An Anthropology of Intellectual Exchange Jacob Copeman, Lam Minh Chau, Joanna Cook, Nicholas J. Long, Magnus Marsden, 2023-09-15 Dialogues encounters and interactions through which particular ways of knowing understanding and thinking about the world are forged lie at the centre of anthropology Such intellectual exchange is also central to anthropologists own professional practice from their interactions with research participants and modes of pedagogy to their engagements with each other and scholars from adjacent disciplines This collection of essays explores how such processes might best be studied cross culturally Foregrounding the diverse interactions ethical reasoning and intellectual lives of people from across the continent of Asia the volume develops an anthropology of intellectual exchange itself *The Ethics of Anthropology* Pat Caplan, 2004-03-01 Since the inception of their discipline anthropologists have studied virtually every conceivable aspect of other peoples morality religion social control sin virtue evil duty purity and pollution But what of the examination of anthropology itself and of its agendas epistemes theories and praxes In 1991 Raymond Firth spoke of social anthropology as an essentially moral discipline Is such a view outmoded in a postmodern era Do anthropological ethics have to be re thought each generation as the conditions of the discipline change and as choices collide with moral alternatives *The Ethics of Anthropology* looks at some of these crucial issues as they reflect on researcher relations privacy authority secrecy and ownership of knowledge The book combines theoretical papers and case studies from eminent scholars including Lisette Josephides Steven Nugent Marilyn Silverman Andrew Spiegel and Veronica Strang Showing how the topic of ethics goes to the heart of anthropology it raises the controversial question of why and for whom the anthropological discipline functions

Knauft,2013-09-13 In the wake of tensions between modern and postmodern sensibilities what larger directions now emerge in cultural anthropology In this major work Bruce Knauft takes stock of important recent initiatives in cultural and critical theory By combining critical reviews and ethnographic engagements with fresh readings of major figures and approaches the work develops a larger vantage point for considering the dispersing influence of practice theories postmodernism cultural studies postcolonial studies modern post positive feminism and multicultural criticisms

Archaeologies of the Middle East provides an innovative introduction to the archaeology of this fascinating region and a window on both its past and present Written by some of the top archaeologists of the Middle East scholars from diverse backgrounds with a wide range of interests and intellectual approaches Coverage spans 100 000 years from the Paleolithic to Hellenistic times Explores the connections between modern day politics and the social context of archaeological practice and various underutilized approaches to archaeological interpretation Designed for student use **Engaging Anthropology** Thomas Hylland Eriksen,2020-05-26 Anthropology ought to have changed the world What went wrong Engaging Anthropology takes an unflinching look at why the discipline has not gained the popularity and respect it deserves in the twenty first century From identity to multicultural society new technologies to work globalization to marginalization

anthropology has a vital contribution to make While showcasing the intellectual power of the discipline Eriksen takes the anthropological community to task for its unwillingness to engage more proactively with the media in a wide range of current debates If anthropology matters as a key tool with which to understand modern society beyond the ivory towers of academia why are so few anthropologists willing to come forward in times of national or global crisis Eriksen argues that anthropology needs to rediscover the art of narrative and abandon arid analysis and more provocatively anthropologists need to lose their fear of plunging into the vexed issues modern societies present Engaging Anthropology makes an impassioned plea for positioning anthropology as the universal intellectual discipline Eriksen has provided the wake up call we were all awaiting

Intellectuals and Beyond Ethan Goffman, Daniel Morris, 2009 Here a variety of distinguished scholars revisit and rethink the legacy of the New York intellectuals showing how this small predominantly Jewish group moved from communist and socialist roots to become a primary voice of liberal humanism and in the case of a few to launch a new conservative movement

