refugee camps, occupied territories, even the front lines. Anthropologists tailored their inquiries to aid the war effort, contributed to interpretations of the war as a struggle between races, and assessed the warlike nature of the Balkan region, whose crises were key to the outbreak of the Great War. Historiography of the Modern Social Sciences Roger E. Backhouse, Philippe Fontaine, 2014-09-22 A Historiography of the Modern Social Sciences exposes parallels and contrasts in the way the histories of the social sciences are written. **Brill's Companion to Classics and Early Anthropology** Emily Varto, 2018-07-17 The chapters in Brill's Companion to Classics and Early Anthropology explore key points of interaction between classics and anthropology from the eighteenth to the mid twentieth century. Ancient Greece and Rome played varying roles in early anthropological thinking, from the observations of colonial officials and missionaries through the ethnography and evolutionary ethnology of the late nineteenth century and into the professionalized social sciences of the twentieth century. The chapters illuminate these roles and uncover an intellectual history of fission and fusion, exposing common interests and opposing methodologies, shared theories, and conflicting datasets, close collaborations and adversarial estrangements. In augmenting and reevaluating this history, the volume offers a new and nuanced picture of the early formative relationship between the two disciplines. **From Racism to Genocide** Gretchen Engle Schafft, 2004 From Racism to Genocide is an explosive, richly detailed account of how Nazi

anthropologists justified racism developed practical applications of racist theory and eventually participated in every phase of the Holocaust Using original sources correspondence between anthropologists of the time and previously unpublished documentation Gretchen Schafft shows the total range of anti human activity from within the confines of a particular discipline Based on seven years of archival research in this country and abroad the work includes many original photos and documents most of which have never before been published It uses primary data and original texts whenever possible including correspondence written by perpetrators A discussion of Hitler s final solution Nazi slave labor and the rape of occupied Poland reveal the full horror of the Third Reich Embedded concepts of scientism denial academic responsibility and race contribute to understanding some of today s most pressing social science issues The book also reveals that the United States was not merely a bystander in this research but instead contributed scientific and financial support to early racial r

Hannah Arendt and the Uses of History Richard H. King, Dan Stone, 2008-09 Hannah Arendt first argued the continuities between the age of European imperialism and the age of fascism in Europe in *The Origins of Totalitarianism* This text uses Arendt s insights as a starting point for further investigations into the ways in which race imperialism slavery and genocide are linked

Anthropology's Global Histories Rainer F. Buschmann, 2008-10-31 Anthropologists and world historians make strange bedfellows Although the latter frequently employ anthropological methods in their descriptions of cross cultural exchanges the former have raised substantial reservations about global approaches to history Fearing loss of specificity anthropologists object to the effacing qualities of techniques employed by world historians this despite the fact that anthropology itself was a global comparative enterprise in the nineteenth century Rainer Buschmann here seeks to recover some of anthropology s global flavor by viewing its history in Oceania through the notion of the ethnographic frontier the furthestmost limits of the anthropologically known regions of the Pacific The colony of German New Guinea 1884 1914 presents an ideal example of just such a contact zone Colonial administrators there were drawn to approaches partially inspired by anthropology Anthropologists and museum officials exploited this interest by preparing large scale expeditions to German New Guinea Buschmann explores the resulting interactions between German colonial officials resident ethnographic collectors and indigenous peoples arguing that all were instrumental in the formation of anthropological theory He shows how changes in collecting aims and methods helped shift ethnographic study away from its focus on material artifacts to a broader consideration of indigenous culture He also shows how ethnological collecting often a competitive affair could become politicized and connect to national concerns Finally he places the German experience in the broader context of Euro American anthropology Anthropology s Global Histories will interest students and scholars of anthropology history world history and Pacific studies

