Caribou Herds of Northwest Alaska, 1850-2000 Ernest S. Burch Jr., 2012-09-15 In his final major publication Ernest S. Burch Jr. reconstructs the distribution of caribou herds in northwest Alaska using data and information from research conducted over the past several decades as well as sources that predate western science by more than one hundred years Additionally he explores human and natural factors that contributed to the demise and recovery of caribou and reindeer populations during this time Burch provides an exhaustive list of published and unpublished literature and interviews that will intrigue laymen and experts alike The unflinching assessment of the roles that humans and wolves played in the

dynamics of caribou and reindeer herds will undoubtedly strike a nerve Supplemental essays before and after the unfinished work add context about the author the project of the book and the importance of both Anthropology in Historic Preservation Thomas F. King, Patricia Lee Parker, Gary Berg, 1977 **The Archaeology and Anthropology of Landscape** Robert Layton, Peter Ucko, 2003-09-02 The Archaeology and Anthropology of Landscape contributes to the development of theory in archaeology and anthropology provides new and varied case studies of landscape and environment from five continents and raises important policy issues concerning development and the management of heritage **Draft Environmental Impact Statement, Cumulative Impacts of Mining**, 1989 **American Anthropology in Micronesia** Robert C. Kiste, Mac Marshall, 1999-01-01 American Anthropology in Micronesia An Assessment evaluates how anthropological research in the Trust Territory has affected the Micronesian people the U S colonial administration and the discipline of anthropology itself Contributors analyze the interplay between anthropology and history in particular how American colonialism affected anthropologists use of history and examine the research that has been conducted by American anthropologists in specific topical areas of socio cultural anthropology Although concentrating largely on disciplinary concerns the authors consider the connections between work done in the era of applied anthropology and that completed later when anthropology was pursued mainly for its own sake The focus then returns to applied concerns in more recent years and issues pertaining to the relevance of anthropology for the world of practical affairs It will be of essential interest to students and scholars of Pacific Islands studies and the history of anthropology International Handbook of Historical Archaeology Teresita Majewski, David Gaimster, 2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into

two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today **The Anthropology Graduate's Guide** Carol J.