Iraq Heather Bleaney, Roper, Peter Sluglett, 2004-06-01 Well considered answers to the many questions raised by the situation in Iraq past and present are rare This first comprehensive thematically organised bibliography devoted to Iraq is based on the full Index Islamicus database and is drawn from a wide variety of European language journals and books Featuring an extensive introduction to the subject and its literature by Peter Sluglett this bibliography will help readers to find their way through the massive secondary literature now available Following the pattern established by the Index Islamicus both journal articles and book publications are included as well as important internet resources The editors have taken care to add much new material to bring its coverage up to date and supplement the previously published volumes while the most important and or influential publications are conveniently highlighted in the introduction An indispensable gateway for all those with a more than superficial interest in what is and what has been happening in this nation so much the focus of attention today **Contrarian Anthropology** Laura Nader, 2018-01-08 Analyzing the workings of boundary maintenance in the areas of anthropology energy gender and law Nader contrasts dominant trends in academia with work that pushes the boundaries of acceptable methods and theories Although the selections illustrate the history of one anthropologist's work over half a century the wider intent is to label a field as contrarian to reveal unwritten rules that sometimes hinder

transformative thinking and to stimulate boundary crossing in others Anthropology of the Self Brian Morris,1994-09-20 Western society is individualised we feel at ease talking about individuals and we study individual behaviour through psychology and psychoanalysis Yet anthropology teaches us that an individual approach is only one of many ways of looking at ourselves In this wide ranging text Morris explores the origins doctrines and conceptions of the self in Western Asian and African societies passing through Greek philosophy Buddhism Hinduism Confucianism Tao and African philosophy and ending with contemporary feminism Scholarly and written in a lucid style free of jargon this work is written from an anthropological perspective with an interdisciplinary approach Morris emphasises the varying conceptions of the self found cross culturally and contrasts these with the conceptions found in the Western intellectual traditions Dialogues on Cultural Studies Arif Dirlik,2002 A collection of interviews with some of North America's foremost cultural critics and theorists including Frederic Jameson J Hillis Miller Hayden White etc Covers topics such as culture ideology history modernity post modernity post colonialism globalisation the role of the university and the role of the intellectual in today's society Some of the contributions are essays others are responses to questions and some take up all the subjects and some only focus on one subject Includes a discussion about how cultural studies will help developing nations on the periphery of cultural studies such as China to look to the future **Anthropologists and the Rediscovery of America, 1886-1965** John S. Gilkeson,2010-09-20 This book examines the intersection of cultural anthropology and American cultural nationalism from 1886 when Franz Boas left Germany for the United States until 1965 when the National Endowment for the Humanities was established Five chapters trace the development within academic anthropology of the concepts of culture social class national character value and civilization and their dissemination to non anthropologists As Americans came to think of culture anthropologically as a complex whole far broader and more inclusive than Matthew Arnold's the best which has been thought and said so too did they come to see American communities as stratified into social classes distinguished by their subcultures to attribute the making of the American character to socialization rather than birth to locate the distinctiveness of American culture in its unconscious canons of choice and to view American culture and civilization in a global perspective **Telling Stories to Change the World** Rickie Solinger,Madelaine Fox,Kayhan Irani,2010-11-16 Telling Stories to Change the World is a powerful collection of essays about community based and interest based projects where storytelling is used as a strategy for speaking out for justice Contributors from locations across the globe including Uganda Darfur China Afghanistan South Africa New Orleans and Chicago describe grassroots projects in which communities use narrative as a way of exploring what a more just society might look like and what civic engagement means These compelling accounts of resistance hope and vision showcase the power of the storytelling form to generate critique and collective action Together these projects demonstrate the contemporary power of stories to stimulate engagement active citizenship the pride of identity and the humility of human connectedness **On Becoming Authentic** Nikos Papastergiadis,Laura Turney,1996 Native American artist Jimmie

Durham has among other things been at the center of political work and identity politics among Native American communities for a number of years In this interview Durham talks about his art the politics of authenticity and the US environmental movement s mis appropriation of Native American culture **Language & Peace** Christina Schäffne, Anita L. Wenden, 2005-06-27 First published in 1999 This work s central thesis is that language as historically used has been a significant factor in creating political oppression and economic and social discrimination The editors argue that the challenge for the next century is to begin using language to inspire inclusion rather than exclusion
