The Anthropology of Religion Fiona Bowie, 2000-04-17 This introductory text combines discussion of the origin and development of ideas and debates within the anthropology of religion with a look at where the subject is going today Provides students with a complete introduction to the anthropology of religion Uses worldwide ethnographies to illustrate the theory Includes extensive bibliographies and a list of films and videos that encourage students to explore the field further Encourages students to see that anthropology is not just about reading or doing fieldwork but offers an enriching way of looking at the world Each chapter introduces the central theoretical ideas in the anthropology of religion and illustrates them with specific case studies such as witchcraft in Cameroon shamanism in the Arctic or women's initiation ceremonies Links contemporary ideas and practices with the work of nineteenth and early twentieth century scholars *A Reader in the Anthropology of Religion* Michael Lambek, 2001-12-31 *A Reader in the Anthropology of Religion* is a collection of some of the most significant classic and contemporary writings on the anthropology of religion It includes both material

whose theme is religion in a straightforward and obvious sense as well as material that has expanded how we might look at religion and the horizons of what we mean by religion linking it to broader questions of culture and politics *Anthropology and Religion* Robert L. Winzeler, 2008 Drawing from ethnographic examples found throughout the world this text covers what anthropologists know or think about religion how they have studied it and how they interpret or explain it A key text for students of upper division courses in the anthropological study of religion *The Anthropology of Religion* Peter Metcalf, 2022-11-25 This book describes how anthropologists in the twentieth century went about documenting the religions of those independent peoples who still lived beyond the frontiers of the global economy and the world religions It begins by examining the enormous popularity of the newly invented field of anthropology in the nineteenth century as a site of multiple intellectual developments Its climax was Frazer's Golden Bough which is a pillar of modernity second only to Darwin's Origin of Species But its notion of religion was entirely speculative When anthropologists went to see for themselves they encountered formidable obstacles How to access a people's most profound understandings of the world and everything in it Holding fast to the premise that ethnographers have no special powers of seeing inside other people's brains this book teaches students to proceed slowly a step at a time watching how people perform rituals great and small asking questions that seem stupid to their hosts and struggling to translate abstract terms in unrecorded languages Using a handful of examples from different continents the book shows the potential of an anthropological approach to religion **Religions in Practice** John R. Bowen, 2015-08-07 Examines religious practices from an anthropological perspective Religions in Practice 6 e offers an issues oriented perspective on everyday religious behaviors prayer sacrifice initiation healing etc by focusing on such topics as transnationalism gender and religious laws The text examines a full spectrum of religions from small scale societies to major established religions The in depth treatment of Islam Hinduism and Christianity is particularly noteworthy and easily supplemented with field projects directly related to the text *In Search of the Sacred* Clinton Bennett, 1996-01-01 This text traces the growth and development of two related disciplines anthropology and the study of religions Locating these disciplines within the intellectual climate of the 19th century the study considers the contributions of scholars such as James George Frazer F Max Muller Emile Durkheim Mary Douglas and Clifford Geertz within an historical framework The author argues that both anthropologists and students of religion have abandoned an objective approach in favour of personal engagement with their subjects replacing observation with conversation monologue with dialogue a text based with people based approach He reveals how each discipline has influenced the other both in terms of methodology and by the provision of data The book also explores the criticism levelled at both disciplines that they have aided colonial domination of the developing world **Selected Readings in the Anthropology of Religion** Stephen D. Glazier, Charles A. Flowerday, 2003-12-30 Brings together in one volume a number of key theoretical and methodological advances in the anthropological study of religion Chapters cover important topics not ordinarily included in books dealing with the

anthropology of religion e.g. bipedalism the study of alcohol film and video images notions of religious agency In addition this collection is intended to build bridges between anthropologists of religion and religious studies scholars Over the last four decades anthropologists have grappled with the dialectical relationship between the examination of cultures from the emic or insider perspective and the etic or outsider perspective Nowhere is this creative tension more evident than in the anthropological study of religion In this volume anthropologists and religious studies scholars come to terms not only with a landscape that has shifted fundamentally but a landscape that is still shifting Essays in this collection raise new and important issues for the anthropological study of religion in new and important ways In intensely personal essays a number of contributors address two fundamental concerns in the study of religion 1 how should anthropologists deal with the beliefs and practices of others and 2 how should anthropologists deal with their own religious backgrounds and beliefs as these may affect their understanding of the beliefs and practices of others A partial resolution to both questions is necessary before the anthropological study of religion can advance to a higher level

Religion and Anthropology Brian Morris, 2006 This important textbook provides a critical introduction to the social anthropology of religion focusing on more recent classical ethnographies Comprehensive free of scholastic jargon engaging and comparative in approach it covers all the major religious traditions that have been studied concretely by anthropologists Shamanism Buddhism Islam Hinduism Christianity and its relation to African and Melanesian religions and contemporary Neopaganism Eschewing a thematic approach and treating religion as a social institution and not simply as an ideology or symbolic system the book follows the dual heritage of social anthropology in combining an interpretative understanding and sociological analysis The book will appeal to all students of anthropology whether established scholars or initiates to the discipline as well as to students of the social sciences and religious studies and for all those interested in comparative religion

Anthropology of Religion Phillips Stevens, Jr., Phillips Stevens, 2010-11-23 Anthropology of Religion is a new title in Routledge's Critical Concepts in Religious Studies series In four volumes it brings together canonical and the very best cutting edge scholarship

Introducing Anthropology of Religion Jack David Eller, 2007-08-07 This lively and readable survey introduces students to key areas of the field and shows how to apply an anthropological approach to the study of contemporary world religions Written by an experienced teacher it covers all of the traditional topics of anthropology of religion including definitions and theories beliefs symbols and language and ritual and myth and combines analytic and conceptual discussion with up to date ethnography and theory Eller includes copious examples from religions around the world both familiar and unfamiliar and two mini case studies in each chapter He also explores classic and contemporary anthropological contributions to important but often overlooked issues such as violence and fundamentalism morality secularization religion in America and new religious movements Introducing Anthropology of Religion demonstrates that anthropology is both relevant and essential for understanding the world we inhabit today

Religion and Culture Annemarie de Waal Malefijt, 1968 A comprehensive

anthropological study of religion traces the history of the discipline discusses the archeological discoveries that have shed light on the development of religious consciousness and examines the various manifestations functions and changes of religious customs and beliefs *Anthropology of Religion: The Basics* James Bielo,2015-04-10 Anthropology of Religion The Basics is an accessible and engaging introductory text organized around key issues that all anthropologists of religion face This book uses a wide range of historical and ethnographic examples to address not only what is studied by anthropologists of religion but how such studies are approached It addresses questions such as How do human agents interact with gods and spirits What is the nature of doing religious ethnography Can the immaterial be embodied in the body language and material objects What is the role of ritual time and place in religion Why is charisma important for religious movements How do global processes interact with religions With international case studies from a range of religious traditions suggestions for further reading and inventive reflection boxes Anthropology of Religion The Basics is an essential read for students approaching the subject for the first time **The Anthropology of Religion, Magic, and Witchcraft -- Pearson eText** Rebecca L Stein,Philip Stein,2015-08-07 This book emphasizes the major concepts of both anthropology and the anthropology of religion and examines religious expression from a cross cultural perspective while incorporating key theoretical concepts It is aimed at students encountering anthropology for the first time