German Colonialism and National Identity Michael Perraudin, Juergen Zimmerer, 2010-09-14 German colonialism is a thriving field of study From North America to Japan within Germany Austria and Switzerland scholars are increasingly applying post colonial questions and methods to the study of Germany and its culture However no

introduction on this emerging field of study has combined political and cultural approaches the study of literature and art and the examination of both metropolitan and local discourses and memories This book will fill that gap and offer a broad prelude of interest to any scholar and student of German history and culture as well as of colonialism in general It will be an indispensable tool for both undergraduate and postgraduate teaching *Dress and Cultural Difference in Early Modern Europe* Cornelia Aust, Denise Klein, Thomas Weller, 2019-10-08 Gegründet im Jahr 2000 widmet sich das Jahrbuch der Europäischen Geschichte von der Frühen Neuzeit bis zur jüngeren Zeitgeschichte Die große zeitliche Breite thematische Vielfalt und methodische Offenheit zeichnen das Jahrbuch von Beginn an aus und machen es zu einem zentralen Ort wissenschaftlicher Debatten Das bleibt künftig so Mit dem Jahrgang 2014 verändert sich das Jahrbuch aber in mehrfacher Hinsicht Das Jahrbuch erscheint mit der Ausgabe 2014 im Open Access Jeder Band setzt einen thematischen Schwerpunkt Das Forum bietet Platz für geschichtswissenschaftliche Reflexionen und Debatten Jeder Beitrag des Jahrbuchs durchläuft ein strenges Peer Review Verfahren Das Jahrbuch erweitert seinen Namen zum Jahrbuch für Europäische Geschichte *European History Yearbook* und druckt künftig deutsch und englischsprachige Beiträge seit 2015 ausschließlich englischsprachige *German Literature on the Middle East* Nina Berman, 2011 An investigation of Germany and the Middle East through literary sources in the context of social economic and political practices **Imagined Racial Laboratories**, 2023-05-08 Imagined Racial Laboratories reveals the watermarks of science in the dynamics of racialisation in Southeast Asia during and after the colonial period Bringing together a set of critical histories of race sciences it illuminates the racialised dimensions of colony and nation in the region It demonstrates that racialisation took and continues to take mutable and multiple forms that often connect perhaps more than differentiate colonial and national periods across a variety of Southeast Asian settings Thus imagined races have contributed as much to the invention of modern Southeast Asia as have other fabled imagined communities

Former Neighbors, Future Allies? A. Dana Weber, 2023-03-10 German studies scholars from various disciplines often use and reference ethnography yet do not often present ethnography as a core methodology and research approach *Former Neighbors Future Allies* emphasizes how German studies engages in methods and theories of ethnography Through a variety of topics and from multiple perspectives including literature folklore history sociology and anthropology this volume draws attention to how ethnography bridges transdisciplinary and international research in German studies **Anatomists of Empire** Ross L Jones, 2020-04-17 The 20th century anatomists Grafton Elliot Smith Frederic Wood Jones and Arthur Keith travelled the globe collecting cataloguing and constructing morphologies of the biological world with the aim of weaving these into a new vision of bio ecology that links humans to their deep past as well as their evolutionary niche They dissected human bodies and scrutinised the living explaining for the first time the intricacies of human biology They placed the body in its environment and gave it a history thus creating an ecological synthesis in striking contrast to the model of humanity that they inherited as students Their version of human development and history profoundly influenced public opinion as they

wrote prolifically for the press they published bestsellers on human origins and evolution they spoke eloquently at public meetings and on the radio They wanted their anatomical insight to shape public policy And by changing popular views of race and environment they moulded attitudes as to what it meant to be human in a post Darwinian world thus providing a potent critique of racism

Photography, Anthropology and History Elizabeth Edwards, 2016-04-22 Photography Anthropology and History examines the complex historical relationship between photography and anthropology and in particular the strong emergence of the contemporary relevance of historical images Thematically organized and focusing on the visual practices developed within anthropology as a discipline this book brings together a range of contemporary and methodologically innovative approaches to the historical image within anthropology Importantly it also demonstrates the ongoing relevance of both the historical image and the notion of the archive to recent anthropological thought As current research rethinks the relationship between photography and anthropology this volume will serve as a stimulus to this new phase of research as an essential text and methodological reference point in any course that addresses the relationship between anthropology and visibility

Germany's Genocide of the Herero Jeremy Sarkin, Jeremy Sarkin-Hughes, 2011 In 1904 the indigenous Herero people of German South West Africa now Namibia rebelled against their German occupiers In the following four years the German army retaliated killing between 60 000 and 100 000 Herero people one of the worst atrocities ever The history of the Herero genocide remains a key issue for many around the world partly because the German policy not to pay reparations for the Namibian genocide contrasts with its long standing Holocaust reparations policy The Herero case bears not only on transitional justice issues throughout Africa but also on legal issues elsewhere in the world where reparations for colonial injustices have been called for The book argues that the Herero genocide was linked to Germany's late entry into the colonial race which led it frenetically and ruthlessly to acquire multiple colonies all over the world within a very short period using any means available

Racial Science and Human Diversity in Colonial Indonesia Fenneke Sysling, 2016-07-15 Indonesia is home to diverse peoples who differ from one another in terms of physical appearance as well as social and cultural practices The way such matters are understood is partly rooted in ideas developed by racial scientists working in the Netherlands Indies beginning in the late nineteenth century who tried to develop systematic ways to define and identify distinctive races Their work helped spread the idea that race had a scientific basis in anthropometry and craniology and was central to people's identity but their encounters in the archipelago also challenged their ideas about race In this new monograph Fenneke Sysling draws on published works and private papers to describe the way Dutch racial scientists tried to make sense of the human diversity in the Indonesian archipelago The making of racial knowledge it contends cannot be explained solely in terms of internal European intellectual developments It was on the ground that ideas about race were made and unmade with a set of knowledge strategies that did not always combine well Sysling describes how skulls were assembled through the colonial infrastructure how measuring sessions were resisted what role photography and plaster casting played in racial

science and shows how these aspects of science in practice were entangled with the Dutch colonial Empire **Heavenly Fatherland** Jeremy Best, 2020 Motivated by a theology that declared missionary work was independent of secular colonial pursuits Protestant missionaries from Germany operated in ways that contradict current and prevailing interpretations of nineteenth century missionary work As a result of their travels these missionaries contributed to Germany's colonial culture Because of their theology of Christian universalism they worked against the bigoted racialism and ultra nationalism of secular German empire building Heavenly Fatherland provides a detailed political and cultural analysis of missionaries mission societies mission intellectuals and missionary supporters Combining cases studies from East Africa with studies of the metropole this book demonstrates that missionaries ideas about race and colonialism influenced ordinary Germans experience of globalization and colonialism at the same time that the missionaries shaped colonial governance By bringing together religious and colonial history the book opens new avenues of inquiry into Christian participation in colonialism During the Age of Empire German missionaries promoted an internationalist vision of the modern world that aimed to create a multinational multiracial heavenly Fatherland spread across the globe *Nazi Empire* Shelley Baranowski, 2011 Examines the history of Germany from 1871 to 1945 as an expression of the tension of empire *Bourgeois Europe, 1850-1914* Jonathan Sperber, 2022-07-19 Now in its second edition Bourgeois Europe 1850 1914 is a general history of Europe from the middle of the nineteenth century to the outbreak of the First World War a successor to Revolutionary Europe 1780 1850 also available from Routledge The book offers wide geographic coverage of the European continent from the Arctic Circle to the Mediterranean and from the Atlantic to the Urals Topical coverage is equally broad including major trends and events in international relations and domestic politics in social and gender structures in the economy and in the natural and social sciences the humanities religion and the arts For this second edition the text has been completely revised the latest directions in historical research considered the further reading brought up to date and special attention has been paid to Europe's global interactions with the rest of the world and the structures and norms of gender relations Tables charts maps and other explanatory features help students explore further in the areas that interest them Written in sprightly jargon free clear prose the book is ideal for use as a text in secondary school or university courses as well as for general readers wishing to gain an overview of a crucial era of modern European history
